CONTENTS

Preface x

Packet Switched Data Network and Its Evolution 1

K. Giridhar, *Telecommunications and Computer Networks (Tenet) Group, Department of Electrical Engineering, Indian Institute of Technology Madras, Chennai-600036, India*

1. History of packet switching
2. Packet switching
 - 2.1. Packet-switched network
 - 2.2. Packet routing
3. Datagram versus Virtual Circuits
 - 3.1. Datagram Packet Networks
 - 3.2. Virtual Circuit Packet Networks
 - 3.3. Differences between datagram and virtual circuit networks
4. Popular Packet Switched Networks
 - 4.1 CDPD
 - 4.2 Wireless Packet Data
 - 4.3 GPRS

Fibre Optic Communications: Techno Economics 12

Balaji Srinivasan and Anil Prabhakar, *Department of Electrical Engineering, Indian Institute of Technology – Madras Adyar, Chennai 600 036. India.*

1. Introduction
2. Propagation through Optical Fibers
3. Challenges in Fiber Optic Communications
 - 3.1. Attenuation in Fused Silica Optical Fibers
 - 3.2. Dispersion in Optical Fibers
 - 3.3. Nonlinear Effects in Optical Fibers
4. Wavelength Division Multiplexing (WDM)
 - 4.1. Coarse WDM
 - 4.2. Optical Amplifiers
 - 4.3. Broadband Optical Amplifiers
5. Wavelength Multiplexing Technologies
 - 5.1. Dielectric Thin-Film Cavity Filters (DTMF)
 - 5.2. Fiber Bragg Gratings (FBGs)
 - 5.3. Arrayed Waveguide Gratings (AWGs)
6. Fiber Optic Communications Applications
7. The Indian Fiber Optics Industry
 - 7.1. Manufacturing of a 24-Core Fiber Cable
 - 7.2. Liberalization of the Telecommunication Industry
 - 7.3. Technological Improvements in Optical Fiber
 - 7.4. Fiber Capacity
 - 7.5. Optical Fiber Deployment in India
 - 7.6. Optical Hardware Sales
8. Conclusion

Satellite Communications 41

Andrew Thangaraj, *Department of Electrical Engineering, Indian Institute of Technology Madras, India*

1. Introduction
2. Overview of Satellite Communication Systems

- 2.1. Satellite Orbits
- 2.2. Frequency Bands
- 2.3. Multiple Access
- 2.4. Bent-pipe versus Regenerative Satellites
- 2.5. Other Subsystems
3. Source Codes - Coding messages into bits
 - 3.1. Source Codes for English Alphabet
 - 3.2. Source Codes for Images
4. Modulation - Sending bits into the real world
 - 4.1. Electromagnetic Waves – The Carriers of Bits
 - 4.2. Modulation – From Bits to EM Waves
 - 4.3. Errors in Modulation
 - 4.4. BER and SNR of a Digital Communication System
 - 4.5. Design of a Digital Communication System
5. Error Control Coding - Making modulation more efficient
 - 5.1. Channel Capacity
 - 5.2. Error Control Codes
6. Link Budget for Satellites - Planning the link
7. Future Directions
 - 7.1. Future services
 - 7.2. Future technologies
8. Conclusions

Multimodal Interfaces to the Computer

64

Hema A. Murthy and C. Chandra Sekhar, *Department of Computer Science and Engineering, IIT Madras Chennai, India*

C.S. Ramalingam, *Department of Electrical Engineering, IIT Madras Chennai, India*

Srinivasa Chakravarthy, *Department of Biotechnology, IIT Madras Chennai, India*

1. Introduction
2. Issues in providing Multimodal Local Language support to the Computer
 - 2.1. The Keyboard Interface
 - 2.2. Speech Recognition
 - 2.3. Handwriting Recognition
3. Output Mechanisms
 - 3.1. Display
 - 3.2. Speech Synthesis
4. Developing Local Language Databases
5. Building Multimodal Interfaces to the Computer
 - 5.1. Limitations of existing MMI
 - 5.2. Overview of MMI for Linux OS
 - 5.3. Multilingual support on Linux
 - 5.3.1. Console-based solution - Kernel Modification
 - 5.3.2. X-Window System based solution
 - 5.3.3. Speech Interface Design
 - 5.3.4. Hand-writing Interface Design
 - 5.4. MMI Illustration
6. Conclusion

