VOLUME I

Environmental Education and Awareness	1
<i>Bhaskar Nath, European Centre for Pollution Research, London</i>	
1. Introduction	
2. The Problem in Context— Some of the Man-Made Environmental Problems with Potentially Catastrophic Consequences for Life on Earth	
3. How did we get here? Evolution of Human Attitude to Nature and the Natural Environment	
3.1. In the Ancient and Older Civilizations	
3.2. In Western Civilizations	
3.3. The Legacy	
3.4. Global Sustainable Development and Environmental Sustainability	
3.5. True Meaning of Global Environmental Sustainability	
4. Cause-effect Relationship	
5. Efficacy of Science and Technology to Deliver Global Environmental Sustainability and Sustainable Development	
5.1. Perceived Role of Science and Technology in Delivering Global Environmental Sustainability and Sustainable Development	
5.2. Can we Rely Exclusively on Science and Technology to Deliver Global Environmental Sustainability and Sustainable Development?	
6. Objective and Scope of Environmental Education and Research	
7. Environmental Education for Children	
7.1. Approaches to Early Childhood Education	
7.2. Importance of Education at an Early Age	
7.3. Basic Criteria for Developing Formal Curricula for the Environmental Education of Children	
7.4. Development of Formal Curricula for Secondary School Children	
8. Development of Environmental Curricula for Children with Learning Disability	
8.1. Key Guiding Principles	
8.2. Curriculum Content and Pedagogic Approaches	
8.3. Pedagogic Elements of Formal Curricula	
9. Environmental Education for Undergraduate Students	
9.1. What is Deemed Important for Undergraduate Students to Learn about Environmental Protection and Sustainable Development?	
9.2. Design of Environmental Curricula	
9.3. Proposal for a Generic Syllabus	
10. Instilling Environmental Awareness in Undergraduate Students	
10.1. How We See Ourselves — Human Limitations	
10.1.1. Spatial Limitation	
10.1.2. Temporal Limitation	
10.1.3. Inability to Predict Future Consequences of Present Action	
10.2. How to Instill Environmental Awareness in Undergraduate Students	
11. Environmental Education for Graduate Students	
11.1. The Background in Brief	
11.2. Why is it Important for Graduate Students to Know about the Environment?	
12. Proposal for the Environmental Curricular Content for Graduate Students	
12.1. Masters Degree Programs	
12.2. Raising Environmental Awareness	
12.3. Graduate Research Programs	
13. Conclusion	

Formal Environmental Education at Preschool, Primary and Secondary Levels**69**Bhaskar Nath,*European Centre for Pollution Research, London, United Kingdom*

1. Introduction
 - 1.1. The Problem in Context — The Background
 - 1.2. How Did We Get Here?
 - 1.3. A Heuristic for Addressing the Problem in Hand
 - 1.4. Reliance on Clean Technology, Market Forces and Economic and Regulatory Instruments — the Reality
2. Importance of Teaching Environmental Education at an Early Age
 - 2.1. Approaches to Early Childhood Education
 - 2.2. Importance of Education at an Early Age
 - 2.3. Psychological Perspectives on Parenting, Motivation and Learning
 - 2.3.1. Love, Affection and Parenting
 - 2.3.2. Motivation
 - 2.3.3. The Nature of Learning
 - 2.4. Socio-cultural and Related Issues
3. Role of Religion, Mythology and Morality Tales in Instilling Moral Values in Children for Environmental Protection
4. Formal Curricula for Children's Environmental Education
 - 4.1. Socio-cultural and Related Issues
 - 4.2. Development of Formal Curricula for Preschool and Primary School Children
 - 4.3. Development of Formal Curricula for Secondary School Children
 - 4.4. Development of Curricula for Children with Learning Disability
 - 4.4.1. Key Guiding Principles
 - 4.4.2. Curriculum Content and Pedagogic Approaches
 - 4.5. The Pedagogic Element of Formal Curricula
 - 4.5.1. Some Comments on the Teaching-learning Process
 - 4.5.2. Role of Cognition in Learning
 - 4.5.3. The Gender Factor
 - 4.6. Some Comments on the Environmental Education of School Children
 - 4.6.1. The Opposing Forces of Consumerism
 - 4.6.2. A Method Suggested for Teaching Moral Values to Young Children
5. Conclusion

