Preface

xiv

### VOLUME I

**Global Transformations and World Futures: Knowledge, Economy, and Society** **1**  
Sohail Tahir Inayatullah, *Tamkang University, Taiwan; University of the Sunshine Coast, Maroochydore, Australia, and Queensland University of Technology, Brisbane, Australia*

1. Introduction
2. Globalization
3. Epistemic Transformations
  - 3.1. Nature transformation
  - 3.2. Truth transformation
  - 3.3. Reality transformation
  - 3.4. Human transformation
4. Scenarios of the future
  - 4.1. The globalized artificial society
  - 4.2. The communicative-inclusive society
  - 4.3. Continued growth/business as usual
  - 4.4. Societal collapse
5. Structure of Transformation
6. A Post-Globalization Model of the Future
7. Conclusion

**Global Transformations in Knowledge - Social and Cultural Issues** **25**  
Gregory Hearn, *Queensland University of Technology, Brisbane, Australia*

1. Introduction
2. Why this Talk of a Knowledge Economy?
3. Suggestions for Enacting Knowledge Systems
4. What is Knowledge?
5. The Problem of Globalization
6. Inequity in the Distribution of Knowledge
7. The Global Commodification of Knowledge
8. On Change in the Global Knowledge System
9. Conclusion

**Global Science** **45**  
David Rooney, *University of Queensland, Brisbane, Australia*

1. Introduction
2. The Lessons of History
  - 2.1. A Brief Cultural History of Western Science
3. Imperial Science
4. Global Science and Sustainability

**Non-Western Science - Mining Civilizational Knowledge** **56**  
Susantha Goonatilake, *Center for the Study of Social Change, New School for Social Research, New York and at Vidyartha, Colombo, Sri Lanka*

1. Civilizational Knowledge

2. The European Classical Period
3. Arab and Other Transmissions
4. Independent "Modern" Discoveries
5. Mining: Illustrative Examples
  - 5.1. Medicine
  - 5.2. Psychology
  - 5.3. Cognitive Sciences and Artificial Intelligence
  - 5.4. Mathematics and Physics
6. Some Speculative Possibilities
7. Social Theory for New Technologies
8. Using Metaphors
9. Some Potentials
10. Some Estimates
11. Conclusion

**Global Management of Knowledge Systems**

**81**

David Rooney, *University of Queensland, Brisbane, Australia*

1. Introduction
2. Knowledge and Information
  - 2.1. Economic Dynamics of Knowledge
  - 2.2. Communication of Knowledge
3. Operational Framework for Knowledge

**Transformations of Information Society**

**94**

Ian Miles, *University of Manchester, UK*

1. Introduction
2. Making Sense of Information Technology and Information Society
3. Evolutionary Stages of Information Society
  - 3.1. Phase 1: "Islands"
  - 3.2. Phase 2: "Archipelago"
  - 3.3. Phase 3: "Continent"
  - 3.4. Phase 4: "Ecosystem"
  - 3.5. Phases of Information Society
4. E-commerce

**From the Information Era to the Communicative Era**

**118**

Sohail Tahir Inayatullah, *Tamkang University, Taiwan; University of the Sunshine Coast, and Queensland University of Technology, Australia*

1. Introduction
2. The Great Leap Forward
3. Sharing Meaning or Watching Sit-coms
4. Cultural Perspectives on Immediacy and Distance
5. Access to Global Conversations
6. The Politics of Conversations and the Information Era
7. A Real Information Society
8. A Gaia of Civilizations

