

CONTENTS

FUTURE CHALLENGES OF PROVIDING HIGH-QUALITY WATER

Future Challenges of Providing High-Quality Water - Volume 1

No. of Pages: 450

ISBN: 978-1-84826-209-6 (eBook)

ISBN: 978-1-84826-659-9 (Print Volume)

Future Challenges of Providing High-Quality Water - Volume 2

No. of Pages: 450

ISBN: 978-1-84826-230-0 (eBook)

ISBN: 978-1-84826-680-3 (Print Volume)

CONTENTS

VOLUME I

Future Challenges of Providing High-Quality Water	1
<i>Jo-Ansie K van Wyk, Department of Political Sciences, University of South Africa, P O Box 392, Pretoria, 0003, South Africa</i>	
<i>Richard Meissner, African Water Issues Research Unit, University of Pretoria, Pretoria, 0002, South Africa</i>	
<i>Hannatjie Jacobs, Independent Research Consultant, P O Box 6228, Uniedal, Stellenbosch, 7612, South Africa</i>	

1. Introduction
2. Global and Regional Freshwater Resources
3. Emerging Global Patterns in the Provision of High Quality Water
4. Global Awareness of the Challenges of Providing High Quality Water
5. The Role of Global Governance Agencies in the Provision of High Quality Water
6. Increased Private Sector Involvement in the Provision of High Quality Water
7. The Role of Selected Global Social Movements
8. The Development and Expansion of International Law
9. Global Water Values
10. Water and International Security
11. The Use of Internet and Technology
12. Impact of Climate Change on Water Resources
 - 12.1. Flooding and Drought
 - 12.2. El Niño and Freshwater Resources
 - 12.3. Global Warming and Sea-Level Rise
 - 12.4. Climate Change and Water Management
 - 12.5. Climate Change and Ethics
13. Demographics, Water Availability and Demand
14. Conclusion

Global and Regional Freshwater Resources	39
<i>Richard Meissner, Research Associate at the African Water Issues Research Unit at the University of Pretoria, South Africa</i>	

1. Introduction
2. A Change in the Perception of Water
3. Perspectives of Global and Regional Freshwater Resources
 - 3.1. Virtual Water
 - 3.2. Blue and Green Water
4. Freshwater Quantity, Quality and Distribution Across the Globe and in Regions
 - 4.1. Distribution and Quantity
 - 4.2. The Quality of Global and Regional Freshwater Resources
5. Global Water Needs for the Future
 - 5.1. Population Growth
 - 5.1.1. Accurate Data
 - 5.2. Economic Development
 - 5.3. Present Global Water Needs
 - 5.3.1. Current Agricultural Water Use
 - 5.3.2. Industrial Water Use
 - 5.3.3. Domestic Water Use
6. Conclusion

Perspectives of Global Water Balance and Regional Water Resources **64**

R. Meissner, *Research Associate, African Water Issues Research Unit, University of Pretoria, South Africa*

P.M. Mampane, *Research Assistant, African Water Issues Unit, University of Pretoria, South Africa*

1. Introduction
2. An Altering Water Paradigm
3. Perspectives of the Global Water Balance and Regional Water Resources
 - 3.1. Virtual water
 - 3.2. Blue and Green Water
4. Conclusion

Global Freshwater Quantity, Quality and Distribution **82**

R. Meissner, *Research Associate, African Water Issues Research Unit, University of Pretoria, South Africa*

P.M. Mampane, *Research Assistant, African Water Issues Unit, University of Pretoria, South Africa*

1. Introduction
2. The Living Planet
3. Global Freshwater Quantity and Distribution
4. Global Freshwater Quality
5. Conclusion

Global Water Needs for the Future **96**

R. Meissner, *Research Associate at the African Water Issues Research Unit (AWIRU) at the University of Pretoria (UP), SouthAfrica*

A. Snyders, *Publications Co-ordinator at the Institute for Security Studies, SouthAfrica*

1. Introduction
2. Drivers of Water Use
 - 2.1. Population growth
 - 2.1.1. Accurate data
 - 2.2. Economic development
3. Present Global Water Needs
 - 3.1. Current agricultural water use
 - 3.2. Industrial water use
 - 3.3. Domestic water use
4. Future trends
 - 4.1. Future agricultural water needs
 - 4.2. Future industrial water needs
 - 4.3. Future domestic water needs
5. Conclusion

