## VETERINARY SCIENCE

### **Veterinary Science - Volume 1**

**No. of Pages:** 364

**ISBN:** 978-1-84826-318-5 (eBook)

**ISBN:** 978-1-84826-768-8 (Print Volume)

Preface

vii

<b>Veterinary Medicine</b>	<b>1</b>
Craig Stephen, <i>Centre for Coastal Health and Faculty of Veterinary Medicine University of Calgary, Canada</i>	
James E C Bellamy, <i>Graduate Studies and Research, Atlantic Veterinary College, University Prince Edward Island</i>	
N.Ole Nielsen, <i>Department of Pathobiology, Ontario Veterinary College, University of Guelph, Canada</i>	

1. Introduction
2. Origins and Scope
  - 2.1. The Path to 21st Century Veterinary Medicine
  - 2.2. Scope of Veterinary Medicine
3. Trends in Veterinary Medicine
  - 3.1. Societal Trends
    - 3.1.1. Population Growth
    - 3.1.2. Industrial Technologies
    - 3.1.3. Globalization
    - 3.1.4. Urbanization
    - 3.1.5. Increasing Sensitivity to Animal Welfare
    - 3.1.6. Globalization and Industrialization in Food Safety and Security
  - 3.2. Biophysical Trends
  - 3.3. Trends in Science and Technology
    - 3.3.1. Comparative and Biomedical Science
    - 3.3.2. Computing Technology
    - 3.3.3. Evidence-Based Medicine
    - 3.3.4. Knowledge Flow and Access to Information
  - 3.4. Trends in the Fields of Veterinary Practice
    - 3.4.1. Companion Animals and Horses
    - 3.4.2. Food Animals
    - 3.4.3. Public Health
    - 3.4.4. Wildlife
    - 3.4.5. Ecosystem Health
4. Challenges for Veterinary Medicine
  - 4.1. Scientific Challenges
    - 4.1.1. Dealing with Complexity
    - 4.1.2. Understanding Genomes and Proteomes
    - 4.1.3. The Information Explosion and Knowledge Management
  - 4.3. Professional Challenges
    - 4.3.1. Veterinary Education
      - 4.3.1.1. Undergraduate
      - 4.3.1.2. Post-graduate Specialization
      - 4.3.1.3. Comprehensive Continuing Education (CE)
    - 4.3.2. Paraprofessional Veterinary Education
    - 4.3.3. Research
5. Conclusion

<b>Veterinary Surveillance</b>	<b>32</b>
John Berezowski, <i>Alberta Agriculture and Rural Development, Canada</i>	

1. Introduction
2. Definition of Surveillance
3. Purpose and Goals of Surveillance
4. Disease Measurement and Event Detection

- 4.1. Passive Surveillance
- 4.2. Active Surveillance
- 4.3. Targeted Surveillance
- 4.4. Sentinel Surveillance
- 4.5. Syndromic Surveillance
- 4.6. Reportable Disease Surveillance
- 4.7. Abattoir Surveillance
- 4.8. Emerging Disease Surveillance
- 5. Conclusion

## **Metabolic Disorders Of Dairy Cattle**

**56**

Burim N. Ametaj, *Department of Agricultural, Food and Nutritional Science, University of Alberta, Canada*

- 1. Introduction
- 2. Main Metabolic Disorders of Dairy Cattle
  - 2.1. Ruminal Acidosis
    - 2.1.1. Definition and Pathogenesis
    - 2.1.2. Treatment
    - 2.1.3. Prevention
  - 2.2. Laminitis
    - 2.2.1. Definition and Pathogenesis
    - 2.2.2. Treatment
    - 2.2.3. Prevention
  - 2.3. Ketosis
    - 2.3.1. Definition and Pathogenesis
    - 2.3.2. Treatment
    - 2.3.3. Prevention
  - 2.4. Milk Fever
    - 2.4.1. Definition and Pathogenesis
    - 2.4.2. Treatment
    - 2.4.3. Prevention
  - 2.5. Fatty Liver
    - 2.5.1. Definition and Pathogenesis
    - 2.5.2. Treatment
    - 2.5.3. Prevention
- 3. Research Frontiers
- 4. Conclusions

