

CONTENTS

OCEANOGRAPHY

Oceanography - Volume 1

No. of Pages: 508

ISBN: 978-1-905839-62-9 (eBook)

ISBN: 978-1-84826-962-0 (Print Volume)

Oceanography - Volume 2

No. of Pages: 360

ISBN: 978-1-905839-63-6 (eBook)

ISBN: 978-1-84826-963-7 (Print Volume)

Oceanography - Volume 3

No. of Pages: 378

ISBN: 978-1-905839-64-3 (eBook)

ISBN: 978-1-84826-964-4 (Print Volume)

CONTENTS

VOLUME I

Oceanography	1
Jacques C. J. Nihoul, <i>University of Liège, GHER, B5 Sart Tilman, B-4000 Liège, Belgium</i> Chen-Tung Arthur Chen, <i>Institute of Marine Geology and Chemistry, National Sun Yat-sen University, Taiwan, R.O.C.</i>	

1. Introduction
2. The Oceans
3. Physical Oceanography
4. Chemistry of the Oceans
5. Biology of the Oceans
6. Geology of the Oceans
7. Coral Reef Studies
8. Human Uses of Oceans
9. Ocean Engineering
10. Ocean Modeling

The Oceans	36
Chen-Tung Arthur Chen, <i>Institute of Marine Geology and Chemistry, National Sun Yat-sen University, Taiwan, R.O.C.</i>	

1. Introduction
2. History of Oceanic Research
3. The Open Oceans
4. Continental Margins and Marginal Seas
5. Role of the Oceans in the Global Cycles of Carbon and Nutrients
6. Role of the Oceans in the Global Climate System
7. Related Legal Issues

The Open Oceans	59
Chen-Tung Arthur Chen, <i>Institute of Marine Geology and Chemistry, National Sun Yat-sen University, Taiwan, R.O.C.</i>	

1. Introduction
2. Physical Parameters
3. Geological Parameters
4. Biological Parameters

Continental Margins and Marginal Seas	79
Chen-Tung Arthur Chen, <i>Institute of Marine Geology and Chemistry, National Sun Yat-sen University, Taiwan, R.O.C.</i>	

1. Introduction
2. Physical Parameters
3. Biological Parameters
4. Land-Ocean Interactions

Role of the Oceans in Global Cycles of Carbon and Nutrients	99
Chen-Tung Arthur Chen, <i>Institute of Marine Geology and Chemistry, National Sun Yat-sen University, Taiwan, R.O.C.</i>	

1. Introduction
2. The Great Conveyor Belt
3. Carbon and Nutrient Cycles
4. The Excess CO₂ Budget in the Global Oceans
5. Teleconnections between Marginal Seas

Role of the Oceans in the Global Climate System **118**

Chen-Tung Arthur Chen, *Institute of Marine Geology and Chemistry, National Sun Yat-sen University, Taiwan, R.O.C.*

1. Introduction
2. Spatial Variations
3. Temporal Variations
4. Feedback

Physical Oceanography **135**

John M. Huthnance, *Proudman Oceanographic Laboratory, UK*

1. Other Aspects of Physical Oceanography
2. Inter-relations
 - 2.1. Inter-relations – Ocean and Shelf-sea
 - 2.2. Inter-relations – Processes and Phenomena

Seawater Properties, Water Masses, and Global Scale Currents **140**

Jacques C.J. Nihoul, *University of Liege, Belgium*

1. Chemical Physics of Sea Water
2. Global Scale Surface Currents and Thermohaline Circulation
3. Smaller Scale Processes and Observable Current Fields

Air-Sea Interactions **145**

Jacques C.J. Nihoul, *University of Liege, Belgium*

Francois C. Ronday, *University of Liège, Belgium*

1. Introduction
2. Wind waves
3. Air-Sea Interactions

Waves in the Oceans **153**

Wolfgang Fennel, *Institut für Ostseeforschung Warnemünde (IOW) an der Universität Rostock, Germany*

1. Introduction
2. Basic Equations
3. Gravity Waves at the Sea Surface
 - 3.1. Free Waves
 - 3.2. Energy Considerations
 - 3.3. Deep Water Waves
 - 3.4. Shallow Water Waves
 - 3.5. Generation and Prediction of Wind Waves
4. Internal Waves
5. Inertial Waves
 - 5.1. Free Inertial Waves

- 5.2. Inertial Waves and Geostrophic Adjustment
- 6. Kelvin Waves
 - 6.1. Free Kelvin Waves
 - 6.2. Forced Kelvin Waves
 - 6.3. More General Coastal and Shelf Waves
- 7. Rossby Waves
 - 7.1. Free Rossby Waves
 - 7.2. Forced Rossby Waves
- 8. Equatorial Waves
 - 8.1. Free Equatorial Waves
 - 8.2. The Role of Equatorial Trapped Waves

Sea - Ice Interactions**197**J. E. Weber, *Department of Geophysics, University of Oslo, Norway*