Self-Sustainability for the Management of Water Cycles at the Local Level **113**

Erich Roberto Trevisiol, *Environmental Planner, IUAV-DP-LABSLA, Venezia, Italia*

1. Introduction
 - 1.1. Scientific Background
 - 1.2. Framework and Methodology
2. Findings of the Research
 - 2.1. Main findings of the LABSLA research
 - 2.2. Methodology: Selection Process
 - 2.3. Methodology: Evaluation via the Best Practices method
 - 2.4. Methodology: Public Consultation and Involvement of Local Communities.
 - 2.5. Ways of Rewarding Representation.

3. Savonarola Neighbourhood Contract, Padua, Italy
 - 3.1. Framing the Savonarola Contract Case Study
 - 3.2. Water in the "Caduti della Resistenza" District, Padua
 - 3.3. Criteria Adopted for Water Cycle Planning Decisions
 - 3.4. Importance of Water Saving Equipment
 - 3.5. Abacus of Water Saving Measures (Characteristics and Materials) in Padua Case Study
 - 3.6. Abacus of Treatment Facilities (Characteristics and Materials)
 - 3.7. Planning Criteria for Winter Garden (or Greenhouse)
 - 3.8. Planning Criteria for "Greening" the Open Spaces
 - 3.9. Public Participation in the Planning Cycle as a Precondition for Technical Applications
 - 3.10. Methods and Aesthetic Perception Indicators as Decision Planning Support
4. Municipal Water Planning: the Revised Water Cycle Management Programme (Rigena) of Selvazzano Dentro – Padua.
 - 4.1. Traditional versus New Town Planning Instruments, for the Protection of Water Resources
 - 4.2. RIGENA Programme
5. Conclusion: From Drinking Water to Service Waters: a Vision by the Year 2010 in Europe

Water and Sustainability in Asian Megalopolises: The Case of Beijing

134

James E. Nickum, *Tokyo Jogakkan College, Tokyo, Japan*

1. Introduction
2. A Conceptual Framework
 - 2.1. The Maturing Water Economy
 - 2.2. Project Culture
3. The Case of Beijing: The Early Years
 - 3.1. The Expansion Phase (1950s and 1960s)
 - 3.2. The End of Expansion: Signs of Stress
4. The Case of Beijing: Beyond Expansion
 - 4.1. The Transition to a Maturing Water Economy
 - 4.2. Rapid Economic Growth in a Mature Water Economy
 - 4.3. Implications of Beijing's Experience
5. Conclusions

Economics and Financing in the Water Sector

146

Renato Parena, *Chief Financial Officer, Gruppo Società Metropolitana Acque Torino Spa, Torino, Italy*

1. Water Pricing
2. Impacts by water scarcity and externalities costs
3. Key factors to speed the water business change
4. A growing industry needs comparing with peers
5. Water services financing and management: new roles for the public and private sectors

Human Health in Water Resources Development

173

Willem van der Hoek, *International Water Management Institute (IWMI), Colombo, Sri Lanka*

1. Introduction
2. The burden of water-related diseases
3. Vector borne diseases associated with water resources development
 - 3.1. Malaria
 - 3.2. Filariasis
 - 3.3. Schistosomiasis
 - 3.4. Japanese encephalitis
 - 3.5. Dengue
4. Water management for vector control
 - 4.1. Engineering and malaria control: Learning from the past 100 years

- 4.2. Improved drainage in canal irrigation systems
- 4.3. Alternate wet dry irrigation in rice cultivation
5. Health Impact Assessment
6. Water resources development and the urban environment
7. Conclusions

Coming to Terms with Nature: Water Reuse New Paradigm Towards Integrated Water Resources Management **195**

Blanca Elena Jimenez-Cisneros, *National Autonomous University of Mexico, Mexico City, Mexico*