## **Veterinary Pathology**

**74**

Richard R. E Uwiera, *Agricultural, Food and Nutritional Science, College of Agricultural, Life and Environmental Sciences, University of Alberta, Canada*

Trina C. Uwiera, *Pediatric Surgery, College of Medicine and Dentistry, University of Alberta, Canada*

- 1. The History of Veterinary Pathology
- 2. What is Veterinary Pathology and who is the Veterinary Pathologist?
- 3. Tools of the Trade
  - 3.1. Electron Microscopy
  - 3.2. Immunohistochemistry
  - 3.3. Diagnostic Imaging
    - 3.3.1. Fluorescence Microscopy
    - 3.3.2. Confocal Microscopy
  - 3.4. Molecular Pathology
    - 3.4.1. Small Strand Conformation Polymorphism
    - 3.4.2. Comparative Genome Hybridization
    - 3.4.3. *In situ* Hybridization
    - 3.4.4. Polymerase Chain Reaction

- 3.5. Microdissection of Tissue Samples
- 3.6. Microarrays
- 4. Veterinary Pathology and its Application

### **Veterinary Toxicology**

**89**

Robert W. Coppock, *DVM, Toxicologist and Assoc Ltd., Faculty of Medicine and School of Public Health, University of Alberta Department of Environmental Health, Concordia University College, Alberta, Canada*

- 1. Introduction
  - 1.1. Veterinary Toxicologist Specialist
  - 1.2. Role of Veterinary Toxicology
- 2. Causes of Animal Diseases
- 3. Diagnosis of Animal Poisonings
  - 3.1. Disease Diagnosis
- 4. Animal Sentinels of Environmental Safety
- 5. Animal Feed Safety
  - 5.1. Animal Feedstuffs and Health
  - 5.2. Contamination of Animal Feedstuffs
  - 5.3. Mycotoxins in Feedstuffs
  - 5.4. Animal Feeding Practices and Health
- 6. Poisonous Plants
  - 6.1. Why Poisonous Plants Are Consumed
  - 6.2. Toxicology of Poisonous Plants
- 7. Zoo Toxins
- 8. Veterinary Drugs, Medicated Feed Additives, Pesticides and Safe Foodstuffs
- 9. Over the Counter Drugs and Household and Environmental Substances
- 10. Pesticides
- 11. Animals and Terror

### **Comparative Immunology-Based Approaches To Veterinary Diseases**

**107**

Daniel R. Barreda, *University of Alberta, Canada. (Corresponding author)*  
 Aja M. Rieger, *University of Alberta, Canada*  
 Nicole C. Girard, *University of Alberta, Canada*  
 Shannon D.G. Clarahan, *University of Alberta, Canada*  
 Afolabi F. Eleyinmi, *Federal University Technology, Nigeria*

- 1. Introduction
- 2. Molecular Origins of Animal Immunity
- 3. Cellular Basis for Effector Mechanisms of Animal Immunity
  - 3.1. Development of Animal Immune Cells
  - 3.2. Cross-Talk between Innate and Acquired Arms of the Animal Immune System
- 4. Comparative Immunology and the Conservation of Immune Defense Mechanisms
  - 4.1. Conservation of Immune Parameters across Evolution
  - 4.2. Conservation of Immune Parameters across Ontogeny
- 5. Immunity in the Prevention and Control of Animal Diseases
  - 5.1. Animal Immunity in the Prevention and Control of Zoonotic Diseases
  - 5.2. Animal Immunity in the Prevention and Control of Enzootic Diseases
- 6. Concluding Remarks

### **Veterinary Virology**

**135**

Luis M Schang, *Department of Biochemistry and Department of Medical Microbiology and Immunology, Alberta Veterinary Research Institute and Centre for Prion and Protein Folding Diseases, University of Alberta, Canada*