Importance of Teaching Environmental Education at an Early Age**103**Bhaskar Nath,*European Centre for Pollution Research, London, United Kingdom*

1. Approaches to early childhood education
2. Importance of education at an early age
3. Psychological perspectives on parenting, motivation and learning
 - 3.1. Love, affection and parenting
 - 3.2. Motivation
 - 3.3. The nature of learning
4. Socio-cultural and related issues
 - 4.1. Origins and evolution of moral values
 - 4.2. Role of religion, mythology and morality tales in instilling moral values for environmental protection
 - 4.3. Participants in teaching children moral values
5. Conclusion

Environmental Curricula Development for Each Age Group**121**Bhaskar Nath,*European Centre for Pollution Research, London, United Kingdom*Ilkden Talay,*Ankara University, Turkey*

1. Introduction

2. Some affective factors of personality
 - 2.1. Attitude and behaviour
 - 2.2. Mood
 - 2.3. Self-esteem
 - 2.4. Interest and relevance
3. Basic criteria for curriculum development
4. Curriculum development
 - 4.1. Curricula for preschool and primary school children
 - 4.2. Curricula for secondary schools
5. Mechanisms to introduce environmental curricula into secondary schools
 - 5.1. Status of existing environmental curricula
 - 5.2. Disciplinarian compartmentalisation and environmental education
 - 5.3. Teacher training for curriculum development and environmental education
 - 5.4. Situation in the developing countries
 - 5.4.1. Bureaucratic problems
 - 5.4.2. The 'dependency culture'
 - 5.4.3. Lack of resources
6. Conclusion

Methods of Environmental Teaching and Learning

140

Bhaskar Nath, *European Centre for Pollution Research, London, United Kingdom*

1. Introduction
2. Some psychobiological factors influencing teaching and learning
 - 2.1. Cognitive abilities to learn
 - 2.1.1. Role of cognition in learning
 - 2.1.2. Learning and other abilities
 - 2.2. The gender factor
 - 2.3. Punishment
3. Teacher personality and effective teaching
4. Guidance for effective teaching and learning
 - 4.1. Cultural appropriateness of teaching-learning methods
 - 4.2. Environmental teaching-learning in schools
 - 4.2.1. The opposing forces of consumerism
 - 4.2.2. A method suggested for teaching moral values to young children
5. Conclusion

Participation in Common Environmental Activities in and Out of School

155

Bhaskar Nath, *European Centre for Pollution Research, London, United Kingdom*

1. Introduction
 - 1.1. Respect for Nature and the Environment
 - 1.2. Greed, Avarice and Environment-respecting Moral Values
 - 1.3. Potential Role of Common Environmental Activities in and out of School
 - 1.4. How Did We Manage To Get Here?
2. Children's play and related issues
3. Design and implementation of common environmental activities
 - 3.1. Criteria
 - 3.2. Common environmental activities
 - 3.3. Proposal for common environmental activities for preschool, primary and secondary school children
4. Conclusion

Special Environmental Education for the Learning Disabled

169

Niels Chapman, *Whitefield Schools and Centre, London, United Kingdom*

Laura Pease, *Whitefield Schools and Centre, London, United Kingdom*

1. Introduction
2. Key Features of a Special Educational Environment
 - 2.1. Invariance
 - 2.2. Scaffolding
 - 2.3. Zone of Proximal Development
 - 2.4. Legitimate Peripheral Participation
 - 2.5. Distributed Cognitions
 - 2.6. Artefacts
 - 2.7. Affordances and Effectivities
3. Working with the Environment
4. Principles of the Environmental Curriculum
5. Curriculum Content and Approaches
6. Using Resources
7. Conclusion