**Building "Real" and "Virtual" Human Communities in the Twenty-first Century**

**137**

Ingrid Burkett, *University of Queensland, Brisbane, Australia*

1. Introduction

2. Back to the Futures: From Gemeinschaft to Global Village and a Lasting Nostalgia
  - 2.1. Facing the Postmodern Challenges of Conceptualizing and Building Community in the Twenty-first Century
3. The Challenge of Globalization: The End of "Local" Community, or the Reinvention of Space and Place?
  - 3.1. What is Globalization?
    - 3.1.1. Technological Globalization
    - 3.1.2. Economic Globalization
    - 3.1.3. Political Globalization
    - 3.1.4. Cultural Globalization
    - 3.1.5. Psychosocial Globalization
  - 3.2. Globalizing the "Local" Community: The Paradox of Global Localization
  - 3.3. Globalization and the Challenge of Reexamining Territorial Community
4. The Challenge of the "Virtual Community": Does Technology Mean the Demise of "Real" Community?
  - 4.1. What is "Virtual" and a "Virtual Community"?
  - 4.2. The Objectification and Externalization of Community
  - 4.3. Technology and the Avoidance of the Subject of Community
5. The Challenge of the Commodification Imperative: Has "Community" Become "Commodity"?
  - 5.1. Globally Imagined Communities: Challenges of "Product Centered Community"
  - 5.2. Globally Simulated Communities: Communities of and for Consumption
  - 5.3. Commodification and the Amnesia of the Margins: The "New" Opium of the Masses?
6. Communities of the Twenty-first Century: Some Signposts for Multiple Realities in a Complex World
  - 6.1. Signpost One: Process is Paramount: Community is a "Verb"—not a "Noun"
  - 6.2. Signpost Two: Communal Psyches: Community is about a Dialogue between Self and Other
  - 6.3. Signpost Three: Differing Ways: Community is not Common Unity
  - 6.4. Signpost Four: Not Knowing but Becoming: Community as Magical Mystery

**Navigating Globalization through Info-design, an Alternative Approach to Understanding Cyberculture**

159

Sylvia Austerlic, *Santa Cruz, CA 95060, USA*

1. Introduction
2. A Culture of Design
3. Technology, Globalization, and the New World Order
4. Cultural Impacts of Cyberspace
5. The Internet and the Modern Project
6. Valuing Biodiversity and Local Knowledge
7. Giving Voice to New Actors
8. Info-Design and World-making Skills
9. Information and Communication Technology, Sustainability, and Community-making
10. Design Education and its Orientation towards the Future

**The Global Economy**

179

Gillian Youngs, *University of Leicester, UK*

1. Introduction
  - 1.1. Human Development
  - 1.2. The Dynamics of Capitalism
  - 1.3. The Twentieth Century
  - 1.4. Foreign Direct Investment (FDI)
2. Frameworks for Understanding
  - 2.1. States and Markets
  - 2.2. Gramscian Critiques
  - 2.3. Global Civil Society

- 2.4. North and South
- 2.5. Gender
- 3. Market Factors
  - 3.1. Exports
  - 3.2. Transnational Corporations
  - 3.3. Finance
  - 3.4. Migration
- 4. Technology and Change
  - 4.1. Fordism
  - 4.2. Flexibility and Globalization
  - 4.3. The Service Era
  - 4.4. The Media Boom
  - 4.5. The Digital Economy
- 5. Inequalities
  - 5.1. Growing Gaps
  - 5.2. Disadvantaged Groups
- 6. Conclusion
  - 6.1. The Rights Agenda
  - 6.2. Responsibility and Accountability
  - 6.3. Reflexivity and Capitalism
  - 6.4. Economic Democracy

**Multinational Corporations**

203

Jeffrey W. J. Harrod, *University of Amsterdam, The Netherlands*

- 1. Introduction
- 2. Definitional Problems
  - 2.1. Firm, Enterprise, Company, or Corporation
  - 2.2. Transnational, Multinational, or Global
- 3. History
  - 3.1. Contemporary Trends: Newcomers, Sectors, and Concentrations
- 4. Current Size, Nationality, and Sectors
  - 4.1. Size
  - 4.2. Nationality and Transnationality
  - 4.3. Industrial Sector Concentration
- 5. The Global Spread: National Ownership of Foreign Investment
  - 5.1. Foreign Direct Investment
  - 5.2. The Global Tilt: Imbalances in Distribution of Corporations and Investment
- 6. Multinational Corporations and Theory
  - 6.1. Theories of Corporate Behavior
    - 6.1.1. From Profit to Rent to Executive Rewards
    - 6.1.2. From Competition to Game Strategy
    - 6.1.3. From Enterprise to Organizational Dynamics
  - 6.2. Theories of Corporate Globalization
    - 6.2.1. Globalization: The Highest Stage of Capitalism?
    - 6.2.2. Pull Incentives: Resources, Cheaper Labor, Markets
    - 6.2.3. Investment Climate and Rent
- 7. The Multinational Corporations in the Twenty-first Century: Power and Transformation
  - 7.1. Economic Power
  - 7.2. Political Power
  - 7.3. Church, State, Corporation, and Sustainable Development