- 1. Introduction
- 2. Sea Ice Formation
- 3. Distribution of Sea Ice
 - 3.1. Ice in the Arctic and Adjacent Seas
 - 3.2. Sea Ice in Antarctica
- 4. Growth of Sea Ice
- 5. Salt-driven Convection Beneath Growing Sea Ice
- 6. Ice Drift Modelling
- 7. Ocean Wave - Sea Ice Interaction
- 8. Wind-induced Upwelling at an Ice Edge
- 9. Processes at the Antarctic Ice Shelves

Synoptic/Mesoscale Processes**220**John M. Huthnance, *Proudman Oceanographic Laboratory, UK*

- 1. Introduction
- 2. Dynamics
 - 2.1. Origin, Forcing
 - 2.2. Length and Time Scales, and Propagation
- 3. Statistics (spectra, dependence on latitude)
- 4. Regional Characteristics
 - 4.1. Western Boundary Currents
 - 4.2. Eastern Boundary Currents
 - 4.3. Atlantic Interior
 - 4.4. Pacific
 - 4.5. Mediterranean
 - 4.6. Arctic
 - 4.7. Southern Ocean
 - 4.8. Tropical and Equatorial Regions
- 5. Effects
 - 5.1. Effective Diffusivity
 - 5.2. Advection
 - 5.3. Rectification (against slope)
 - 5.4. Transports – Momentum
 - 5.5. Transports – Contents
 - 5.6. Divergence and Surface Nutrients
 - 5.7. Dispersion and Mixing Effects on Plankton
 - 5.8. Acoustics

Fronts and Mixing Processes**237**

A.I. Ginzburg, *P.P. Shirshov Institute Oceanology, Russian Academy of Sciences, Moscow, Russia*
 A.G. Kostianoy, *P.P. Shirshov Institute Oceanology, Russian Academy of Sciences, Moscow, Russia*

1. Introduction
2. Frontal Zones and Fronts
 - 2.1. Manifestation of Fronts at the Ocean Surface
 - 2.2. Definitions, Terminology
 - 2.3. Methods of Frontal Research
 - 2.4. The variety of Frontal Zones and Fronts
 - 2.4.1. Classification of Frontal Zones and Fronts
 - 2.4.2. The Frontal Zone of the Gulf Stream
 - 2.4.3. The Frontal Zone between Shelf and Slope Waters in the North Western Atlantic
 - 2.4.4. The Frontal Zones of Coastal Upwelling
 - 2.4.5. The Marginal Ice Frontal Zones
3. Persistence and Instability of Fronts
4. Cross-frontal Water Exchange
5. Biological Productivity and Frontal Phenomena
6. Conclusions

Coastal Oceanography**268**

Christopher N.K. Mooers, *University of Miami, Florida, USA*

1. Introduction
 - 1.1. Definition
 - 1.2. General Nature
 - 1.3. Importance
2. Some Dynamical Factors
 - 2.1. Variable Bottom Topography and Its Effects
 - 2.2. Density Stratification and Earth Rotation and Their Effects
3. Phenomena
4. Processes
5. The Way Ahead
 - 5.1. Where We Stand
 - 5.2. Where We Must Head
 - 5.3. Where This Will Lead

Chemistry of the Oceans**282**

Chen-Tung Arthur Chen, *Institute of Marine Geology and Chemistry, National Sun Yat-sen University, Taiwan, R.O.C.*

1. Introduction
2. General Chemistry of Seawater
3. Nutrients Cycling in the Oceans
4. Carbonate Chemistry of the Oceans
5. Natural and Anthropogenic Radionuclides
6. Human Perturbations
7. Non-Radioactive Ocean Pollution

General Chemistry of Seawater**302**

Chen-Tung Arthur Chen, *Institute of Marine Geology and Chemistry, National Sun Yat-sen University, Taiwan, R.O.C.*

1. Introduction
2. Physical Parameters

3. Chemical Composition
4. Dissolved Gases
5. Organic Material
6. Hydrothermal Vents

Nutrient Cycling in the Oceans

328

Chen-Tung Arthur Chen, *Institute of Marine Geology and Chemistry, National Sun Yat-sen University, Taiwan, R.O.C.*

1. Introduction
2. Nitrogen
3. Phosphorus
4. Silicon
5. Iron
6. Continental Shelves

Carbonate Chemistry of the Oceans

341

Chen-Tung Arthur Chen, *Institute of Marine Geology and Chemistry, National Sun Yat-sen University, Taiwan, R.O.C.*

1. Introduction
2. Carbon Dioxide and Carbonate System
3. Carbon Cycle
4. Carbonate Sedimentation

Natural and Anthropogenic Radionuclides

356

Chen-Tung Arthur Chen, *Institute of Marine Geology and Chemistry, National Sun Yat-sen University, Taiwan, R.O.C.*