Display Technologies (ICT and Visualization)

75

R. Sharan, *L.N. Mittal Institute of Information Technology, Jaipur, India*

K. R. Sarma, *Santel Color Ltd., New Delhi, India*

B. Mazhari and S. S. K. Iyer, *Department of Electrical Engineering, Indian Institute of Technology Kanpur, India*

1. Introduction

- 1.1. Display Systems
 - 1.1.1. Display System: TV
 - 1.1.2. Display System: Computer Monitor
 - 1.1.3. Display System: Cell phone
- 1.2. Computer-assisted Visualization
2. Performance Requirements and Specifications for Display Screens
 - 2.1. A Simple Flat Panel Display
 - 2.1.1. Performance Specifications for Display
 - 2.2. Drive Electronics
3. Technology for manufacture of Display Screens
 - 3.1. Cathode Ray Tube (CRT)
 - 3.2. Organic Light Emitting Diode (OLED) Displays
 - 3.3. Plasma Display Panel (PDP)
 - 3.4. Liquid Crystal Display (LCD)
4. Computer-aided Visualization
 - 4.1. Basic Considerations
 - 4.2. Evolution and Application of CAV
 - 4.3. Application to Activities of Life Support System (LSS)
5. Conclusions

Geographic Information System(GIS) As A Tool For Development

109

Parvatham Venkatachalam, *Centre of Studies in Resources Engineering, Indian Institute of Technology Bombay, Powai, Mumbai, India*

1. Introduction
 - 1.1. Components of a GIS
 - 1.2. GIS Applications
2. History of GIS
3. Concepts of Spatial Data
 - 3.1. Spatial Objects
 - 3.2. Components of Spatial Data
 - 3.3. Transforming Objects
 - 3.4. Spatial Relations
 - 3.5. Geo-Relational Data Model
 - 3.6. Object Relational Data Model
4. Spatial Data Sources
 - 4.1. Primary Data Sources
 - 4.2. Secondary Data Sources
 - 4.3. Scales of Measurement
5. Map Projections
 - 5.1. Geographic Coordinate System
 - 5.2. Datum
 - 5.3. Scale
 - 5.4. Map Projections
6. Spatial Data Modeling
 - 6.1. Raster Data Model
 - 6.2. Vector Data Model
 - 6.3. Regions
 - 6.4. Routes
 - 6.5. Triangulated Irregular Network (TIN) Model
7. Spatial Data Input and Editing
 - 7.1. Scanning and Digitization
 - 7.2. Spatial Data Editing
8. Geometric Transformation
 - 8.1. Geometric Transformation Process
 - 8.2. Pixel Values Re-sampling
9. Attribute data Management
10. Spatial Analysis
 - 10.1. Attribute Data Query

- 10.2. Spatial Data Query
- 10.3. Vector Data Analysis
 - 10.3.1. Vector Operations on Two Layers
 - 10.3.2. Vector Operations on Single Layer
- 10.4. Raster Data Analysis
 - 10.4.1. Display Operations
 - 10.4.2. Local Operations
 - 10.4.3. Local Neighborhood Operations
 - 10.4.4. Extended Neighborhood Operations
 - 10.4.5. Zonal Operations
- 10.5. Comparison of Vector and Raster Data Analysis
- 11. Spatial Interpolation
- 12. Digital Terrain Mapping
 - 12.1. Digital Elevation Model
 - 12.2. Triangulated Irregular Network (TIN) Model
 - 12.3. Terrain Mapping Methods
 - 12.4. Slope and Aspect
- 13. Watershed Delineation Using DEM
 - 13.1. Preprocessing DEM
 - 13.2. Flow Direction and Flow Accumulation
 - 13.3. Derivation of Drainage Network
 - 13.4. Watershed Delineation
- 14. Network Analysis
- 15. Statistical Analysis in GIS
 - 15.1. Descriptive Statistics
 - 15.2. Spatial Auto Correlation
 - 15.3. Trend Surface Analysis
 - 15.4. Gravity Model
- 16. Role of Remote Sensing in GIS
- 17. Spatial Data Visualization
 - 17.1. Use of Color Schemes
 - 17.2. Types of Maps
 - 17.3. Map Layout
- 18. Global Positioning System
 - 18.1. Space Segment
 - 18.2. Control Segment
 - 18.3. User Segment
 - 18.4. Observation Principle
 - 18.5. Surveying with GPS
 - 18.6. GPS Receivers
 - 18.7. Transformation from Global to Local Datum
 - 18.8. GPS Heights and Mean Sea Land Heights
 - 18.9. GPS Applications
- 19. Spatial Decision Support Systems
- 20. Spatial Data Accuracy
- 21. GIS Applications
- 22. An Example on Use of GIS Technology
 - 22.1. Study Area
 - 22.2. Data Used
 - 22.3. Analysis
- 23. Current Scenario and Future Prospects in GIS
 - 23.1. Current Scenario
 - 23.2. Open Source GIS Software Tools
 - 23.3. Future Prospects
 - 23.4. Areas of Research
- 24. Conclusions