1. Introduction
2. Towards an integral definition of water reuse
3. How to overcome people's fear of reused water
4. What we know about natural water reuse
 - 4.1. Human consumption
 - 4.2. Agricultural irrigation
5. Natural water reuse origin
 - 5.1. Unacknowledged water discharges
 - 5.1.1. Sewer leakages
 - 5.1.2. On-site sanitation systems
 - 5.1.3. Irrigation of amenity areas
 - 5.1.4. Storage or evaporation tanks and pipelines
 - 5.1.5. Channels or rivers with contaminated water
 - 5.1.6. Water supply network
 - 5.1.7. Other kinds of unacknowledged sources
 - 5.2. Traditionally acknowledged discharges
 - 5.2.1. Municipal
 - 5.2.2. Industrial
 - 5.2.3. Agricultural
 - 5.2.4. Storm run-off
6. Situation by type of water body
 - 6.1. Surface water
 - 6.2. Groundwater
7. Control
8. Conclusions

Water Resources Engineering

228

Nobuyuki Tamai, *Department of Civil Engineering, Kanazawa University, Kanazawa, Japan*

1. Introduction
 - 1.1. Hydraulics for Rivers
 - 1.2. Hydraulics for Pipe Flows
 - 1.3. Fluvial Hydraulics
 - 1.4. Engineering Hydrology
 - 1.5. Maritime Hydraulics
2. Recent Development in Water Resources Engineering
 - 2.1. Worldwide Surge of Environmental Concern
 - 2.2. Sustainability of Water Resources Projects
 - 2.3. Hydroinformatics
 - 2.4. Influence of Global Warming
3. Real Problems in Human Societies
 - 3.1. Flood and Drought
 - 3.2. Dams and Reservoirs
 - 3.3. Hydropower Generation
4. New paradigm—Water Ethics
 - 4.1. How Water Resources Engineering Satisfies Water Ethics?

- 4.2. Partnered Approach
- 4.3. Value of Environment

Water Supply and Demand Status and Water Environment Protection in China	241
<i>H. Wang, Department of Water Resources, Institute of Water Resources and Hydropower Research, Beijing, China.</i>	
<i>D.X. Wang, Department of Water Resources, Institute of Water Resources and Hydropower Research, Beijing, China.</i>	
<i>J. Ma, Department of Water Resources, Institute of Water Resources and Hydropower Research, Beijing, China.</i>	

1. Water Resources Problems in the Process of Development
 - 1.1. Evolution of the Water Cycle and its Effects on Resources, Ecology and Environment
 - 1.1.1. Changes in the Water Cycle Induced by Large Scale Human Action
 - 1.1.2. Lateral Water Cycle Resulting from Water Development and Utilization
 - 1.1.3. Resources, Ecological System and Environment Effects of the Water Cycle Evolution
 - 1.2. Basic Features of Chinas Water Resources
 - 1.2.1. Total Water Resources and Per Capita Availability
 - 1.2.2. Water Resources Temporal and Spatial Distribution
 - 1.2.3. Water Resources Distribution and Production Forces Disposition
2. China's Present Situation on Water resources Development and Utilization
 - 2.1. Water Supply and Demand
 - 2.1.1. Water Supply
 - 2.1.2. Water Use
 - 2.2. Water Environment Quality
 - 2.2.1. Present Status for Water Quality of Rivers of Whole Country
 - 2.2.2. Water Quality of Main Rivers
 - 2.2.3. Water Environment of Cities and Towns
 - 2.2.4. Water Quality of Lakes and Reservoirs
 - 2.2.5. Groundwater Quality
 - 2.3. Problems in the Development of Water Resources
 - 2.3.1. Regional Water Shortage in North China and the Growing Urban Water Shortage
 - 2.3.2. Growth of Water Pollution, in Space and Time
 - 2.3.3. Intensification of Ecological Deterioration
3. Water Supply and Demand Status of China in twenty-first Century
 - 3.1. Domestic Water Demand
 - 3.1.1. Population Projection
 - 3.1.2. Analysis of Per Capita Domestic Water Consumption
 - 3.2. Industrial Water Demand
 - 3.2.1. Economic Development Projection
 - 3.2.2. Industry Water Saving Level
 - 3.3. Agriculture Water Demand
 - 3.3.1. Agriculture Development Projection
 - 3.3.2. Irrigation Quota
 - 3.3.3. Water Use for Forestry, Animal Rearing, Fisheries and Vegetables
 - 3.3.4. Total Agriculture Water Demand
 - 3.4. Total Water Demand and Per Capita Water Demand
4. Sustainable Utilization Options for Water Resources
 - 4.1. Water Resources Rational Disposition
 - 4.1.1. SongLiao River Basin
 - 4.1.2. Yellow, Hailuan and Huai River Basin
 - 4.1.3. Yangtze River Basin
 - 4.1.4. Pearl River and South-east River
 - 4.1.5. South-west River Basin
 - 4.1.6. Inland River Basin
 - 4.2. Protection Options for Water Resources Development and Utilization
 - 4.2.1. Urban and Industrial Water Supply