Yu-Chia Chung, *National Sun Yat-Sen University, Taiwan*

1. Introduction
2. Natural Radionuclides
 - 2.1. Uranium-238 and its Decay Products
 - 2.1.1. Radium-226
 - 2.1.2. Radon-222
 - 2.1.3. Lead-210 and Polonium-210
 - 2.1.4. Thorium-234/Uranium-238 Disequilibrium
 - 2.1.5. Thorium-230/Uranium-234 Disequilibrium
 - 2.1.6. Lead-210/Radium-226 Disequilibrium
 - 2.1.7. Thorium-230 Geochronology
 - 2.1.8. Lead-210 Geochronology
 - 2.2. Thorium-232 and its Decay Products
 - 2.2.1. Radium-228
 - 2.2.2. Thorium-228/Radium-228 Disequilibrium
 - 2.3. Uranium-235 and its Decay Products
 - 2.3.1. Protactinium-231/ Thorium-230 Geochronology
 - 2.4. Cosmic-ray Produced Nuclides
 - 2.4.1. Tritium
 - 2.4.2. Beryllium-7
 - 2.4.3. Carbon-14
 - 2.4.4. Phosphorus-32 and Phosphorus-33
3. Anthropogenic Radionuclides
 - 3.1. Tritium and Carbon-14
 - 3.2. Heavy Radionuclides
 - 3.2.1. Strontium-90 and Cesium-137

- 3.2.2. Plutonium
- 3.2.3. Bioaccumulation
- 4. Conclusions

Human Perturbations **386**
 Chen-Tung Arthur Chen, *Institute of Marine Geology and Chemistry, National Sun Yat-sen University, Taiwan, R.O.C.*

- 1. Introduction
- 2. Nutrients
- 3. Carbon Dioxide
- 4. Continental Margin Studies

Non-Radioactive Ocean Pollution **407**
 Chen-Tung Arthur Chen, *Institute of Marine Geology and Chemistry, National Sun Yat-sen University, Taiwan, R.O.C.*

- 1. Introduction
- 2. Trace Metals
- 3. Pesticides and Organic Compounds
- 4. Sewage
- 5. Temporal Trend
- 6. Conclusions

Index **431**

About EOLSS **437**

VOLUME II

Biological Oceanography **1**
 Louis Legendre, *Laboratoire d'Océanographie de Villefranche, France*
 Fereidoun Rassoulzadegan, *Laboratoire d'Océanographie de Villefranche, France*

- 1. Introduction
 - 1.1. The Marine Living Organisms
- 2. Organic Matter in the Sea
 - 2.1. Dissolved and Particulate Organic Matter
 - 2.2. Origin and Fate of Dissolved Organic Matter
- 3. Functional Groups of Marine Pelagic Organisms
 - 3.1. Ecological Groupings of Marine Organisms
 - 3.2. Functional Groups of Pelagic Organisms
 - 3.3. Remarkable Features
- 4. Effects of Ocean Physics and Light
 - 4.1. Carbon dioxide
 - 4.2. Inorganic Nutrients
 - 4.3. Dissolved Organic Matter
 - 4.4. Marine Snow
 - 4.5. Phytoplankton
 - 4.6. Microheterotrophs
 - 4.7. Mesozooplankton
 - 4.8. Planktonic Larvae of Nekton
 - 4.9. Large Organisms

5. Effects of Inorganic and Organic Substances on Marine Organisms
 - 5.1. Carbon Dioxide
 - 5.2. Inorganic Nutrients
 - 5.3. Dissolved Organic Matter
 - 5.4. Marine Snow
6. Effects of Marine Organisms on Inorganic and Organic Substances
 - 6.1. Viruses
 - 6.2. Phytoplankton
 - 6.3. Microheterotrophs
 - 6.4. Mesozooplankton
 - 6.5. Large Pelagic Organisms
 - 6.6. Deep Benthos
 - 6.7. Downward Export
7. Interactions Among Groups of Marine Organisms
 - 7.1. Viruses
 - 7.2. Phytoplankton
 - 7.3. Microheterotrophs
 - 7.4. Mesozooplankton
 - 7.5. Large Microphages
 - 7.6. Macroplankton
 - 7.7. Fish Larvae
 - 7.8. Adult Fish (up to 3 m long)
 - 7.9. Large Nekton (longer than 3 m)
 - 7.10. Deep Benthos
8. Pelagic Food Webs
 - 8.1. The Trophic Continuum
 - 8.2. Herbivorous Food Web
 - 8.3. Multivorous Food Web
 - 8.4. Microbial Food Web
 - 8.5. Microbial Loop
 - 8.6. Consequences
9. Perspectives

Oceans as Major Reservoirs of Protein

35

M. Robin Anderson, *Northwest Atlantic Fisheries Centre, Fisheries and Oceans Canada, Canada*
 Richard B. Rivkin, *Ocean Sciences Centre, Memorial University of Newfoundland, Canada*