Formal Environmental Education at the Undergraduate Level

189

Bhaskar Nath, *European Centre for Pollution Research, London, United Kingdom*

1. Introduction
2. Some of the Related Issues
 - 2.1. Evolution of Higher Education
 - 2.2. Education in Ethics and Morality
 - 2.3. Perceived Role of Science and Technology in Delivering Environmental Sustainability\
 - 2.4. Science, Technology, Environment, Ethics and Morality
3. Development of Environmental Curricula for Undergraduate Students
 - 3.1. What is Deemed Important for Undergraduates Students to Learn about Environmental Protection?
 - 3.2. Design of Environmental Curricula
 - 3.3. Proposal for a Generic Syllabus
4. Instilling Environmental Awareness in Undergraduate Students
 - 4.1. How We See Ourselves - Human Limitations
 - 4.1.1. Spatial Limitation
 - 4.1.2. Temporal Limitation
 - 4.1.3. Inability to Predict Future Consequences of Present Action
 - 4.1.4. Innate Selfishness of the Humankind and Lack of Objectivity
 - 4.2. Pressing Environmental Problems of Our Time
 - 4.2.1. Global Warming and Climate Change
 - 4.2.2. Ocean Acidification
 - 4.2.3. The Looming Energy Crisis
 - 4.2.4. Poverty Eradication
 - 4.3. How to Instill Environmental Awareness in Undergraduate Students
5. Conclusion

Curricula Development For Undergraduate University Students

220

Bhaskar Nath, *European Centre for Pollution Research, London, United Kingdom*
 Ilkden Talay, *Ankara University, Turkey*

1. Introduction
 - 1.1. Growing Multi-disciplinary Trend in University Education
 - 1.2. Need for Environmental Education at the Undergraduate Level
 - 1.3. Current Status of Environmental Education at the Undergraduate Level
2. Basic criteria for curriculum development
3. The "Content" Element Of Environmental Curricula
4. Development of the "pedagogic" element of environmental curricula

- 4.1. Face-to-face Teaching (items (A) to (F) of Box 2)
- 4.2. Project Work (item (H) of Box 2)
- 4.3. Importance of Field Work in Environmental Education
5. Quality control
6. Some practical difficulties
 - 6.1. Availability of competent teachers
 - 6.2. Teacher training and continuing education
7. Conclusion

Instilling Environmental Awareness in Undergraduate University Students
 Bhaskar Nath, *European Centre for Pollution Research, London, United Kingdom*

240

1. Introduction
2. What is it that undergraduate students should be aware of?
 - 2.1. Awareness of human limitations
 - 2.2. Reality and perception
 - 2.3. Temporal limitation
 - 2.4. Lack of objectivity
 - 2.5. Awareness of environmental issues and problems
3. Instilling environmental awareness in undergraduate students
 - 3.1. Thematic framework of awareness
 - 3.2. Instilling environmental awareness
4. Conclusion

Some Pressing Global Environmental Problems of Our Time and Strategies For Mitigating Their Impacts

254

Bhaskar Nath, *European Centre for Pollution Research, London, United Kingdom*

1. Introduction
2. Global Warming and Climate Change
 - 2.1. The mechanism of global warming
 - 2.2. "Global dimming" and its effect on global warming
 - 2.3. Some of the predicted consequences of climate change
 - 2.3.1. Melting of Polar sea-ice and retreat of glaciers
 - 2.3.2. Impacts of climate change on agriculture
 - 2.3.3. Possible failure of the Gulf Stream
 - 2.4. The Kyoto Agreement and some of the technologies with potential for reducing global warming
 - 2.4.1. The Kyoto Agreement
 - 2.4.2. Promising technologies to reduce CO₂ emissions
3. Acidification of the Oceans
4. Poverty Eradication
 - 4.1. Poverty alleviation through economic development
 - 4.2. The Millennium Development Goal and eradication of extreme poverty and hunger
5. Observations
 - 5.1. Humankind's inability to predict future consequences of present action
 - 5.2. Limitation of science and technology in the environmental context
 - 5.3. Humankind's long-term future?
6. Conclusion

Formal Environmental Education at the Graduate Level

288

Bhaskar Nath, *European Centre for Pollution Research, London, United Kingdom*

1. Introduction
 - 1.1. The background in brief

- 1.2. Why is it important for graduate students to know about the environment and current status of environmental education at the graduate level
2. Sustainable development and related issues
 - 2.1. Sustainable development and environmental sustainability
 - 2.2. Heuristic for an operational definition of sustainable development
3. Proposal for the environmental curricular content for graduate students
 - 3.1. Masters degree programmes
 - 3.2. Topics for research
 - 3.2.1. Reduction of CO₂ emissions to the atmosphere
 - 3.2.2. Education in ethics and morality
 - 3.2.3. Earth's Self-regenerative capacity
 - 3.2.4. Alternative paradigms of economy
4. Conclusion