- 4.2.2. Agriculture Irrigation
- 4.2.3. Control and Protection of Aquatic Environments
- 4.2.4. Composition of Water Supply Sources
- 4.2.5. Future Prospects for Water Resource Development and Utilization

Index **279**

About EOLSS **285**

VOLUME II

The Impact of Climate Change on Water Resources: An Overview **1**
R. Meissner, *Research Associate at the African Water Issues Research Unit at the University of Pretoria, South Africa*

- 1. Introduction
- 2. The Atmosphere and the Hydrologic Cycle
 - 2.1. The Atmosphere
 - 2.2. The Hydrologic Cycle
- 3. Causes of Global Climate Change
 - 3.1. Natural Causes
 - 3.2. Anthropogenic Causes
- 4. Different Dimensions of Climate Change
 - 4.1. Ozone Depletion
 - 4.2. The Greenhouse Effect
 - 4.3. Acid Rain
- 5. Impacts of Global Climate Change on Water Resources
 - 5.1. Regional Impacts
 - 5.1.1. Africa
 - 5.1.2. Asia
 - 5.1.3. Australasia
 - 5.1.4. Europe
 - 5.1.5. Latin America
 - 5.1.6. The Middle East and Torrid Asia
 - 5.1.7. North America
- 6. Conclusion

Climate Change and Its Effects on Freshwater Resources, Flooding, and Drought with Related Effects on Some Economic Sectors **31**
R. Meissner, *Research Associate at the African Water Issues Research Unit at the University of Pretoria, South Africa*

- 1. Introduction
- 2. The Global Water Budget and its Distribution
- 3. Impact on Freshwater Resources
- 4. Impact on Flooding and Drought
 - 4.1. The Agricultural Sector
 - 4.2. Electricity Generation
 - 4.3. Navigation
 - 4.4. The Domestic Sector
- 5. Conclusion

The Impact of El Niño on Water Resources

49

R. Meissner, *Research Associate at the African Water Issues Research Unit at the University of Pretoria, South Africa*

1. Introduction
2. El Niño-Southern Oscillation (ENSO) and La Niña
3. Impact of El Niño on the World's Weather
4. El Niño's Impact on Freshwater Resources
 - 4.1. El Niño 1982 to 1983
 - 4.2. El Niño 1997
5. A Political Response on El Niño 1997: The Case of South Africa
6. Conclusion

The Impact of Global Warming on Sea-Level Rise

66

R. Meissner, *Research Associate at the African Water Issues Research Unit at the University of Pretoria, South Africa*

1. Introduction
2. Global Warming and Sea-level Rise
3. The Effects of Sea-level Rise on the Environment and Human Society
 - 3.1. The Environment
 - 3.2. Human Society
 - 3.2.1. Africa
 - 3.2.2. Asia
 - 3.2.2.1. Temperate Asia
 - 3.2.2.2. Tropical Asia
4. Conclusion

The Impact of Climate Change on Water Management

78

R. Meissner, *Research Associate at the African Water Issues Research Unit at the University of Pretoria, South Africa*

1. Introduction
2. Global Climate Change
3. Water as an Important Resource
4. Coping with Global Climate Change in the Water Sector
 - 4.1. Education
 - 4.2. Appraisal Methodologies and Procedures
 - 4.3. Adaptation Methodologies and Procedures
 - 4.4. Prospective Research and Development Requirements: Vigorous and Viable Water Resource Management Systems
 - 4.5. Mitigation of the Greenhouse Effect through Water Resource Development
5. Conclusion

The Ethical Considerations of Global Climate Change and Water Resources

94

Joelien Pretorius, *Center Coordinator at the Center for International Political Studies (CIPS), University of Pretoria, South Africa*

1. Introduction
2. Ethical considerations
 - 2.1. The Debate Between the Neo-Malthusians and Cornucopians
 - 2.2. The Climate Change Debate
 - 2.2.1. The impact of human activity on climate change
 - 2.2.2. The human response to global climate change
 - 2.2.2.1. Differential responsibility for current build-up in greenhouse gasses