1. Introduction
2. Oceanic Primary Production
3. Capture Fisheries
 - 3.1. Current Production and Trends of Marine Fisheries
 - 3.2. Potential Production of Marine Fisheries
 - 3.3. Environmental Risks of Marine Fisheries
4. Marine Aquaculture
 - 4.1. Current Production and Trends of Marine Aquaculture
 - 4.2. Potential Production of Marine Aquaculture
 - 4.3. Environmental Risks of Marine Aquaculture
5. Oceans as a Source of High-Quality Protein
 - 5.1. Potential for Human Nutrition
 - 5.1.1. Benefits
 - 5.1.2. Risks
 - 5.2. Potential for High Quality Animal Feeds
 - 5.2.1. Benefits
 - 5.2.1.1. Fishmeal for Aquaculture
 - 5.2.1.2. Fishmeal for Terrestrial Livestock
 - 5.2.2. Risks
6. Conclusions

Marine Biogeochemical Cycles: Effects on Climate and Response to Climate Change 52
 Gattuso, Jean-Pierre, *Laboratoire d'Océanographie de Villefranche, CNRS-UPMC, B. P. 28, F-06234 Villefranche-sur-mer Cedex, France.*

1. Introduction
2. Carbon and Carbonate Cycles
 - 2.1. Carbon Cycle
 - 2.2. Carbonate Cycle
3. Interaction with the Nutrient Cycles
 - 3.1. Nitrogen and Phosphorus
 - 3.2. Iron
4. Interactions with Climate and Environmental Changes
 - 4.1. Solubility Pump
 - 4.2. Physical Pump
 - 4.3. Biological Pump
 - 4.4. Carbonate Pump
5. Conclusions and Perspectives

Marine Biodiversity 71
 Brunel, Pierre, *Département de Sciences Biologiques, Université de Montréal, Canada*

1. Four Kinds of Biodiversity on Our Planet
 - 1.1. Species Biodiversity
 - 1.2. High-level Taxonomic Biodiversity
 - 1.3. Genetic Biodiversity
 - 1.4. Ecological Biodiversity
2. How do we Know About Biodiversity?
3. Species Biodiversity in the Oceans
4. High-level Marine Biodiversity
5. Ecological Marine Biodiversity
 - 5.1. Biogeography
 - 5.2. Marine Ecosystems
6. Genetic Marine Biodiversity
7. Marine Biodiversity in Danger

Models and Functioning of Marine Ecosystems 88
 T. Frede Thingstad, *Professor, marine microbiology, University of Bergen, Department of Microbiology, P.O. Box 7800, 5020 Bergen, Norway*
 Jarl Giske, *Professor, marine ecological modelling, University of Bergen, Department of Fisheries and Marine Biology, P.O. Box 7800, 5020 Bergen, Norway*

1. Introduction
2. Bacteria, their viral parasites, and their protozoan predators
3. Adding a phytoplankton competitor to the bacteria
4. Opening the model to export and import
5. The concept of characteristic time scales and hierarchical dynamic systems
6. Adding a diatom-copepod food chain
7. Higher trophic levels
 - 7.1. Individual-based models
 - 7.2. Modelling motivation for behaviour
 - 7.3. Approaches to behavioural modeling
8. A full ecosystem model?

Littoral Zone **106**
 Duarte, Carlos M, *IMEDEA (CSIC-UIB), Instituto Mediterráneo de Estudios Avanzados, CSIC-Univ. illes Balears, Spain.*

1. Introduction
2. The Extent of the Littoral Zone
3. Types of Primary Producers in the Littoral Zone
4. Littoral Ecosystems
5. The Functions of the Littoral Zone
6. The Value of the Littoral Zone to Society
7. Threats to the Littoral Zone

Deep Sea Benthos, Contrasting Ecosystems **115**
 Lucien Claude Laubier, *Oceanology Center of Marseilles, University of the Mediterranean, France*

1. Introduction: The Exploration of the Depths
2. In the Reign of Zoology
3. New Technologies
 - 3.1. Underwater Photography
 - 3.2. Bathysphere and Bathyscaphs
 - 3.3. Deep Sea Submarines
 - 3.4. Remotely Operated Vehicles
4. Functional Ecology, Trophic Levels and Biology
 - 4.1. Particle Feeders
 - 4.2. Carnivores and Scavengers
5. Communities Based on Chemolithotrophy
 - 5.1. Hydrothermal Vents Communities
 - 5.2. Cold Seeps Communities
 - 5.3. Organic-rich Whale Falls and Wrecks
6. Deep-sea Biodiversity
7. Abyss and the Origin of Life
8. Conclusion

Geological Oceanography: Introduction and Historical Perspective **129**
 Min-Te Chen, *National Taiwan Ocean University, Keelung 20224, Taiwan, R.O.C.*

1. Introduction
2. History and Development of Marine Geological Exploration
3. Ocean Drilling Investigation on the Sea-Floor
4. Dynamic Geo-marine Environment

