| | VOLUME I | |
|--|--|----|
| | ychology efano Carta, <i>University of Cagliari, Italy</i> | 1 |
| 1. 2. 3. 4. 5. 6. 7. | Introduction The Birth of Psychology: Precursors 2.1. René Descartes 2.2. English Empiricism 2.3. The Role of Physiology 2.4. The General Cultural Context Wundt and Structuralist Psychology Structuralism in the United States The Würzburg School Functionalism Behaviorism 7.1. Sources 7.2. The Russian School of Reflexology 7.3. A Short View of Animal Psychology 7.4. Watson's Behaviorism 7.5. Behaviorism after Watson The Gestalt Movement 8.1. Origins 8.2. The German School | |
| 11 12 13 14 15 16 17 18 19 20 | 8.3. Gestalt in America Cognitivism 9.1. Jean Piaget's Genetic Psychology The Russian Cultural School Dynamic Psychology Psychology Seen Through its Methodological Approaches Cognitive Psychology Developmental Psychology Clinical Psychology Health Psychology Corganizational and School Psychology Applied Social Psychology Conclusion: A Psychology for Sustainable Development | 62 |
| Pie | erre LJ. Ritchie, <i>University of Ottawa, Canada</i> an Grenier, <i>University of Ottawa, Canada</i> | 02 |
| 1. | Introduction Historic Evolution | |

- 3. Classification
- A Quick Overview of the Branches of Psychology
 Foundations and Methods of Psychology

 - 4.2. Information Processing and Human Behavior
 - 4.3. Social Processes and Behavioral Development
 - 4.4. Applied Psychological Science
 - 4.5. Psychology in Transdisciplinary Contexts

- 5. Methodology
- 6. Ethical Issues Across the Branches of Psychology
 - 6.1. Expectations of Ethical Behavior
 - 6.2. Generic Frameworks for Understanding Ethical Principles
 - 6.3. Ethical Decision Making
 - 6.4. Contextual Aspects of Ethics in Psychology
 - 6.5. Codes of Ethics for Psychologists
- 7. Branches of Psychology Pertinent to Sustainable Development
 - 7.1. Cognitive Psychology (see, Cognitive Psychology and Attention, Perception, and Memory)
 - 7.2. Developmental Psychology (see, *Developmental Psychology: Main Problems and Modern Tendencies*
 - 7.3. Clinical Psychology
 - 7.4. Counseling Psychology
 - 7.5. Health Psychology
 - 7.6. Educational and School Psychology
 - 7.7. Applied Social Psychology
 - 7.8. Organizational and Work Psychology
- 8. Relationship of Psychology to Other Disciplines
 - 8.1. Philosophy
 - 8.2. From Roots in Physiology to the Neurosciences
 - 8.3. Medicine
 - 8.4. Education
 - 8.5. Social Sciences
- 9. Public Policy Considerations and Future Contributions
 - 9.1. Applying Psychological Expertise to Public Policy: An International Perspective
 - 9.1.1. Perception and Assessment of Global Environmental Change
 - 9.1.2. Dealing with Poverty and Social Integration
 - 9.1.3. Knowledge Transfer in Health Psychology
 - 9.1.4. Cognitive Psychology in a Multidisciplinary Environment
 - 9.1.5. Meeting Multiple Expectations: The Psychology–Public Policy Relationship
 - 9.2. A Future Snapshot: The Value of the Branches of Psychology to Sustainable Development

Clinical Psychology: A National Perspective on Origins, Contemporary Practice, and Future Prospects