**Global Movement of Labor**

225

Joanne van Selm, *University of Amsterdam, the Netherlands*

- 1. Introduction

2. Internal Labor Migration
3. International Labor Migration
4. Forced Migration
5. UN Conferences and Plans on Migration
6. Themes and Theories
  - 6.1. Push and Pull
  - 6.2. Family Unity
  - 6.3. Networks
  - 6.4. Remittances
  - 6.5. Structures and Systems
  - 6.6. Integration and Assimilation
    - 6.6.1. Exclusion and Inclusion
    - 6.6.2. Political Participation
    - 6.6.3. Citizenship
    - 6.6.4. Education
  - 6.7. Restrictions
  - 6.8. Undocumented Migration
  - 6.9. Borders
  - 6.10. Amnesties
  - 6.11. Migrant Smuggling
7. Regional Labor Migration
  - 7.1. The European Union
    - 7.1.1. Enlargement
  - 7.2. US–NAFTA: Legal and Illegal Immigration
    - 7.2.1. History
    - 7.2.2. The Impact of NAFTA
    - 7.2.3. Seasonal Migration
    - 7.2.4. Wider American Migration
  - 7.3. Asia: Regional Organizations
    - 7.3.1. Western Asia
    - 7.3.2. The Philippines
    - 7.3.3. Japan
    - 7.3.4. Undocumented Migration
    - 7.3.5. China
    - 7.3.6. Malaysia
    - 7.3.7. Control Measures
    - 7.3.8. Emigration
    - 7.3.9. Female Migration
    - 7.3.10. Migration and Development
  - 7.4. Africa
8. Conclusion

**The Internet and Political Economy**

250

Gillian Youngs, *University of Leicester, UK*

1. Introduction
2. The Nature of Virtual Space
3. Horizontal versus Vertical Structures
4. Transnationalism
5. Information and Communication
  - 5.1. Virtual "Actors"
  - 5.2. NGOs Harness the Power of the Internet
  - 5.3. Digital Democracy
6. States and Markets
  - 6.1. Knowledge and Power
  - 6.2. Complex Inequality
  - 6.3. Rethinking Transformation

- 6.4. Social Spheres of Thought and Action
- 6.5. Connections between Virtual and Material Spaces
- 6.6. ICTs and Innovation
- 6.7. Imagining and Connecting
- 6.8. Choices in a Wired World
- 6.9. Enduring Inequalities
- 6.10. Critical Understanding of the Internet and the Future
- 6.11. Democratic Debates about Technology and Empowerment
- 7. Conclusion
  - 7.1. Cross-cultural Debates on Technology
  - 7.2. Your Technology, My Technology, Our Technology?
  - 7.3. Critical Paths Forward

**Economics of Transition** **270**  
 Iliana Zloch-Christy, *University of Vienna, Austria*

- 1. Introduction
- 2. Fundamental Problems and Challenges of Economic Policy
- 3. What Have We Learned in the Last Decade?
- 4. Conclusion

**Global Business Ethics** **277**  
 Simon Zadek, *Institute of Social and Ethical Accountability, UK*

- 1. Introduction
- 2. Framing the Questions
- 3. Change Drivers
- 4. Standards—But Which Ones?
- 5. Global Initiatives for Global Business Ethics
- 6. Beyond the Usual Suspects
- 7. Ethical Futures

**Globalization as if the Entire Globe Mattered: The Situation of Minority Groups** **292**  
 S.P. Udayakumar, *University of Minnesota, Minneapolis, USA*

- 1. Introduction
- 2. Globalization, Financial Liberalization, and Structural Adjustment
  - 2.1. Adulation, Admonition, and Third Perspective
- 3. Framing the Issue of Racial/Ethnic Discrimination
  - 3.1. Economic Nationalism, Anglo-Saxon Globalism, and Market Racism
  - 3.2. Domination, Exclusion, and Discrimination
- 4. The "Fundamentals" of Globalization and Impacts on Racial and Ethnic Minorities
  - 4.1. Growing Economic Disparity and Denial of Opportunities
- 5. Globalization as if the Entire Globe Mattered

**Strategies to Eradicate Poverty: An Integral Approach to Development** **318**  
 Roar Bjonnes, *PROUT Research Institute, Ashland, Oregon, USA*

- 1. Introduction
- 2. Global Poverty and Inequality
  - 2.1. Poverty: A Rising Tide
- 3. Toward a Broader Definition of Poverty
  - 3.1. Beyond Facts and Statistics
  - 3.2. Impoverishment of People and Culture