Curricula Development for Graduate Students

313

Bhaskar Nath, *European Centre for Pollution Research, London*

1. Introduction
2. Lack of Progress towards Agenda 21 Objectives
3. Sustainable Development and Environmental Sustainability
4. Proposal for a Unique Operational Definition of Sustainable Development
 - 4.1. Heuristic to an operational definition of sustainable development
 - 4.2. Role of morality and ethics in education for sustainable development
5. Science, Technology and Environmental Sustainability
 - 5.1. Perceived role of science and technology in delivering environmental sustainability
 - 5.2. Can science and technology deliver sustainable development?
6. Proposed Environmental Subjects for Students in different Disciplines
7. Conclusion

Constraints and Opportunities for the Work of the Environmental Manager

333

D. C. Cawsey, *Environmental Training Consultancy, Pencroft Farm, Uplyme, Devon, England*

1. Introduction
2. What is an Environmental Manager?
3. Constraints External to the Enterprise
 - 3.1. Compliance
 - 3.2. Competitive Advantage
 - 3.3. Stakeholders
4. Constraints Internal to the Enterprise
 - 4.1. Internal Strategy
 - 4.2. Environmental Management Systems
 - 4.2.1. EMAS
 - 4.2.2. ISO 14000
 - 4.3. The role of environmental auditing in EMS
 - 4.4. Benefits of EMS
 - 4.5. Life Cycle Management
 - 4.6. Eco-Efficiency
5. Future Trends

Need for Environmental Research

352

Bhaskar Nath, *European Centre for Pollution Research, London*

1. Introduction
2. How did we get here? Evolution of the "consumption culture"
 - 2.1. Evolution of the Western "throw-away consumption culture"

- 2.2. The main consequences
3. Cause-Effect Relationship
4. Criteria for Research
 - 4.1. Focus of research
 - 4.2. Reactive and proactive research
 - 4.3. A clear understanding of what science and technology can and cannot do
5. Suggested Areas of Environmental Research
 - 5.1. Reactive (end-of-the-pipe) areas of research
 - 5.1.1. Water resources and waste water treatment
 - 5.1.2. Solid waste management
 - 5.1.3. Efficacy of environmental standards
 - 5.2. Proactive ("before-the-pipe") strategies
 - 5.2.1. Non-technical
 - 5.2.2. Technical -- example of atmospheric pollution
 - 5.3. Affordable technology
 - 5.4. Transboundary pollution
 - 5.4.1. Transboundary air pollution
 - 5.4.2. Transboundary water pollution
 - 5.4.3. Import-Export of Waste
6. Conclusion

Index	377
About EOLSS	383

VOLUME II

Natural History Films	1
<i>Bhaskar Nath, European Centre for Pollution Research, London</i>	

1. Brief Historical Background to Natural History and Naturalism
2. Evolution of Natural History films
3. Pre-eminent Pioneers of Modern Natural History films
 - 3.1. Jacques-Yves Cousteau (http://en.wikipedia/wiki/Jacques_Cousteau)
 - 3.2. Sir David Attenborough
4. Observations
5. Conclusion

Interactive Workshops, Games, and Software: Exercises in Environmental Education	10
<i>N. Roorda, Dutch National Foundation for Sustainable Higher Education (DHO), Tilburg, The Netherlands.</i>	

1. The Draining Accident Exercise
 - 1.1. Students' Role in the Draining Accident Exercise
 - 1.2. Teachers' Role in the Draining Accident Exercise
2. The Production Capacity Enlargement Exercise
 - 2.1. Students' Role in the Production Capacity Enlargement Exercise
 - 2.2. Teachers' Role in the Production Capacity Enlargement Exercise
 - 2.2.1. Theory
 - 2.2.2. Theoretical Calculation
 - 2.2.3. Reality
 - 2.2.4. A Graphical Solution to the Calculation Problem
3. The Greenhouse Effect Exercise
 - 3.1. Students' Role in the Greenhouse Effect Exercise
 - 3.2. Teachers' Role in the Greenhouse Effect Exercise