Peter E. Nathan, University of Iowa, USA

- 1. Introduction
- Historical Foundations of Clinical Psychology
 - 2.1. The Beginnings: 1896–1917
 - 2.2. World War I Period: 1917-1919
 - 2.3. Further Development: 1919–1939
 - 2.3.1. Professional Developments
 - 2.3.2. Developments in Intelligence and Diagnostic Testing
 - 2.3.3. Developments in Treatment and Research
- 3. Antecedents of Contemporary Clinical Psychology
 - 3.1. World War II: 1939-1945
 - 3.2. Rapid Growth and Development: 1945–1975
 - 3.2.1. Increased Support for Training
 - 3.2.2. Professional Developments
 - 3.2.3. Developments in Assessment and Diagnosis (see, Methods in Psychological Research)
 - 3.2.4. Developments in Treatment
 - 3.2.5. Developments in Research
- 4. Contemporary Clinical Psychology: 1975–2000
 - 4.1. Contemporary Professional Developments
 - 4.2. Contemporary Developments in Assessment and Diagnosis
 - 4.3. Contemporary Developments in Treatment and Research
 - 4.4. Roles and Functions of Clinical Psychologists

5. Clinical Psychology: The Future5.1. Alternative Training Models

5.2. Clinical/Experimental Division5.3. The Challenge of Managed Care

5.4. Prescription Privileges for Clinical Psychologists

| | 5.5. Behavioral Telehealth5.6. Evidence-Based Practice and Practice Guidelines | |
|----|---|-----|
| | alth Psychology: Prevention of Disease and Illness; Maintenance of Health in Jose Sanchez-Sosa, National University of Mexico, México | 119 |
| 1. | Introduction | |
| 2. | The Health–Disease Continuum | |
| 3. | Types of Diseases | |
| 4. | The Five Pillars of Health and Disease | |
| | 4.1. Genetics | |
| | 4.2. Nutrition | |
| | 4.3. Environmental Quality | |
| | 4.4. Health Care Services | |
| 5. | 4.5. The Psychological Element Emotions, Beliefs, and Behaviors | |
| ٥. | 5.1. Emotions and Health | |
| | 5.2. Beliefs and Health | |
| | 5.3. Behavior and Health | |
| 6. | The Psychological Interplay | |
| 7. | Some Regulatory Mechanisms | |
| 8. | Stress and Health | |
| 9. | The Future of Health Psychology | |
| 1. | Introduction | |
| 2. | Memory | |
| | 2.1. Several Types Memory | |
| | 2.1.1. Working-memory | |
| | 2.1.2. Long-term Memory2.2. Main Determinants of Memory Performance | |
| | 2.2.1. Effects of Material Characteristics | |
| | 2.2.2. Effects of Memory Strategies | |
| | 2.2.3. Effects of Information Organization | |
| | 2.2.4. Individual Differences | |
| 3. | High-level Cognitive Activities (Reasoning, Decision Making, and Problem Solving) | |
| | 3.1. Dfinition and Illustration of High-Level Cognitive Activities | |
| | 3.1.1. Reasoning | |
| | 3.1.2. Decision Making | |
| | 3.1.3. Problem Solving | |
| | 3.2. Main Determinants of People's High-level Cognitive Performance | |
| | 3.2.1. Effects of Material Characteristics | |
| | 3.2.2. Effects of Cognitive Strategies | |
| 1 | 3.2.3. Individual Differences | |
| 4. | Language Processing 4.1. Main Determinants of Language Performance | |
| | 4.1.1. Effects of Material Characteristics | |
| | The Directs of Material Characteristics | |
| | | |

4.4.1. Clinical Psychologists Who Work in Applied Practice Settings 4.4.2. Clinical Psychologists Who Work in Academic and Research Settings

- 4.1.2. Effects of Language Processing Strategies
- 4.1.3. Individual Differences
- 5. Conclusion