Storage Systems And Technologies**204**

Jai Menon, *IBM Academy of Technology, San Jose, CA, USA*
 Clodoaldo Barrera, *IBM Systems Group, San Jose, CA, USA*

1. Introduction
2. Storage Devices
 - 2.1. Storage Device Industry Overview
 - 2.2. Hard Disk Drives
 - 2.3. Digital Tape Drives
 - 2.4. Optical Storage
 - 2.5. Emerging Storage Technologies
 - 2.5.1. Holographic Storage
 - 2.5.2. Flash Storage
 - 2.5.3. Storage Class Memories
3. Block Storage Systems
 - 3.1. Storage System Functions – Current
 - 3.2. Storage System Functions – Emerging
4. File and Archive Storage Systems
 - 4.1. Network Attached Storage
 - 4.2. Archive Storage Systems
5. Storage Networks
 - 5.1. SAN Fabrics
 - 5.2. IP Fabrics
 - 5.3. Converged Networking
6. Storage Software
 - 6.1. Data Backup
 - 6.2. Data Archive
 - 6.3. Information Lifecycle Management
 - 6.4. Disaster Protection
7. Concluding Remarks

Artificial Intelligence**228**

Pushpak Bhattacharyya, *Department of Computer Science and Engineering, Indian Institute of Technology Bombay, India.*

1. Introduction
 - 1.1. Definition of AI
 - 1.2. Subfields of AI
 - 1.3. Theoretical Underpinnings
2. Search
 - 2.1. Algorithmics of Search
 - 2.1.1. The 8-puzzle problem
 - 2.1.2. Missionaries and the Cannibals Problem [Rich and Knight 1991]
 - 2.1.3. The General Graph Search Algorithm [Nilsson 1986]
 - 2.1.4. A* algorithm
 - 2.1.5. Properties of A*
3. Logic and Inferencing
 - 3.1. Deduction, Induction and Abduction
 - 3.2. Propositional Calculus
 - 3.2.1. Truth Table
 - 3.2.2. Functional completeness of \Rightarrow and \neg
 - 3.2.3. Laws of Propositional Calculus
 - 3.2.4. Tautologies
 - 3.2.5. Semantic Tableau Method of Proving a Tautology
 - 3.3. Formal System
 - 3.3.1. Formalization of Propositional Calculus
 - 3.3.2. Proofs and Theorems in a Formal System

- 3.3.3. The Deduction Theorem
- 3.4. Theorems, Meta-Theorems And Self Reference
- 3.5. Tautologies and Theorems
- 3.6. Soundness, completeness and consistency
- 3.7. An example to illustrate the application of propositional calculus
- 3.8. Predicate calculus
 - 3.8.1. Limitations of propositional calculus
 - 3.8.2. The powerful constructs of predicate calculus: predicates, variables and quantifiers
- 3.9. Inferencing in Predicate Calculus: Resolution and Unification
- 3.10. An example to illustrate the application of predicate calculus
- 4. Knowledge Representation
- 5. Description Logic and Semantic Web
 - 5.1. Description Logic and Predicate Calculus
 - 5.2. Constituents of DL
 - 5.3. Inheritance and Subsumption
- 6. Conclusion
 - 6.1. The Role of Human Intelligence in the Formal System
 - 6.2. The Role of Human Intelligence in Puzzle Solving by Propositional Calculus

Computer Vision and Information Technology

275

Subhasis Chaudhuri and Amit Prabhudesai, *Department of Electrical Engineering, Indian Institute of Technology, Bombay, Mumbai - 400076, India*