- 3.3. Child Labor: Beyond the Myths
- 4. Two Economic Myths
  - 4.1. The Myth of GNP
  - 4.2. The Myth of Per Capita Income
- 5. The Limits of the Development Paradigm
  - 5.1. The Development Partition
  - 5.2. The Failure of Economism
  - 5.3. Economic Development and the Impoverishing of the Environment
  - 5.4. Five Reasons Why Development Has Not Eradicated Poverty
- 6. Toward Sustainable Economics
  - 6.1. Questioning Current Economic Assumptions
  - 6.2. The Need for New Models of Development
  - 6.3. Two Forms of Sustainable Development
  - 6.4. Alternative Development Models
- 7. Economics as if All Living Beings Mattered
  - 7.1. Toward New Economic Values
  - 7.2. Cosmic Inheritance
  - 7.3. Spiritual Progress
  - 7.4. Neo-humanism
- 8. Beyond Poverty: Two Strategies toward Eradicating Poverty
  - 8.1. Short-term Strategy
  - 8.2. Long-term Strategy
- 9. Conclusion

<b>North-North, North-South, and South-South Relations</b>	<b>343</b>
<i>Lydia Krüger, University of Trier, Germany</i>	

- 1. Introduction
- 2. North–South Relations in Theoretical Perspective
  - 2.1. North–South Relations in the Context of Modernization Theory
  - 2.2. Dependency Theory and the North–South Conflict
- 3. A Historical Perspective on North–South and South–South Relations
  - 3.1. The Emergence of the South as a Political Force
  - 3.2. The Fight for a New International Economic Order
  - 3.3. Debt Crisis and Structural Adjustment: The Decline of the South since the 1970s
  - 3.4. The End of the Third World?
- 4. North and South in a Globalized World
  - 4.1. Convergence or Divergence?
  - 4.2. The Erosion of State Power and the Rise of Non-State Actors
- 5. Conclusions

--------------------	------------

## VOLUME II

<b>World Futures: Trends and Transformations in State, Education and Cultural Ecology</b>	<b>1</b>
<i>Partow Izadi, University of Lapland, Rovaniemi, Finland</i>	

- 1. Introduction
- 2. History Revisited: The Ever-Advancing Civilization
- 3. A Century of Light
- 4. World Order and Global Awareness

5. Humanity's Conceptual Awakening
6. A Look at the Universe and at Ourselves
7. Envisioning a Unified World
8. Questioning Some Fundamental Assumptions
9. Crisis and Victory

**Epistemology and Methodology in the Study of the Future**

15

Sohail Tahir Inayatullah, *Tamkang University, Taiwan; University of the Sunshine Coast, and Queensland University of Technology, Australia*

1. Introduction
2. Planning and Futures
3. Policy Analysis, Planning, and Futures Research
4. The Politics of Forecasting
5. Types of Futures Studies
6. Values
7. Chaos and Order
8. Complexity
9. Guiding Metaphors of the Future
10. Emerging Issues Analysis
11. Scanning
12. What-if Questions
13. Age-Cohort and Age-Grade Analysis
14. Causal Layered Analysis
15. Grand Theories of Social Change
16. The Politics of Time
17. Futures and Post-structuralism
18. Scenarios
19. Conclusion

**The Grand Patterns of Change and the Future**

35

Sohail Tahir Inayatullah, *Tamkang University, Taiwan; University of the Sunshine Coast, and Queensland University of Technology, Australia*

1. Introduction
2. Historical and Epistemic Context
3. Stages of History
4. Agency, Structure, and the Transcendental
5. Cyclical and Linear
6. Metaphors of Time
7. The Future from Macrohistory
8. Patterns in the Patterns

**Multilayered Scenarios, the Scientific Method and Global Models**

54

John Robinson, *Wellington, New Zealand*

1. Introduction
2. Multilayered Scenarios
3. Global Models—Worldviews, Forecasts, and Critics
4. Dealing with Complexity—the Scientific Method
5. Instability and Shift Points
6. Ordering the Complexity of the World System
7. The Next Generation of Scenarios

**The Futures of the United Nations and the World System****70**Sohail Tahir Inayatullah, *Tamkang University, Taiwan; University of the Sunshine Coast, and Queensland University of Technology, Australia*

1. Theoretical Assumptions
  - 1.1. Idealist
  - 1.2. Structural-Functionalist
  - 1.3. Realist
  - 1.4. Historical-Structural
2. Specific Reforms
3. Perspectives on the United Nations
  - 3.1. West-oriented World Government
  - 3.2. Cultural Basis for Governance
  - 3.3. Need for Supranational Authority
  - 3.4. Moral, not Strategic, Power and Authority
  - 3.5. World Government: Benign or Dictatorial?
  - 3.6. The Inevitability of World Government
  - 3.7. A New Ethic for Peacekeeping
  - 3.8. Transforming the Security Council and the General Assembly
  - 3.9. Making the UN More Representative
  - 3.10. Asia's Voice
  - 3.11. Accountability in the UN
4. Main Trends
5. Policy Implications
6. The Long View