Counseling Psychology: From Industrial Societies to Sustainable Development

144

George Hurley, Memorial University of Newfoundland, Canada

Michael S. Doyle, Memorial University of Newfoundland, Canada

- 1. Psychology and Sustainable Development
- 2. Definitions of Counseling Psychology
- 3. Education, Training, Standards and Organizational Structures for Counseling Psychology
- 4. Contexts for Counseling Psychology's Global Development
 - 4.1. Counseling Psychology and the World of Work
 - 4.1.1. Historic Formative Factors
 - 4.1.2. Current Thrusts
 - 4.2. Counseling Psychology and the Counseling Process
 - 4.2.1. Models
 - 4.2.2. Research
 - 4.3. Multicultural/Diversity Issues in Counseling Psychology
 - 4.3.1. Differing Global Contexts
 - 4.3.2. Research
- 5. Counseling Psychology's Potential Contributions to Global Sustainability
 - 5.1. Emerging Thinking Regarding Global Sustainability
 - 5.2. Areas of Need in Future Research and Practice
 - 5.2.1. Promoting Research Models and Practice Methods for Large Social/Environmental Issues
 - 5.2.2. Articulating the World of Work in Relation to Global Sustainability
 - 5.2.3. Developing Research and Practice Addressing Individual, Group, and Societal "Lighter Living"
 - 5.2.4. Developing Diversity and Multicultural Research and Practice Related to Ecological Sustainability
- 6. A Final Note

Developmental Psychology

161

Houcan Zhang, Beijing Normal University, China

Xiaochun Miao, East China Normal University, China

- 1. Introduction
- 2. Brief History
- 3. Schools of Developmental Psychology
 - 3.1. Psychoanalysis (see, Psychoanalysis)
 - 3.2. Behaviorism
 - 3.3. Genetic Epistemology Theory of Piaget (see, Cognitive Development of Children)
 - 3.4. The Theory of Vygotsky
- 4. New Developments
 - 4.1. Research on Life-Span Development
 - 4.2. Developmental Systems Theory and Theory of Developmental Biology
 - 4.3. Developmental Behavioral Genetics and Research in Cognitive Neuroscience
 - 4.4. Research in Applied Developmental Psychology
- 5. The Future of Developmental Psychology

Educational and School Psychology: Two Sides of the Same Coin?

176

Franco Marini, University of Cagliari, Italy

- 1. Introduction
- School and Educational Psychology

| 3. | Distance | Learning |
|----|----------|----------|
|----|----------|----------|

- 4. Fields of Application
- 5. Research Trends
- 6. Training of Psychologists

Work and Organizational Psychology

188

Enzo Spaltro, University of Bologna, Italy

- 1. Thinking, and Thinking in Order to Believe
 - 1.1. "Doing" Psychology: Thinking and Operating with a Subjective Concept of Work
 - 1.2. The History of the Psychology of Work
 - 1.3. The Subject as Holder of a Hypothesis Project of Well-being
- 2. Knowing, and Knowing in Order to Operate
 - 2.1. Measuring Some Psychic Variables (see *Methods in Psychological Research*)
 - 2.2. The Interview
 - 2.3. Psychological Tests
 - 2.4. Small Groups
 - 2.5. Power: Quantity and Quality
 - 2.6. The Management of Human Resources in an Affluent Society
 - 2.7. The Model of Five Cultures: Pair, Micro, Macro, Mega, and Virtual
- 3. Organizing, and Organizing Oneself
 - 3.1. The Evaluation of Work: The Transition from Efficiency to Excellence
 - 3.2. The Selection of Workers
 - 3.3. Orientation and Professional Placement
 - 3.4. Performance and Merit Evaluations
 - 3.5. Development of Career and Potential
 - 3.6. Attitudes and Opinions
 - 3.7. Professional Education and Training
- 4. Choosing, and Choosing One's Own Life
 - 4.1. Decision and Risk: Contradiction, Conflict, and the Complex
 - 4.2. Negotiation, or the Two factors-Model; Mediation, or the Three factors-Model
 - 4.3. Leadership, Membership: Integration and Differentiation
 - 4.4. Psychosocial Intervention with or without Conflict
 - 4.5. Ergonomics and Ergonomic Systems: People-Machine, People-Environment, Person-Person
 - 4.6. The Human Cost of Work, and On-the-Job Safety
- 5. Planning, and Planning Well-Being
 - 5.1. The Construction of an Organization: Mythology and Organizational Technology
 - 5.2. Psychosomatic Stress and Balance: Good Stress and Distress, Surmenage and Sous Menage
 - 5.3. Good Relations: The Service Mentality, the Public, and the Private
- 6. Well-Being, and Well-Being at Work
 - 6.1. Structure, Climate, and Culture: Factors, Diagnoses, and Interventions
 - 6.2. The Union of Well-Being: the Union Organization as a Protagonist in the Production of Wealth
- 7. Conclusion: the Metaphor of the Butterfly