- 1. Introduction
- 2. Content Based Image Retrieval
 - 2.1. Image Content Descriptors
 - 2.1.1. Color
 - 2.1.2. Texture
 - 2.1.3. Shape
 - 2.2. Similarity/Distance Measures
 - 2.3. Indexing Schemes
 - 2.4. Some Interesting Applications
 - 2.4.1. Logo Search
 - 2.4.2. Personal Image Collection Browser
 - 2.4.3. Retrieval of Buildings and Architectural Monuments
- 3. Automatic Illumination Correction for Scene Enhancement
 - 3.1. Skin Color Correction
 - 3.1.1. Standard Color Palette Based Color Correction
 - 3.1.2. Automated Color Correction
 - 3.2. Experimental Demonstration
- 4. Image Super-resolution
 - 4.1. Single-frame Image Super-resolution using learnt Wavelet coefficients
 - 4.2. Experimental Demonstration
 - 4.3. Application of Super-resolution to Surveillance
 - 4.3.1. Defining the Problem
 - 4.3.2. High Resolution (HR) Slow-Motion (Slo-Mo) Sequencing Algorithm
 - 4.3.3. Performance Demonstration
- 5. Photo Albumation: High resolution photo album through video shooting
 - 5.1. Extracting the Key Frames
 - 5.1.1. Temporal Segmentation
 - 5.1.2. Key Frame Selection
 - 5.2. Generation of High-resolution Images
 - 5.3. A few Illustrative Examples
- 6. Virtual-view Generation
 - 6.1. What Exactly is Virtual-view Generation?
 - 6.1.1. View-morphing with Change in Camera Position
 - 6.1.2. View-morphing with Change in Light Source Position
 - 6.1.3. View-morphing with Change in Camera Parameter Settings

- 6.2. Experimental Demonstration
- 7. Conclusion

Telecommunication Networking **307**
 Debasish Datta, *Department of Electronics and Electrical Communication Engineering Indian Institute of Technology, Kharagpur, India*

- 1. Introduction
- 2. How it evolved
- 3. Transmission Systems
- 4. Switching and Broadcasting Schemes
- 5. Some Basic Networking Examples
- 6. Some Real-life Networking Scenarios
- 7. Conclusion

Review of Research on Rural PC KIOSKS **345**
 Kentaro Toyama, *Microsoft Research India*
 Renee Kuriyan, *University of California Berkeley, USA*
 Savita Bailur, *London School of Economics, UK*
 Nimmi Rangaswamy, Aishwarya Ratan and Rajesh Veeraraghavan, *Microsoft Research India*
 Deepak Menon, Joyojeet Pal and Janaki Srinivasan, *University of California Berkeley, USA*

- 1. Introduction
- 2. Rural PC Kiosks are difficult to Sustain
- 3. Successful Rural PC Kiosks Fall into Several Categories
- 4. Meeting Business Needs and Social Development Goals Simultaneously is Difficult
- 5. What Rural Villagers want and what we think they Need are Frequently Different
- 6. The Kiosk Entrepreneur Plays the Most Critical Role in the Success of a Kiosk
- 7. A Kiosk Champion Can Help Sustain a Set of Kiosks
- 8. Services Require Attention to the Entire Supply Chain, not only to the Kiosk
- 9. Focus on a Single Class of Services Increases Likelihood of Success
- 10. Kiosks do Better in Towns; Kiosks do Better in Remote Villages
- 11. Kiosks in Offices and Schools May Provide Alternatives to the Standalone Kiosk
- 12. Kiosk Usage is Dominated by Relatively Affluent, More Educated Young Men
- 13. Per-Transaction Fees are Resisted by Many Customers
- 14. Mobile-Phone-Based Kiosks Offer an Alternative to PC-Based Kiosks
- 15. Conclusion

Intelligent Transportation Systems (ITS) and the Transportation System **364**
 Dinesh Mohan, *Transportation Research and Injury Prevention Programme, Indian Institute of Technology Delhi, India*

- 1. Introduction
 - 1.1. History of ITS
 - 1.2. ITS applications
- 2. ITS and Behavior Adaptation
- 3. ITS and safety
 - 3.1. Risk Reduction
 - 3.1.1. Road and Infrastructure Based
 - 3.1.2. Vehicle Based
 - 3.2. Injury Control
 - 3.3. Post Crash Management
 - 3.4. Summary of the Section
- 4. ITS and mobility
 - 4.1. Traffic Management