4. Environmental Pollution Unit (EPU) Exercise
 - 4.1. Students' Role in the EPU Exercise
 - 4.1.1. Goal of the Game
 - 4.1.2. Recycling and Labor Costs
 - 4.1.3. Construction and Strength Calculation
 - 4.1.4. The Designing Process
 - 4.2. Teachers' Role in the EPU Exercise
 - 4.2.1. Finding the Best Solution
 - 4.2.2. Letting the Computer Solve the Problem
5. How to produce 20 MWE?
 - 5.1. Students' Role in the 20 MWE Production Game
 - 5.2. Teachers' Role in the 20 MWE Production Game
6. Not making Tea: an Energy Waste?
 - 6.1. Students' Part in the Energy Saving Exercise
 - 6.2. Teachers' Part in the Energy Saving Exercise

Professional Environmental Education

33

Bhaskar Nath, *European Centre for Pollution Research, London, United Kingdom*

1. Introduction
2. Some Of The Issues All Environmental Professionals Need To Be Aware Of
 - 2.1. The fundamental conflict
 - 2.2. Inadequacy of environmental standards
 - 2.3. Discounting the future
 - 2.4. Scarcity
 - 2.5. The political process
 - 2.6. Change of attitude
 - 2.7. Wider social responsibility of environmental professionals
3. Environmental Planning; What Environmental Planners Ought To Know
 - 3.1. Nature of the work of Environmental Planners
 - 3.2. What should Environmental Planner know about environmental protection and sustainable development?
 - 3.2.1. General areas of expertise
 - 3.2.2. Specialized areas of expertise
4. Environmental Management and the Environmental Manager
 - 4.1. What is Environmental Management?
 - 4.2. Functions of the Environmental Manager
 - 4.3. Professional training needs of Environmental Managers
5. Environmental Impact Assessment
6. Environmental Monitoring
 - 6.1. What is environmental monitoring?
 - 6.1.1. Sampling
 - 6.1.2. Physical and chemical analysis of data
 - 6.2. Education and skills needed for environmental monitoring
7. Conclusion

Preparation for Environmental Planners

57

A.K. Karavanas, *National Technical University of Athens, Athens*

N.C. Markatos, *National Technical University of Athens, Athens*

1. The Nature of Work of the Environmental Planner
2. Career Opportunities and Job Description
 - 2.1. Nature of work
 - 2.2. Job requirements and opportunities
 - 2.3. Career Description
 - 2.4. Education/Training

3. Case Studies Showing the Participation Of The Environmental Planner
 - 3.1. Environmental management projects and action plans
 - 3.2. Environmental strategies for cities and local management plans
 - 3.3. Environmental Impact Assessment and public consultation
 - 3.4. Environmental permitting and monitoring. Environmental management systems
4. Conclusions

Preparation for Environmental Managers

67

D. C. Cawsey, *Environmental Training Consultancy, Pencroft Farm, Uplyme, Devon, England*

1. Introduction
2. Skills and knowledge requirements for the environmental manager
3. Typical requirements of professional education and training for environmental managers
4. Case Studies of Professional Education and Training
 - 4.1. STEP Integrated Environmental Management Training
 - 4.1.1. Programme Development
 - 4.1.2. Programme Implementation
 - 4.1.3. Programme Evaluation
 - 4.1.4. Programme Adaptability
 - 4.1.5. Conclusion
 - 4.2. CIWEM Structured Training
 - 4.2.1. Mandatory Competences
 - 4.2.2. Employer Optional Competences
 - 4.2.3. Continuing Professional Development (CPD)
 - 4.2.4. Involvement in CIWEM Activities
 - 4.2.5. Training Records
 - 4.2.6. The Mentor
 - 4.2.7. CIWEM Certificate and Diploma
 - 4.2.8. Conclusion
 - 4.3. EEVE Business Support Model
 - 4.3.1. Identification of Client Needs
 - 4.3.2. Requirements for the Business Support Model
 - 4.3.3. The Business Support Model
 - 4.3.4. Conclusion
5. Future Trends

