

CONTENTS

VOLUME XI

| | |
|---|----------|
| Mangroves of the Reef Domain: A Case Study in Belize | 1 |
| Ilka C. Feller, <i>Smithsonian Environmental Research Center, Smithsonian Institution, 647 Contees Wharf Rd., Edgewater MD 21037, USA</i> | |
| Klaus Ruetzler, <i>National Museum of Natural History, Smithsonian Institution, Washington, DC 20560, USA</i> | |

1. Introduction
 - 1.1. Mangroves: Definitions, Distribution, and Ecological and Economic Significance
 - 1.2. Threats to Mangroves
2. A Case Study in Belize
 - 2.1. Oceanic Mangrove Forests in the Reef Domain
 - 2.2. The Mesoamerican Barrier Reef
 - 2.3. Structure and Diversity of Mangrove Forests on Oceanic Islands
 - 2.4. Mangrove Island Communities
 - 2.4.1. Terrestrial Communities
 - 2.4.2. Marine Communities
 - 2.4.3. Prop Root Communities
 - 2.4.4. Benthic Communities
 - 2.4.5. Seagrass Communities
 - 2.4.6. Microbial Communities
3. Conclusions

| | |
|---|-----------|
| Tropical Insect Diversity - How to Sample it | 35 |
| J. T. Longino, <i>The Evergreen State College, Olympia, WA, USA</i> | |

1. Introduction
 - 1.1. Why Sample Insects?
 - 1.2. ATBI versus ABTI
 - 1.3. The Taxonomic Impediment
 - 1.4. Favorite Taxa
 - 1.4.1. Butterflies
 - 1.4.2. Ants
 - 1.4.3. Dung Beetles
2. The Species x Sample Matrix
3. Sampling Methods
 - 3.1. Volumetric Methods
 - 3.1.1. Direct Visual Inspection of Samples
 - 3.1.2. Berlese Samples
 - 3.1.3. Winkler Samples
 - 3.1.4. Branch Bagging and Canopy Fogging
 - 3.2. Individual-based Hunting and Trapping Methods
 - 3.2.1. Aerial Netting, Sweeping, and Beating
 - 3.2.2. Malaise Traps and Flight Intercept Traps
 - 3.2.3. Pitfall Traps
 - 3.2.4. Attraction to Lights
 - 3.2.5. Baiting
4. Measuring Diversity
 - 4.1. Graphing Diversity
 - 4.2. Diversity Indices
 - 4.3. Species Area versus Local Community
 - 4.4. Pooled-Quadrat Plots
 - 4.5. Species Accumulation Curves

- 4.6. Species Density versus Species Richness
- 4.7. Rarefaction
- 4.8. Estimating Species Richness
 - 4.8.1. Extrapolating Species Accumulation Curves
 - 4.8.2. Fitting Parametric Models
 - 4.8.3. Non-Parametric Methods
- 4.9. Hyperdiverse Tropical Insects
- 4.10. Recommendations

The Impact of Forest Fragmentation on Populations of New World Primates **59**
 Stephen F. Ferrari, *Department of Biology, Universidade Federal de Sergipe, So Cristvo Sergipe, Brazil*

- 1. Introduction
- 2. New World Monkeys
- 3. Effects of Habitat Fragmentation
- 4. A Short History of Human Impact in the Neotropics
- 5. Diversity Patterns
- 6. Fragmentation and Conservation
- 7. The effects of anthropogenic habitat fragmentation
- 8. Conservation strategies
- 9. The Future

Life in the Treetops – A Concise Summary of Forest Canopy Ecology **83**
 Margaret D. Lowman, *Professor of Biology and Environmental Studies, Director of Environmental Initiatives, New College of Florida, USA, Center for Canopy Ecology, Sarasota FL, USA*

- 1. History of Canopy Biology.
 - 1.1. Introduction.
 - 1.2. Chronology of the Development of Canopy Access Tools.
 - 1.3. History of the Development of Advances in Canopy Research.
- 2. Canopy Access Techniques.
 - 2.1. Introduction.
 - 2.2. Advantages of Current Methods of Canopy Access.
 - 2.3. Long Term, Collaborative Canopy Research.
 - 2.4. Future Directions for Canopy Access.
- 3. Case Studies of Critical Canopy Questions.
 - 3.1. Sessile Organisms.
 - 3.2. Mobile Organisms.
 - 3.3. Canopy Processes and Interactions.
 - 3.4. Canopy Education Outreach.
- 4. Future Directions.
- 5. Conclusions.