Environmental Social Psychology

218

Michel Sabourin, *University of Montreal, Canada* Luc Lamarche, *University of Montreal, Canada*

- 1. Introduction
- 2. Attitude
 - 2.1. Concept
 - 2.2. Measurement
 - 2.3. Measurement of Environmental Attitudes
- 3. Attitude and Behavior
 - 3.1. Measurement
 - 3.2. Person

| 4. | 3.3. Situation Attitude Change 4.1. Definition 4.2. Spontaneous Attitude Change 4.3. Persuasive Communication in General | |
|----------------------------------|---|-----|
| 5. | 4.4. Persuasive Communication with Regard to the Environment4.5. Environmental Education | |
| | namic Psychology onardo Ancona, <i>Universita Cattolica del Sacro Cuore, Italy</i> | 235 |
| 1. 2. 3. | · | |
| _ | v choanalysis nes Orlandelli, <i>Catholic University, Italy</i> | 263 |
| 1. 2. 3. | Introduction History Main Concepts 3.1. Freudian theory synthesis 3.2. The dynamic unconscious 3.3. The dream 3.4. The psychic structure 3.5. The basic impulses 3.6. The Oedipus Complex and the transference 3.7. The Psychoanalytic Therapy 3.8. After Freud | |
| | alytical Psychology ncetto Gullotta, Associazione Italiana di Psicologia Analitica (AIPA), Italy | 273 |
| 1. 2. 3. 4. 5. 6. | Introduction The Psychiatric Phase The Phase of Archetypes and of Collective Unconscious The Search for a New Theoretical and Cultural Synthesis Jung's Model of the Psyche and the Individuation Process Developments of Jung's Thought | |
| _ | stemic Psychology risa Malagoli Togliatti, <i>University La Sapienza, Italy</i> | 298 |
| 1. | Introduction 1.1. Neo-Freudian Psychoanalytic Approaches 1.2. Developments in Child Psychiatry | |

2.

3. 4.

| 1.3. The Development of Group Therapies |
|--|
| Family Therapies and Systemic Approaches |
| The Family as a System |
| Main Concepts |
| 4.1. The Family Life Cycle |
| 4.2. Cohesion and Adaptability: Families' Dimensions |
| 4.3. Hierarchy |
| 4.4 The Parental Child |

- 4.4. The Parental Child
- 4.5. The Double-Bind Theory
- 4.6. The Dysfunctional Systems
- 4.7. The Symptom and its Meanings
- 4.8. The Context: Understanding the Symptom
- 5. Clinical Issues and Specific Techniques
 - 5.1. The Dynamic Sense of the Diagnostic Evaluation
 - 5.2. Structural Approach
 - 5.3. Evaluation of Family System and Genogram
 - 5.4. Family Sculpture
 - 5.5. Videotaping
- 6. Family Psychotherapy
- **Evolving Psychotherapeutic Models**
 - 7.1. Looking for the Counter-Paradox
 - 7.2. Looking for the Structure and the Functional Organization
 - 7.3. Looking for the Hidden "Game"
 - 7.4. Looking for History
- 8. Conclusion

Psychodynamics of Group Relationships

318

A. Paul Hare, Ben-Gurion University of the Negev, Israel

- Introduction 1.
- 2. History
- Major Concepts 3.
- Relationship to Other Perspectives