Morphology of Ocean Floor and Plate Tectonics **147**
 Chengsung Wang, *National Taiwan Ocean University, Keelung 20224, Taiwan, R.O.C.*

1. Introduction
2. Principle Provinces of Sea Floor
3. Continental Drift, Sea-Floor Spreading and Plate Tectonics
4. Major Morphological Features
 - 4.1. Continental Margins
 - 4.2. Mid-Ocean Ridges
 - 4.3. Deep-Ocean Floors

Seismic Imaging in the Oceans **162**
 Tan K. Wang, *National Taiwan Ocean University, Keelung 20224, Taiwan, R.O.C.*

1. Introduction
2. Seismic Wave Propagation
3. Seismic Data Acquisition
 - 3.1. Multi-Channel Seismic (MCS) Survey - 4D ($x, y, z, time$) reflected data
 - 3.2. Ocean-Bottom Seismometer (OBS) and Ocean-Bottom Cable (OBC) - 4D + 4C data
 - 3.3. Two-Ship Seismic Survey - 4D reflected and refracted data
4. Processing of Reflected Data
 - 4.1. Gathering of Common-Depth Points (CDP)
 - 4.2. Velocity Analysis
 - 4.3. Migration
5. Processing of Refracted Data
 - 5.1. Travel-time Inversion
 - 5.2. Tomography
6. Visualization of 3D Geological Structures
 - 6.1. Seismic Coherence
 - 6.2. Virtual Reality

Mining and Oil Exploration in the Oceans and Seas

174

Shari Dunn-Norman, *University of Missouri-Rolla, USA*

Chao-Shine Lee, *National Taiwan Ocean University, China*

1. Introduction
2. Occurrence of Hydrocarbons in Oceans and Seas
 - 2.1. Occurrence of Hydrocarbons Reservoirs
 - 2.1.1. Source Rocks and the Generation of Hydrocarbons in the Subsurface
 - 2.1.2. Reservoir Rocks, Depositional Systems and Hydrocarbon Traps
 - 2.1.3. Characteristics of Reservoir Rocks
3. Exploiting Hydrocarbon Resources in the Oceans and Seas
 - 3.1. Surveying and Offshore Leasing
 - 3.2. Exploration
 - 3.3. Developing and Producing Offshore Oil and Gas Fields
 - 3.4. Trans-shipment and Storage
 - 3.5. Abandonment Issues
4. Occurrence of Minerals in the Oceans and Seas
 - 4.1. Mineral Depositional Systems
 - 4.1.1. Hydrothermal Depositional Systems
 - 4.1.2. Marine Placer Deposits
 - 4.1.3. Manganese Nodule Deposits
 - 4.2. Mineral Extraction
5. Future Directions in Hydrocarbon and Mineral Extraction in the Seas
 - 5.1. Oil and Gas
 - 5.2. Minerals
 - 5.3. Natural Gas Hydrates

Coral Reefs as a Life Supporting System

195

Lee-Shing Fang, *National Museum of Marine Biology and Aquarium, Pin-tong Taiwan*

Keryea Y. Soong, *National Sun Yat-Sen University, Kaohsiung, Taiwan*

1. Introduction
2. The natural history of coral reefs
 - 2.1. Distribution of corals and coral reefs
 - 2.2. Types of Reefs
 - 2.3. Food of Corals
 - 2.4. Light and Corals
 - 2.5. Growth of Corals
 - 2.6. Age of Corals

- 2.7. Reproduction of Corals
- 2.8. Predators of Corals
- 2.9. Competition in Coral Reefs
- 2.10. Biodiversity and Productivity
- 3. Nutrients in coral reefs
- 4. Mass bleaching of corals
- 5. Social and Humanity
 - 5.1. Historical Interaction with Human Society
 - 5.2. Coral Reef Utilization in Modern Days
 - 5.3. Coral as Jewelry
- 6. Policy Making of Coral Reef Management
- 7. The Future of Coral Reefs

Coral Reef Ecosystems: An Overview of their Structure and Function

211

John M.R. Chisholm, *Director of Research, Scientific Centre of Monaco, Monaco*

- 1. Introduction
- 2. Reef structure, composition and function
 - 2.1. Carbon metabolism
 - 2.2. Inshore-offshore gradients in environmental conditions and reef communities
 - 2.3. Disturbance
 - 2.4. Recruitment
 - 2.5. The food chain
- 3. Threats to the chain

Biological Dynamics of Coral Reefs

225

Tung-Yung Fan, *National Museum of Marine Biology and Aquarium, Pingtung 944, Taiwan, R.O.C.*
 Chang-Feng Dai, *Institute of Oceanography, National Taiwan University, Taipei 106, Taiwan, R.O.C.*

- 1. Introduction
- 2. Population Dynamics of Branching Corals
 - 2.1. Pocilloporid Corals
 - 2.2. Acroporid Corals
- 3. Population Dynamics of Foliose Corals
- 4. Predation on Corals
 - 4.1. The Crown-of-thorns Starfish
 - 4.2. Sea Urchins
- 5. Phase Shift of Coral Communities in Jamaica
- 6. Conclusions