Preparation for Environmental Impact Evaluators

84

A.K. Karavanas, *National Technical University of Athens Athens, Greece.*

N.C. Markatos, *National Technical University of Athens Athens, Greece.*

1. Objectives of Environmental Impact Assessment
2. Nature of EIE's Work
3. Career Opportunities and Job Description
4. Education/Training
5. Cases in which the Environmental Impact Evaluator Would Participate
 - 5.1. Environmental impact assessment and public consultation
 - 5.2. Link between EIA and Environmental permitting
 - 5.3. Environmental monitoring and reporting
 - 5.4. Environmental management systems and environmental performance
 - 5.5. Tools for integrated Environmental Assessment. Computer-Based Models in Integrated Environmental Assessment
6. Conclusions

Preparation for Environmental Monitoring Careers Including Analysis and Statistical Assessment of Data

95

L. Viras,*Ministry of Environment, Greece*
 N.C. Markatos,*National Technical University of Athens, Greece*

1. Introduction
2. Sampling
3. Chemical Analysis of Samples
4. Reporting Analytical Data

Continuing Education

109

D C Cawsey,*Environmental Training Consultancy, Pencroft Farm, Uplyme, Devon, England*

1. Introduction
2. The Role of Continuing Education
 - 2.1. Continuing and rapid change
 - 2.2. Varied backgrounds of individuals
 - 2.3. Complexity of environmental issues
 - 2.4. Transnationality
 - 2.5. Individual and Community Involvement
3. Types of Continuing Education
4. Formal Continuing Education
 - 4.1. MSc/Postgraduate Diploma in Integrated Environmental Management by Distance Learning (University of Bath, UK)
 - 4.2. International Open and Distance Learning Course on Environmental Management (Helsinki University of Technology, Finland)
 - 4.3. Leadership for Environment and Development (LEAD)
5. Informal Continuing Education
 - 5.1. The Natural Step
 - 5.2. Action at Home
6. Future Trends

Continuing Education for Decision-Makers including Politicians, Senior Government Officials and Chief Executives in Industry

126

Bhaskar Nath,*European Centre for Pollution Research, London, UK*

1. Introduction
2. Human Knowledge and Some of its Salient Characteristics
 - 2.1. Evolution of human knowledge
 - 2.2. The "world view" of Aristotle and its enduring environmental legacy
 - 2.3. Perceptive nature of knowledge and human limitations
3. Continuing Education
 - 3.1. What is Continuing Education?
 - 3.2. Methods of delivery of continuing education
 - 3.2.1. Short courses
 - 3.2.2. Part-time courses
4. Suggestions for the Curricular Content for the Continuing Education of Leaders of Society
 - 4.1. Wider responsibility of Leaders of Society to the environment
 - 4.2. Public participation, accountability and transparency
 - 4.3. Need for achieving global sustainable development
 - 4.4. Global Warming and its likely consequences
 - 4.5. The "North-South Divide" and its global environmental impacts
 - 4.6. Exclusive reliance on science and technology to deliver global sustainable development
5. Some Other Issues that Leaders of Society ought to be aware of with a view to addressing them
 - 5.1. Global sustainable development in the context of pluralistic democratic governance
 - 5.2. Corporate profit versus environmental integrity
6. Need and an Innovative Mechanism for Certification
 - 6.1. Need for certification

- 6.2. An innovative mechanism for certification
7. Conclusion

Continuing Education for Updating Teachers of Environmental Science **155**
 N. Roorda, *Dutch National Foundation for Sustainable Higher Education (DHO), Tilburg, The Netherlands.*

1. Starting the education process
2. Reasons for staff education
3. The strategy of staff education
4. After the starting process
5. Example exercise
 - 5.1. Introduction
 - 5.2. Goal
 - 5.3. Materials
 - 5.4. Instructions
 - 5.5. The *negative* future scenario

Mechanisms for the Continuing Education of the Public **171**
 Bhaskar Nath, *European Centre for Pollution Research, London, UK*

1. Introduction
2. Mechanism for continuing public education
 - 2.1. Adult learning
 - 2.2. Full-time and part-time courses
 - 2.3. Short courses
 - 2.4. Conferences
 - 2.5. Seminars and workshops
 - 2.6. Distance-learning
 - 2.6.1. Conventional distance-learning
 - 2.6.2. E-learning, online learning, and blended E-learning
 - 2.6.3. Open-learning, open access and self-learning
3. Continuing education of the public and for informing them on specific issues
 - 3.1. Available mechanisms and possibilities
 - 3.2. Scientific environmental journals and popular environmental magazines
 - 3.2.1. Scientific environmental journals
 - 3.2.2. Popular environmental magazines
4. Observations
5. Conclusion