Psychology of Religion and Culture

326

Vassilis Saroglou, Universite Catholique de Louvain, Belgium

- Introduction
- Religion as (Not Only) a Quest for Meaning
 - 2.1. The Quest for Meaning and Religion: Positive and Negative Components
 - 2.2. Specifics of the Religious Quest for Meaning
- 3. Religion as the Strengthening of Self-Control
 - 3.1. Religion as Satisfying the Need for Control
 - 3.2. Religion as Demanding Self-Control
- 4. Religion as Nostalgia for Unity and for Return to the "Maternal Breast"
- 5. Religion as Paternal Protection and as a working out of Parental Relationships
 - 5.1. God as Protective Father
 - 5.2. Religion as a Working Out of Parental Relationships and of the Filial Line
- 6. Religion as an Extension of the Altruistic Imperative
 - 6.1. Religion and Altruism
 - 6.2. Religion and Morality
- 7. Religion and Culture
 - 7.1. Religion as Culture
 - 7.2. Cultural Variations in Religion
 - 7.3. Constants Beyond Cultural Differences
- 8. Perspectives

| | rchoanalytic Approaches to Art and Esthetics tonio di Benedetto, <i>Università Cattolica Sacro Cuore, Italy</i> | 347 |
|----------------------------------|--|-----|
| 1. 2. 3. 4. 5. 6. | Introduction The Analysis of Works of Art. The Unconscious and Language The Analysis of Creative Activity. Psychoanalysis as a Creative Experience An Epistemological Issue The Experience of Beauty and Unsettling Estheticism? The Psychoanalytical Experience as an Esthetic Experience | |
| Ind | lex | 367 |
| Ab | out EOLSS | 373 |
| | VOLUME II | |
| | thods in Psychological Research L. Chow, University of Regina, Canada | 1 |
| 1. 2. | Introduction The Confluence of Issues from Different Domains 2.1. Conceptual Issues 2.2. Logical Rules and Relationships 2.2.1. Deductive Logic 2.2.2. Graphical Representation of the Conditional Syllogisms 2.2.3. Inductive Logic 2.2.4. Three Logical Relationships 2.2.5. Formal Rules and Relationships in Theoretical Discussion 2.3. Meta-Theoretical Issues 2.3.1. Criteria of Falsification 2.3.2. Falsification versus Verification 2.4. Methodological Issues 2.5. Statistical Issues An Overview of Research Methods 3.1. Methodological Evolution 3.2. Non-Experimental Methods 3.2.1. Interview and Related Methods 3.2.2. Measurement 3.2.3. Computer Simulation 3.3. Laboratory Experiments 3.3.1. Independent Variable 3.3.2. Control Variable 3.3.3. Dependent Variable | |
| 4. | 3.3.4. Extraneous Variable, Confounding Variable, and Control Procedure 3.3.5. Confounding Variable 3.4. The Quasi-Experiment Reasons for the Multiplicity of Methods 4.1. Training and Methodological Preference 4.2. Meta-Theoretical Perspective 4.2.1. Non-Logical Issues with Logical Nomenclature 4.2.2. Atheoretical Experiments versus Theory-Corroboration Experiments 4.2.3. Adductive Inference 4.3. Theoretical Orientation | |
| 5. | 4.4. Research Objective Philosophical Issues | |