Coral Reef Biodiversity

236

Zvy Dubinsky, *Bar-Ilan University, Israel*

- 1. Introduction: Highly Diverse Community
- 2. Invertebrates
 - 2.1. Coelenterates
 - 2.2. Polychaeta
 - 2.3. Mollusks
 - 2.4. Echinoderms
 - 2.5. Crustaceans
- 3. Fishes
- 4. Other reef organisms

The Productivity of Corals	257
Angela E. Douglas, <i>University of York, York, UK</i>	

1. Introduction
2. Zooxanthellae: The Primary Producers in Corals
3. Factors Influencing the Rates of Photosynthesis by Zooxanthellae
 - 3.1. Irradiance
 - 3.2. Temperature
 - 3.3. Nutrients
4. The Fate of Zooxanthella Primary Production
 - 4.1. At the Scale of the Coral Colony
 - 4.2. At the Scale of the Reef
5. Conclusions: Zooxanthella Productivity and Reef Exploitation

Effects of Climate Change on Coral Reefs	269
Ove Hoegh-Guldberg, <i>Centre for Marine Studies, The University of Queensland, Australia</i>	

1. Introduction
2. Climate change in tropical regions
3. Coral reefs as vulnerable ecosystems
4. Sea temperature and coral bleaching
5. Calcification rates and the Aragonite Saturation State
6. Sea level rise
7. Downstream effects of climate change on coral reef ecosystems
8. Interactions with other human related stresses
9. How will coral reefs respond?

Index	281

About EOLSS	289
--------------------	------------

VOLUME III

Human Uses of the Oceans	1
Chen-Tung Arthur Chen, <i>Institute of Marine Geology and Chemistry, National Sun Yat-sen University, Kaohsiung 804, Taiwan, R.O.C.</i>	
Wen-Yan Chiau, <i>Department of Marine and Environment and Engineering, National Sun Yat-sen University, Kaohsiung 804, Taiwan, R.O.C.</i>	

1. Introduction
2. Human Use and Ocean Circulation
3. Ocean Regeneration
4. Coral Reef Regeneration
5. Management Options for Ocean Conservation
6. International Cooperation

Human Use and Ocean Circulation	22
Chiau, W.Y., <i>Associate Professor, Department of Marine and Engineering, National Sun Yat-sen University, Kaohsiung, Taiwan</i>	

1. Introduction
2. Marine Living Resources
 - 2.1. Oceans as a Source of Food
 - 2.2. Extraction and Synthesis of Useful Materials

- 2.3. Potential Benefits of Marine Biodiversity
- 3. Marine Non-living Resources
 - 3.1. Oil and Gas
 - 3.2. Extraction of Other Minerals and Elements
 - 3.3. Power Generation
 - 3.4. Water Resources
- 4. Transportation and Communications
- 5. Tourism and Recreation
- 6. Reclamation for Economic Development
- 7. Waste Disposal
- 8. Key Issues of Ocean Use Management
 - 8.1. Unsustainable Use of Marine Resources
 - 8.2. Ocean Circulation and Cross-boundary Impact
 - 8.3. Integrated Ocean and Coastal Management
- 9. Conclusions

Ocean Regeneration

34

Wen-Yan Chiau, *Associate Professor, Department of Marine Environment and Engineering, National Sun Yat-sen University, Kaohsiung, Taiwan*

- 1. Introduction
- 2. Developing Ocean Regeneration Plans
- 3. Restoring Degraded Habitats
- 4. Stocking Fingerlings
- 5. Establishing Artificial Habitats
- 6. Promoting Sustainable Fishing
- 7. Enhancing Marine Environment Quality
- 8. Facilitating the Co-management of the Marine Environment in the 21st Century

Coral Reef Regeneration

47

Jean M. Jaubert, *Marine Biology at the University of Nice, France*
 Keryea Soong, *Institute of Marine Biology, National Sun Yat-sen University, Kaohsiung, Taiwan*

- 1. Introduction
- 2. The Nature of Coral Reefs
 - 2.1. Description of a Coral Reef
 - 2.2. Propagation of Corals in Nature
- 3. Destruction of Coral Reefs
 - 3.1. Degrading Factors
 - 3.2. Mechanisms of Destruction and their Alleviation
 - 3.2.1. Storms
 - 3.2.2. Over- and Destructive Fishing
 - 3.2.3. Nutrification of the Sea
 - 3.2.4. Excessive Turbidity
 - 3.2.5. Thermal Bleaching
 - 3.2.6. Tourists
 - 3.2.7. Coral Mining and Aquarium Trade
- 4. Coral Reef Regeneration
 - 4.1. Assessing Coral Recruitment
 - 4.2. Natural Recovery
- 5. Restoration of Coral Reefs
 - 5.1. Raising Coral Spats
 - 5.2. Transplantation of Adult Colonies
 - 5.3. Transplantation of Fragments of Corals
- 6. Coral Farming
 - 6.1. Nutrient Control