- 2.2.2.2. Differential impact of climate change
- 2.2.2.3. Differential capacity to deal with the adverse effects of climate change
3. Implications for Water Resource Development and Use
4. Conclusion

International Protocols Regarding Global Climate Change and the Impact on Water

Resources

110

J. Pretorius, *Center Coordinator at the Center for International Political Studies (CIPS), University of Pretoria, South Africa*

1. Introduction
2. The need for international protocols: The tragedy of global commons
3. The different climate change protocols operating in the International System
 - 3.1. The Montreal Protocol
 - 3.2. The Kyoto Protocol
 - 3.2.1. The Kyoto Protocol and the Montreal Protocol
 - 3.2.2. Climate change negotiations
 - 3.2.3. Principles grounding the climate change agreements
 - 3.2.3.1. Environmental integrity
 - 3.2.3.2. Cost-Effectiveness
 - 3.2.3.3. Equity
4. Impact of the Kyoto Protocol
5. The implications for water resources
6. Conclusion

The Impact of Demography on Global and Regional Water Resources

128

R. Meissner, *Research associate at the African Water Issues Research Unit at the University of Pretoria, South Africa*

1. Introduction
2. Population Growth; Past, Present and Future
3. Distribution of the Worlds Population
4. Reasons for Demographic Dynamics
5. Different Views on Population
 - 5.1. Neo-Malthusianism
 - 5.2. The Social View
 - 5.3. Women and Demography
6. Impact on Global and Regional Water Resources
7. Conclusion

Water as a Factor in Socioeconomic Development: Future Trends

147

Carina van Rooyen, *Department of Anthropology and Development Studies, University of Johannesburg, South Africa*

1. Introduction
2. Historical role of water in development
3. Current context
4. Future challenges facing the role of water in development
 - 4.1. Population growth
 - 4.2. Urbanization
 - 4.3. Type of development
 - 4.4. Poverties and inequalities
5. What can be done?
 - 5.1. A market-based approach
 - 5.2. A rights-based approach to water
6. Conclusion

Environmental Impact of Food Production and Consumption **170**

Palaniappa Krishnan, *Bioresources Engineering Department, University of Delaware, USA*

1. Introduction
2. Soil Bio- diversity in Agricultural Food Production
3. Water Use and Water Pollution
4. Energy
5. Climate Change
6. Food Safety and Biotechnology
7. Use of Chemicals
8. Desertification
9. Conclusion

Wastewater Treatment and Reuse for Irrigation **184**

Yehuda Shevah, *TAHAL Consulting Eng., Ltd., Tel Aviv, Israel*

1. Introduction
2. Worldwide Sanitation Perspective
3. Wastewater Composition and Characteristics
4. Wastewater Treatment
 - 4.1. Biological Treatment
 - 4.1.1. Wastewater Treatment Process
 - 4.1.2. Preliminary Treatment
 - 4.1.3. Primary Sedimentation: Anaerobic Digestion
 - 4.1.4. Secondary Treatment: Biological Oxidation
 - 4.2. Stabilization Polishing Ponds
 - 4.2.1. Maturation Ponds
 - 4.2.2. Design Features
 - 4.2.3. Maintenance
 - 4.3. Mechanical Treatment Systems
 - 4.3.1. Aerated Lagoons
 - 4.3.2. Trickling Filters
 - 4.3.3. Activated Sludge Processes
 - 4.3.4. Membrane Separation Bio-reactors
 - 4.4. Future Development in Biological Treatment
5. Advanced Treatment of Effluents
 - 5.1. Seasonal Retention of Treated Effluents
 - 5.2. Groundwater Recharge: Soil Aquifer Treatment (SAT)
 - 5.3. Surface Storage of Effluents
 - 5.4. Disinfection
6. Land Irrigation
 - 6.1. Irrigated Crops
 - 6.2. Crop Water Requirements
 - 6.3. Irrigation Techniques
 - 6.4. Land Application of Sewage Sludge
7. Public Health and Environmental Aspects
 - 7.1. Potential Risk
 - 7.2. Chemical Hazard
 - 7.3. Environmental Hazards
 - 7.4. Environmental Monitoring
8. Conclusions and Future Trends