| | 5.1. Logical Construct versus Hypothetical Construct 5.2. The Acceptance of Unobservable Structures or Processes 5.3. The Nature of Psychological Explanation 5.3.1. Two Dimensions of Understanding 5.3.2. The Logic of Explanation | |
|-----|--|----|
| | 5.3.3. Understanding, Causal Explanations, Prediction, and Control 5.4. The Validity of Animal Studies 5.5. The Lure of Reductionism 5.5.1. The Compatibility of Idiographic Uniqueness and Nomothetic Constructs 5.5.2. Reductionism Revisited 5.6. The Possibility of Objectivity | |
| 6. | Some Methodological Issues 6.1. Internal Validity | |
| 7. | 6.2. External Validity Current Trends in Methodology | |
| | erviewing and Observation | 33 |
| 1. | l F. Huon, University of New South Wales, Australia Introduction | |
| 2. | Observation | |
| | 2.1. Systematic Observation | |
| | 2.2. Ethical Considerations2.3. Strategies Used in Field Settings | |
| | 2.4. Operationalization of Behavioral Observation | |
| | 2.5. Method Specification for Observation | |
| | 2.6. Scientific Adequacy | |
| 2 | 2.7. Reactivity | |
| 3. | Interviewing 3.1. Historical Overview | |
| | 3.2. Survey Interviews | |
| | 3.3. Usability Interviews | |
| | 3.4. Focus Group Interviews | |
| | 3.5. Interviewing in Clinical Contexts | |
| | 3.6. Selection Interviews | |
| | 3.7. Cognitive Interviewing | |
| | 3.8. Interviewing Children3.9. Interviewing as Skilled Social Interaction | |
| | 3.10. Training in Interviewing | |
| | 3.11. Scientific Adequacy of Interviews | |
| | 3.11.1. Interview Reliability | |
| | 3.11.2. Interview Validity | |
| | 3.12. Continuing Debates | |
| _ | perimentation in Psychology - Rationale, Concepts, and Issues | 50 |

 - 3.2.3. Nature of the Task
 - 3.2.4. Nature of the Information Treatment System
 - 3.2.5. Practical Applications

Cross-Cultural Psychology

202

Paul G. Schmitz, University of Bonn, Germany

- 1. Introduction
- 2. How Do Migrants Adapt to a New Culture?
 - 2.1. Is There an Option of Free Choice Concerning Specific Acculturation Strategies?
 - 2.2. Advantages and Disadvantages of Acculturation Strategies
 - 2.3. Auto-Separation and the Need for Social Support
- 3. Individual Differences in Acculturation
 - 3.1. Coping Strategies and Acculturative Behavior
 - 3.2. The Influence of Personality Variables
- 4. Intercultural Sensibility and Competence
 - 4.1. Acculturation Research
 - 4.2. Intercultural Sensibility
 - 4.3. Training for Migrants
 - 4.4. Attitudes towards Migrants

Environmental Psychology for the New Millenium: Towards an Integration of Cultural and Temporal Dynamics

228

Gabriel Moser, Université René Descartes-Paris V, France

- 1. Introduction
- 2. The Cultural Dimension
 - 2.1. Home Environment; Neighborhood; Urban Life; Ecological Behavior. The Micro-Environment and the Cultural Dimension
 - 2.2. The Cultural Dimension and the Neighborhood
 - 2.3. The Cultural Dimension and the Conditions of Urban Life
 - 2.4. The Cultural Dimension and the Global Environment
- 3. The Temporal Dimension
 - 3.1. The Temporal Dimension, Environmental Appropriation, and Well-being
 - 3.2. The Temporal Dimension and Exposure to Environmental Conditions
 - 3.3. The Temporal Dimension, Perception, and Representations of the Environment
- 4. Conclusion

Ecological Psychology

245

Mirilia Bonnes, *University of Rome "La Sapienza", Italy* Anna Maria Nenci, *University of Cagliari, Italy*

- 1. The Psychological Tradition and the Ecological Perspective
 - 1.1. Barker and Colleagues' Midwest Psychological Field Station
 - 1.2. The Behavior Settings of the First Ecological Psychology
- 2. Ecological Psychology and Environmental Psychology
 - 2.1. The Spatial-Physical Environment of Environmental Psychology: From Physical Settings to Places
 - 2.2. The Ecological Revolution and Sustainable Development
 - 2.3. The Environmental Psychology of Sustainable Development or "New Ecological Psychology"