- 6.1.1. Historical Notes
- 6.1.2. Contemporary Methods
- 6.2. Calcium and Carbonate Control
- 6.3. Lighting
- 6.4. Hydrodynamics
- 6.5. Control of Algae
- 6.6. Pests and Diseases
- 7. Conclusion

Management Options for Ocean Conservation

68

Wen-Yan Chiau, *Department of Marine Environment and Engineering, National Sun Yat-sen University, Kaohsiung, Taiwan*

Chen-Tung Arthur Chen, *Institute of Marine Geology and Chemistry, National Sun Yat-sen University, Kaohsiung 804, Taiwan, Republic of China.*

- 1. Introduction
- 2. International Treaties and Initiatives
- 3. National Oceans Policies
- 4. Legislation and Enforcement
- 5. Environmental Impact Statement
- 6. Integrated Management Plan
 - 6.1. Prohibition
 - 6.2. Restrictions
 - 6.2.1. Spatial Controls
 - 6.2.2. Temporal Controls
 - 6.2.3. Equipment and Operation Restrictions
 - 6.2.4. Quotas
 - 6.2.5. Licensing
 - 6.3. Permits
- 7. Training and Education
- 8. Public-Private Partnership
- 9. Conclusions

Management Options for Coral Reef Conservation

82

Wen-Yan Chiau, *Department of Marine Environment and Engineering, National Sun Yat-sen University, Kaohsiung, Taiwan*

- 1. Introduction
- 2. Importance of Coral Reefs
- 3. Coral Reef Degradation
- 4. Options for Coral Reef Conservation
 - 4.1. Establishment of Marine Protected Areas
 - 4.2. Enhancement of Marine Environmental Quality
 - 4.3. Management of Human Activities
 - 4.4. Implementation of Reef Rehabilitation
 - 4.5. Establishment of Certification System
 - 4.6. Promotion of Public Education and Involvement
- 5. Conclusions

Ocean Engineering

93

Chia Chuen Kao, *National Cheng Kung University, Taiwan*

- 1. Introduction
- 2. Field Measurement and Remote Sensing
 - 2.1. Overview

- 2.2. *In situ* Measurements
- 2.3. Remote Sensing Measurements
- 2.4. Data Quality Control of Field Measurement
- 3. Marine Structures and Materials
 - 3.1. Overview
 - 3.2. Design Criteria of Marine Structures
 - 3.3. Materials
 - 3.4. Future Perspectives
- 4. Naval Architecture
 - 4.1. Overview
 - 4.2. Physical Support Forces
 - 4.3. Utilization Purposes
 - 4.4. Propellers
- 5. Ocean Energy
 - 5.1. Overview
 - 5.2. Solar Energy
 - 5.3. Tidal energy
 - 5.4. Wave energy
 - 5.5. Conclusions
- 6. Mariculture Engineering
- 7. Underwater Acoustic
 - 7.1. Overview
 - 7.2. History of Underwater Acoustics
 - 7.3. Sound Velocity
 - 7.4. Sonar Equations
 - 7.5. Applications
- 8. Harbor and Navigation
 - 8.1. Overview
 - 8.2. Classifications and Functions
 - 8.3. Engineering Design Criteria
 - 8.4. Operational Requirements
 - 8.5. Environmental Effects

Field Measurement

113

Chung-Chu Teng, *National Oceanic and Atmospheric Administration, USA; University of Southern Mississippi, USA*

- 1. Introduction
- 2. *In situ* and Remote Sensing Measurements
- 3. Wave Measurements
- 4. Current Measurements
- 5. Wind Measurements
- 6. Remote Sensing Techniques
- 7. Field Data and Quality Control
- 8. Challenges and Considerations of Field Measurements

Marine Structures and Materials

135

Yucheng Li, *Dalian University of Technology, China*
 Linpu Li, *Dalian University of Technology, China*

- 1. Definition and Catalog of Marine Structures
- 2. Design Criteria and Methods of Marine Structures
 - 2.1. General Requirement for the Design of Marine Structures
 - 2.2. Design Criteria for Marine Structures
 - 2.3. Design Methods for Marine Structures
- 3. The Material for Marine Structures

- 3.1. Steel
- 3.2. Concrete
- 3.3. Rock and Sand
- 4. Trends of Research on Marine Structures

Naval Architecture **146**
 Jen-Shing Kouh, *Professor, Department of Naval Architecture and Ocean Engineering, National Taiwan University, Taiwan*

- 1. Ship Hull
 - 1.1. Ships Classified According to Means of Physical Support
 - 1.2. Ships Classified According to Design Purposes
- 2. Propeller
 - 2.1. Description of Propeller
 - 2.2. Compatibility of Ship Hull, Machinery and Propeller
 - 2.3. Fixed Pitch Propellers (FPP)
 - 2.4. Controllable Pitch Propellers (CPP)
 - 2.5. Ducted Propellers
 - 2.6. Contra-Rotating Propellers (CRP)
 - 2.7. Surface Piercing Propellers (SPP)
 - 2.8. Vertical -Axis Propellers
 - 2.9. Hybrid Propulsor