Natural History of Amazon Fishes **113**
 Lucelia Nobre Carvalho and Jansen Zuanon, *Coordenacao de Pesquisas em Biologia Aquatica, Instituto Nacional de Pesquisas da Amazônia, Brazil*
 Ivan Sazima, *Departamento de Zoologia and Museu de Historia Natural, Universidade Estadual de Campinas, Brazil*

- 1. Introduction
- 2. Main aquatic environments of the Amazon
- 3. Fish diversity and community structure
- 4. Time and space: activity periods, territoriality, and resource partitioning among fishes
- 5. Reproduction: different responses to environmental factors
- 6. Feeding tactics, trophic specializations, and ecological interactions

7. Predator-prey interactions: taking the chances
8. Defense by disguise: dealing with risks posed by visually guided predators
9. Conclusions and perspectives

The danger of introducing bee species, A case study on Brazilian Tropical Savanna

145

Helena Maura Torezan Silingardi, *InBio, Universidade Federal de Uberlândia, Uberlândia, MG, Brazil; FFCLRP, Universidade de São Paulo, Ribeirão Preto, SP, Brazil.*

1. Introduction
2. Material and Methods
 - 2.1. The Field Area
 - 2.2. The Plant Species
 - 2.3. Floral Biology
 - 2.4. Reproductive Biology
 - 2.5. Floral Visitors
3. Results
 - 3.1. Floral Biology
 - 3.2. Reproductive Biology
 - 3.3. Floral Visitors
4. Discussion and Conclusions

Diversity of Tropical Spiders - Ground-Dwelling Species of Brazilian Savannas

157

Marina Farcic Mineo, *Federal University of Uberlandia, Brazil*
Kleber Del Claro, *Biology Institute, Federal University of Uberlandia, Brazil*

1. Introduction
2. The Araneae order
3. The diversity of spiders
 - 3.1. Web-building Spiders
 - 3.1.1. Orb-weaving Spiders
 - 3.1.2. Tangle-web Weavers
 - 3.1.3. Sheet-web Weavers
 - 3.1.4. Funnel-web Weavers
 - 3.2. Non-web-building Spiders
 - 3.2.1. Jumping Spiders
 - 3.2.2. Cursorial Spiders
 - 3.2.3. Sit-and-wait Spiders
 - 3.3. Considerations
4. Ground-dwelling spiders of Brazilian savannas
 - 4.1. Ground-dwelling Spiders
 - 4.2. The Brazilian Savannas
 - 4.3. Methods
 - 4.4. Results and Discussion
5. Conclusion

Natural History and Social Behavior in Neotropical Pseudoscorpions

177

Everton Tizo-Pedroso, *Universidade Federal de Uberlandia, Programa de Pos-graduação em Ecologia e Conservação de Recursos Naturais, CP 593, Cep 38400-902, Uberlandia, MG, Brasil.*
Kleber Del-Claro, *Universidade Federal de Uberlandia, Instituto de Biologia, CP 593, Cep 38400-902, Uberlandia, MG, Brasil.*

1. Introduction
 - 1.1. What we know about the Order *Pseudoscorpiones*?
 - 1.2. Predatory Behavior and Feeding Habits
 - 1.3. Reproductive Behavior

- 1.4. Development, Life Cycle and Parental Care
- 1.5. Living Together
2. The Social Pseudoscorpions
 - 2.1. Distribution and Occurrence of the Social Pseudoscorpion Species
 - 2.2. Colony Structure, Growth and Division
 - 2.3. Forage and Feeding Habits of Social Pseudoscorpions
 - 2.4. Cohesion and Cooperation
 - 2.5. Parental Care
3. New Directions

Natural History of Tropical Parasitoid Wasps

M. O. Gonzaga, *Instituto de Biologia, Universidade Federal de Uberlândia*

194

1. What is a Parasitoid?
2. Life Histories
3. Host Location
4. Host Selection and Acceptance
5. Variation in Natural History and Study Cases
 - 5.1. Ichneumonidae and Braconidae
 - 5.2. Scelionidae
 - 5.3. Mutillidae
 - 5.4. Non-pollinating Fig Wasps
 - 5.5. Ampulicidae
6. Host behavior Manipulation