Informal Mechanisms For Raising Public Awareness At National And Global Levels And Important Related Issues **192**
 Bhaskar Nath, *European Centre for Pollution Research, London*

1. Introduction
2. Why public awareness of environmental issues and problems is important, and the difficulties
 - 2.1. Environmental awareness as enabler of effective public participation
 - 2.2. Environmental awareness as driver of environmental change
 - 2.3. Important environmental issues the public should be aware of
3. Primary objectives of raising public awareness
4. Strategies for raising public awareness
 - 4.1. Strategy for children
 - 4.2. Strategy for adults
5. Informal mechanisms for raising public awareness

- 5.1. Criteria
- 5.2. National mechanisms for children
 - 5.2.1. Field trips
 - 5.2.2. Summer schools
 - 5.2.3. Site visits
 - 5.2.4. Newsletters
 - 5.2.5. Telling of stories and fables
 - 5.2.6. Philosophical and religious teachings
- 5.3. National mechanisms for adults
- 5.4. Global mechanisms
 - 5.4.1. Television programmes
 - 5.4.2. Newspapers and Magazines
 - 5.4.3. The Internet
 - 5.4.4. Virtual field trips
 - 5.4.5. International NGOs
 - 5.4.6. The International Earth Day
 - 5.4.7. Decade of education for sustainable development
6. Observation
7. Conclusion

The Voluntary Sector and Initiatives in Environmental Education **219**
 D C Cawsey,*Environmental Training Consultancy, Pencroft Farm, Uplyme, Devon, England*

1. Introduction
2. Expansion of Voluntary Sector
3. Individuals
4. NGOs
5. Current and Future Trends

IUCN Commission on Education and Communication (CEC) **229**
 Bhaskar Nath,*European Centre for Pollution Research, London*

1. The CEC — Its Vision, Mission and Objectives
2. Organization of The CEC
3. CEC Involvement in IUCN Work Programmes
 - 3.1. Communication, education and public awareness (CEPA)
 - 3.2. Education for sustainable development (ESD)
 - 3.3. CEC's involvement in United Nations Decade of Education for ESD 2005-2014
4. Observations
 - 4.1. Poverty eradication
 - 4.2. Achievement of universal primary education
 - 4.3. Lack of a focus
5. Conclusion

International Centre for Conservation Education **241**
 Krassimira T. Kazashka-Hristozova,*Ministry of Environment and Water, Sofia, Bulgaria*

1. International Centre for Conservation Education and Its Major Activities
 - 1.1. What is the International Centre for Conservation Education?
 - 1.2. Main areas of ICCE's activity
2. Current Projects of ICCE
3. ICCE's Educational Resource Base
 - 3.1. Audiovisual Resources for Primary Schools (KS1 And KS2)
 - 3.2. Audiovisual resources for secondary schools (KS3 and KS4) and general audiences
4. Other Services Provided by ICCE

5. Observations
6. Conclusion

Environmental Liaison Centre International **248**
 Bhaskar Nath,*European Centre for Pollution Research, London, UK*

1. The Environmental Liaison Centre International — Its Vision, Mission and Objectives
2. ELCI's Links to and Relationship with International Organizations
3. Major Activities of ELCI
 - 3.1. Environmental projects (www.greenyearbook.org)
 - 3.2. Environmental campaigns (www.greenyearbook.org)
 - 3.3. ELCI's involvement in other activities (www.elci.org/KOAN.htm)
4. Observations
5. Conclusion

Other International NGOs **257**
 D. C. Cawsey,*Environmental Training Consultancy, Pencroft Farm, Uplyme, Devon, England*

1. Introduction
2. Greenpeace
 - 2.1. Greenpeace Case Study: 'Greenfreeze'
3. WaterAid
 - 3.1. Water-Aid Case Study: Ethiopia
4. Worldwatch

The International Earth Day **265**
 Krassimira T. Kazashka-Hristozova,*Ministry of Environment and Waters, Sofia, Bulgaria*

1. The "International Earth Day"
 - 1.1. What is the "International Earth Day" and what is it and its purpose?