- 4.2. Public and Goods Transport
 - 4.2.1. Passenger Information
 - 4.2.2. Fleet Management
 - 4.2.3. Rapid Transit Systems
 - 4.2.4. Optimizing Taxi Systems
- 5. Management and revenue collection
- 6. Energy and environment
- 7. Conclusions

Sparse And Rural Area Communication Systems

379

Ashok Jhunjunwala, *Department of Electrical Engineering, IIT-Madras, Chennai, India*
 Sangamitra Ramachander, *Consultant Development Economist, IIT - Madras, Chennai, India*

- 1. Introduction
 - 1.1. Rural Areas of the World
 - 1.2. Rural-Urban Disparities in Economic and Social Spheres
 - 1.3. Rural-Urban Differences in Physical Infrastructure
- 2. Connectivity
 - 2.1. Telecom Networks
 - 2.2. Scenarios for Connectivity
- 3. Backbone Network
 - 3.1. Optical Fiber Communications
 - 3.2. Microwave Radio Communications
 - 3.3. Satellite Radio Communications
 - 3.4. Technology Choice for Backbone
- 4. Access Networks
 - 4.1. Data Connectivity on Wireless
 - 4.2. Specific Wireless Technologies
 - 4.2.1. Early Analog Multi-Access Wireless Systems
 - 4.2.2. TDM-TDMA Point- to-Multi-Point Systems
 - 4.2.3. Current Systems
 - 4.2.3.1. corDECT Wireless in Local Loop
 - 4.2.3.2. GSM and CDMA (IS-95/3G-1X)
 - 4.2.4. Wireless Connectivity Tomorrow
 - 4.2.4.1. Broadband corDECT
 - 4.2.4.2. 3G Technologies
 - 4.2.4.3. OFDMA Technologies
 - 4.2.4.4. Other Technologies
- 5. Sparse Area Communication Systems
- 6. The Evolution of Rural Needs
- 7. Concluding Remarks

Key Issues in Compating the Digital Divide

403

Kumar Richa, *History, Anthropology, Science, Technology, and Society Program, Massachusetts Institute of Technology, USA*
 Pal Joyojeet, *Department of City and Regional Planning, University of California at Berkley, USA*
 Ngai James, *Sloan Undergraduate Program in Management Science, Massachusetts Institute of Technology, USA*

- 1. Introduction
- 2. Appropriate Applications and Needs Assessment
- 3. Local Entrepreneurship
- 4. Marketing and Outreach
- 5. Ubiquity and Accessibility (Branding)
- 6. User Density
- 7. Technical Challenges: Maintenance, Obsolescence and Infrastructure

8. Conclusion

Regulatory Reform And Rural Roll-Out of Information and Communication Technologies(ICTs) 420

Rohan Samarajiva and Ayesha Zainudeen, *LIRNEasia, 12 Balcombe Place, Colombo 08, Sri Lanka*

1. Importance of Rural Access to Information and Communication Technologies
2. Undersupply of Rural ICT Infrastructure
 - 2.1. Regulatory Barriers and Shortcomings
 - 2.1.1. Requirements for rural access to ICTs
 - 2.1.1.1. Transparent Market Entry
 - 2.1.1.2. Access to Well Managed Scarce Resources
 - 2.1.1.3. Interconnection and Access
 - 2.1.1.4. Competent Enforcement of Competition and Regulatory Rules
 - 2.2. High Costs of Providing ICT Infrastructure to Rural Areas
 - 2.3. Perceptions of low economic demand in rural markets
3. The Need for Regulatory Reform
4. Concluding Remarks

Free - Open Source Software For Development 435

C. N. Krishnan and Kenneth Gonsalves, *National Resource Centre for Free/Open Source Software, (NRCF/OSS), AU-KBC Research Centre, Anna University – M. I. T. Campus, Chennai, India.*

1. Introduction
2. Development, ICT and Software
 - 2.1. Some Specific Areas where ICT can impact
 - 2.2. Software and ICT
3. The F/OSS Movement -- Its Moorings, Methods and Results.
 - 3.1. Some Definitions
 - 3.2. Proprietary Software vs. Open Source Software
 - 3.3. Licensing Models in F/OSS
 - 3.4. The F/OSS Software Development Model
 - 3.5. The Status of F/OSS Products
4. F/OSS for Development
 - 4.1. Some Specific Application Areas.
 - 4.2. Possible Players and their Roles
5. Discussion and Conclusion