**Globalization and Information Society-Increasing Complexity and Potential Chaos****88**Mika Mannermaa, *Futures Studies Mannermaa Ltd., Kaarina, Finland*

1. The Globalization Process
2. Information Society Equals Even More Complexity
3. What is Progress in a Complex World?
4. Chaos and Complexity Lead to an Evolutionary Perspective
5. Conclusions

**Globalization, Gender, and World Futures****100**Ivana Milojevic, *Graduate School of Education, The University of Queensland, Brisbane, Australia*

1. The Impact of Globalization
2. Women are Supporting Globalization but is Globalization Supporting Women?
3. Globalization Scenarios: Globotech versus Ecarmony
4. Redefining Global Priorities
5. Concluding Remarks

**Neo-Humanism, Globalization, and World Futures****114**Acarya Vedaprajnananda Avadhuta, *Associate editor, New Renaissance: A Journal for Social and Spiritual Awakening, Albania*

1. Neo-humanism
  - 1.1. Geographic Sentiments
  - 1.2. Social Sentiments
  - 1.3. Ordinary Humanism
2. Global Society of the Twenty-first Century
  - 2.1. Ecology, Lifestyle, and Culture
  - 2.2. Progressive Economics and Social Justice

- 2.3. Global Governance
- 3. Conclusion

**Sustainable Education: Imperatives for a Viable Future**

125

Marcus Bussey, *Harmony Montessori School, Buderim, Queensland, Australia*

- 1. Introduction
- 2. The Global Education Agenda
  - 2.1. Globalism
  - 2.2. Industrial Organization
  - 2.3. Implications for Education
  - 2.4. Humanism
  - 2.5. Implications for Education
  - 2.6. Unsustainability of Current Mode
  - 2.7. Liberatory Education
- 3. Educational Culture
  - 3.1. Learning Culture
  - 3.2. Fear
  - 3.3. Learning Modalities and Civilizational Diversity
  - 3.4. Microvita
  - 3.5. Critical Literacy
  - 3.6. Critical Spirituality
- 4. Sustainability
  - 4.1. Physical Sustainability
  - 4.2. Intellectual Sustainability
  - 4.3. Ethical Sustainability
  - 4.4. Emotional Sustainability
  - 4.5. Spiritual Sustainability
- 5. Sustainable Futures
  - 5.1. PROUT
  - 5.2. Schooling
  - 5.3. Community
  - 5.4. Liberatory Learning Structures
- 6. Educational Sustainability
  - 6.1. Crisis
  - 6.2. Analysis
  - 6.3. Synthesis
  - 6.4. Holism
  - 6.5. Neo-humanism
- 7. Imperatives for a Viable Future
- 8. Conclusions: Educational Sustainability

**Financial Resources Policy and Management: World Economic Order**

146

Ramón Tamames, *Full Professor at the Autonomous University of Madrid, Spain; Jean Monnet Chairholder, European Union, Spain.*

- 1. Globalization: Cycles and Inequalities
  - 1.1. Fewer and Lower Barriers
  - 1.2. A Non-synchronized Cycle
  - 1.3. Global Elite, Middle Classes, and Publicity
- 2. New Economy: Myth or Real Success?
  - 2.1. The Longest Prosperity Period
  - 2.2. Factor X
- 3. The Different Behaviors of Nations
  - 3.1. Advanced Countries
  - 3.2. Russia