Ocean Energy **158**
 Kuo-Liang Pan, *Water Resources Bureau, Ministry of Economic Affairs, Taiwan*

- 1. Introduction
- 2. Ocean Thermal Energy Conversion
- 3. Tidal Energy
- 4. Wave Energy
- 5. Current Energy

Mariculture Engineering (Sea Farming Systems) **172**
 Yang-Yih Chen, *National Yat-Sen University, Taiwan*

- 1. Introduction
- 2. Sea Farming Technology Research and Development
- 3. Choosing A Location Requires Experience And Technological Knowledge
 - 3.1. The Fishes' Requirements
 - 3.2. The Authorities' Requirements
 - 3.3. Available Technology
 - 3.4. Economic Requirements
- 4. Sea Farming Technology
 - 4.1. Site selection
 - 4.2. Farm Logistics
 - 4.3. Cage Development
- 5. A New Design for Favorable Tension Leg Net Pen Developed
- 6. Conclusions

Underwater Acoustics **180**
 Gee-Pinn James Too, *National Cheng Kung University, Taiwan*

- 1. An Acoustical View of Oceanography
- 2. The History of Research on Ocean Acoustics

3. Measurement of Speed of Sound
 - 3.1. The Sound Speed Profile
 - 3.2. Propagation Theory
 - 3.3. Applications of Underwater Acoustics
4. Other Applications

Harbors and Navigation**187**Soeren Kohlhasse, *University of Rostock, Germany*

1. Introduction
2. Maritime Transport and Shipping Vessels
3. Loading and Unloading in Seaports
4. Harbor Structures
5. Wave Protection
 - 5.1. General Remarks
 - 5.2. Several Functional and Constructional Aspects

Modeling the Ocean System From A Sustainable Development Perspective**197**Jacques C.J. Nihoul, *GeoHydrodynamics and Environment Research (GHER), University of Liège, Belgium*

1. Introduction
2. Subject and Objectives of a Model
3. The Overall Model's Dimensions
4. A Diversity of Models
5. Hierarchy and Scales
6. Defining Models by their Operant Variables
7. Resolution, Realism and Predictability

Nested Interdisciplinary Three-Dimensional Models of the Marine System**213**Jacques C.J. Nihoul, *GeoHydrodynamics and Environment Research (GHER), University of Liège, Belgium*

1. Introduction
2. Operant State Variables and Evolution Equations of a 3D Interdisciplinary Ocean Model
3. The Hydrodynamic Component
4. Formulation of Flow and Fluxes
5. Formulation of the Production/Destruction Rates
6. Mathematical Forecasting and Mathematical Visualization

Mathematical and Numerical Geohydrodynamic Models**234**Jean-Marie Beckers, *National Fund for Scientific Research, University of Liège, Belgium*

1. Introduction
2. Conservation Equations
3. Preparation for Numerical Resolutions
 - 3.1. Coordinate Changes
 - 3.2. Elementary Notions for Numerical Analysis
 - 3.3. Grid and Resolution Choices
 - 3.4. Parameterizations of Unresolved Features
4. Spatial Discretizations
 - 4.1. Finite Differences
 - 4.2. Finite volumes
 - 4.3. Finite elements

- 4.4. Spectral Element Methods
- 5. Temporal Discretizations
 - 5.1. Two Time Levels
 - 5.2. Three Time Levels
 - 5.3. Fractional Steps
 - 5.4. Mode Splitting
- 6. Staggering
- 7. Critical Parts for Ocean Models
 - 7.1. Advection
 - 7.2. Dynamical Balance
 - 7.3. Open Boundary Conditions
- 8. Other Model Ingredients
 - 8.1. Parallelization, Multi-block Methods
 - 8.2. Data Assimilation
 - 8.3. Analysis tools
- 9. Discussion

Modeling Biogeochemical Processes in Marine Ecosystems **261**

Marilaure Grégoire, *GHER, University of Liege, Sart-Tilman B5, B-4000, Liege, Belgium*

I. Temel Oguz, *METU, Institute of Marine Sciences, P.O. Box 28, Erdemli, 33731, Icel, Turkey*

- 1. Introduction
- 2. General Classification of Biogeochemical Models
- 3. Models Complexity in terms of Food Web Structure
- 4. Physical Controls on Biogeochemical Models
- 5. Inverse Approaches In Biogeochemical Modeling
- 6. Regional Applications of Coupled Physical-Biogeochemical Models
 - 6.1. Models for Open Ocean Studies and Basin Scale Applications
 - 6.2. Models for Coastal Regions and Shelf Seas
 - 6.3. Models Embedded in Global Ocean Carbon Cycle Studies