- 3.3. Latin America
- 3.4. The Third World
4. Reform Programs
  - 4.1. New Arrangements
  - 4.2. New Allocations and Conditionalities
  - 4.3. Globalizing Institutions
5. Natural World Resources and Bionomics
  - 5.1. Finite Resources
  - 5.2. The Role of Multinationals
  - 5.3. A New Deal from Bionomics
6. The Biosphere as a Global Ecosystem
  - 6.1. Atomic Danger: From Nuclear Winter to Détente
  - 6.2. Major Threats and Changing Patterns
    - 6.2.1. Some Specific Problems
    - 6.2.2. Environmental Unawareness and Unsatisfactory Education
    - 6.2.3. Consumption Habits
7. To End Man's War Against Nature
  - 7.1. Main Features and Tensions
  - 7.2. Milestones to a Worldwide Philosophy
8. The Earth Summit: Bionomics at Large
  - 8.1. Preparing the Summit
  - 8.2. UNCED's Decisions
9. Emissions and Wastes that Pollute the Earth
10. The Two Malthus Laws
  - 10.1. Malthus' First Law and *Homo technologicus*
  - 10.2. Malthus' Second Law and *Homo ecologicus*
11. The Ecological Answer: The Unified Field of Economics and Ecology and the Eco-Eco Model
  - 11.1. The Eco-Eco Model and Sustainable Development
  - 11.2. Environment and Sustainable Development in Cooperation Policies
    - 11.2.1. Poverty, WTO, and PNUD
    - 11.2.2. Sustainability Policies
  - 11.3. Foreign Direct Investment (FDI) and the Environment
    - 11.3.1. Positive Influence and Risks
    - 11.3.2. Competitiveness, FDI, and Nature
    - 11.3.3. Developing Countries' Attitudes
12. The Biosphere Government
  - 12.1. UNCES as a New Executive Body
  - 12.2. Previous Attempts
  - 12.3. UNCES Inside the United Nations
  - 12.4. Looking at Poor Countries: An Agenda for Action
    - 12.4.1. To Ensure Minimum Consumption
    - 12.4.2. To Apply Environmentally Sustainable Technologies
    - 12.4.3. To Remove Perverse Subsidies
    - 12.4.4. To Strengthen Public Action for Consumer Education and Information
    - 12.4.5. To Reinforce International Mechanisms to Manage Consumption's Global Impacts
    - 12.4.6. To Build Stronger Alliances Among NGOs
    - 12.4.7. To Think Globally, To Act Locally

**International Commodity Policy: A New Concept for Sustainable Development**

**179**

Werner Gocht, *Research Institute for International Technical and Economic Cooperation, Aachen University of Technology, Germany*

Garnet Kasperk, *Research Institute for International Technical and Economic Cooperation, Aachen University of Technology, Germany*

1. Introduction: Commodities in the World Economy
2. History: A Century of International Commodity Policy
3. Policy Dimensions: Trade, Development, and Environment

4. Regulations: Special Market Features
5. Policy Objectives: Market Transparency and Competition
6. Future Commodity Policy Concept: Four Pillars

**Global Sustainability: Rhetoric and Reality, Analysis and Action - The Need for Removal of a Knowledge - Apartheid World** 203

Thomas G. Whiston, *Professor of Environment, Roskilde University, Denmark*

1. The Global Problem
2. The Main Pressure Points
3. The Track Record to Date
4. The Need for a Deeper Interactionist Global Environmental Model
5. Policy Implications for the Interactive Models
6. The Present "Global Policies" which are Emerging
7. Outstanding Contemporary Policy Requirements
8. Future Challenges
9. Barriers and Obstacles to Improvement
10. Grounds for Optimism

**Economic Assistance to Developing Countries and Sustainable World Population** 237

Gerard Piel, *Publisher and Editor of Scientific American, Retired, USA..*

1. Introduction
2. The Principle of Population
  - 2.1. Industrial Revolution
3. Demographic Transition
  - 3.1. Population Explosion
  - 3.2. Demographic Transition (continued)
  - 3.3. Human and Economic Development
4. Population Growth Projections
5. Economic Assistance
6. Trade: Not Aid
7. An Agenda for Economic Assistance
  - 7.1. The Urgency of Economic Assistance

**Capacity Development and Sustainable Human Development** 255

James Gustave Speth, *Yale University, USA*

1. Introduction
2. What are the Forces Shaping Capacity Development for Sustainable Human Development?
  - 2.1. The Drive for Progress
  - 2.2. Threats to Sustainability
  - 2.3. The Rise of Integration and Globalization
  - 2.4. The Rise of Fragmentation and Civil Strife
  - 2.5. The Emergence of New Actors in Sustainable Human Development
3. What are the Emerging Approaches to Capacity Development for Sustainable Human Development?
  - 3.1. Attention to Governance
  - 3.2. Capacity Development and Conflict Resolution
  - 3.3. Changing Approaches to Capacity Development
  - 3.4. The Shift from Mechanistic to Systems Thinking
  - 3.5. The Shift to Knowledge and Learning
4. The Emerging Role of the International Development Community in Capacity Development for Sustainable Human Development
  - 4.1. The Need to Shift to a More Appropriate Role in Capacity Development

- 4.2. The Shift to New Ways of Thinking and Organizing for Capacity Building for Sustainable Human Development
- 4.3. An Emphasis on Ethics and Values
- 4.4. The Shift to Value and Performance