- 1. Introduction

2. Veterinary Sciences in the Foundations of Virology and in Ongoing Virus Discovery
3. Veterinary Sciences in the Discovery and Ongoing Characterization of Prions and Prion Diseases
4. Veterinary Sciences in the Practical Applications of Virology Research
  - 4.1. Veterinary Sciences in the Development of Rational Vaccines
  - 4.2. Veterinary Sciences Ongoing Contribution to Ongoing Vaccine Development
  - 4.3. Veterinary Virology in the Ongoing Development of Antiviral Drugs
5. Veterinary Viruses as Models to Study Pathogenesis of Human Viruses
6. Conclusion

## **Veterinary Bacteriology**

158

Arif Sheena, *University of Alberta Edmonton, Alberta, Canada*

1. Introduction
2. Animal Health
  - 2.1. Cattle
    - 2.1.1. Mastitis
    - 2.1.2. Collibacillosis
    - 2.1.3. Foot Rot
  - 2.2. Sheep
    - 2.2.1. Enterotoxaemia
    - 2.2.2. Paratuberculosis
    - 2.2.3. Infectious Necrotic Hepatitis
  - 2.3. Pigs
    - 2.3.1. Pneumonia
    - 2.3.2. Atrophic Rhinitis
    - 2.3.3. Erysipelas
    - 2.3.4. Greasy Pig Disease
  - 2.4. Horses
    - 2.4.1. Strangles
    - 2.4.2. Tetanus
    - 2.4.3. Pneumonia
  - 2.5. Dogs
    - 2.5.1. Cystitis
    - 2.5.2. Pyoderma
  - 2.6. Cats
    - 2.6.1. Pinkeye or Conjunctivitis
  - 2.7. Poultry
    - 2.7.1. Campylobacteriosis
    - 2.7.2. Mycoplasmosis
  - 2.8. Fish
    - 2.8.1. Hemorrhagic Septicemia
    - 2.8.2. Flexibacter columnaris
3. Zoonoses
  - 3.1. Anthrax
  - 3.2. Brucellosis
  - 3.3. Tuberculosis
  - 3.4. Tularemia
  - 3.5. Psittacosis
4. Food Safety
  - 4.1. Escherichia coli O157:H7
  - 4.2. Salmonella spp.
  - 4.3. Listeria monocytogenes
  - 4.4. Vibrio parahaemolyticus
  - 4.5. Staphylococcus aureus
5. Preventive Measures
6. Conclusion

**Veterinary Mycology****171**Jalpa P. Tewari, *Department of Agricultural, Food, and Nutritional Science, University of Alberta, Canada*

1. Introduction
2. Characteristics and Classification of Fungi
3. Dermatophytosis
4. Malassezia Dermatitis and Otis Externa
5. Blastomycosis
6. Histoplasmosis
7. Cryptococcosis
8. Coccidioidomycosis
9. Paracoccidioidomycosis
10. Sporotrichosis
11. Aspergillosis
12. Penicilliosis
13. Candidiasis
14. Zygomycosis
15. Mycotoxicosis
16. Conclusions

**Veterinary Helminthology****227**Lydden Polley, *Western College of Veterinary Medicine, University of Saskatchewan, Saskatoon, Saskatchewan S7N 5B4, Canada*

1. Introduction
2. Helminths- Life Cycles
3. Helminths and Host Ecology –Linkages and Shifts
4. Nematodes - Basics
5. Cestodes - Basics
6. Trematodes - Basics
7. Helminths and Disease-Mechanisms
8. Helminths Infection and Disease – Detection
9. Helminths Infection and Disease – Treatment and Control
10. Helminths and Livestock
  - 10.1. Nematodes
  - 10.2. Cestodes
  - 10.3. Trematodes
11. Helminths and Horses
  - 11.1. Nematodes
  - 11.2. Cestodes
  - 11.3. Trematodes
12. Helminths and Dogs and Cats
  - 12.1. Nematodes
  - 12.2. Cestodes
  - 12.3. Trematodes
13. Helminth Shared by Animals and People – Zoonoses
14. Helminths and Wildlife
15. Looking Forward

**Biology Of Select Zoonotic Protozoan Infections Of Domestic Animals** 253

A. Oladiran, *Department of Biological Sciences, University of Alberta, Canada*  
 S. J. Hitchen, *Department of Biological Sciences, University of Alberta, Canada*  
 B.A. Katzenback, *Department of Biological Sciences, University of Alberta, Canada*  
 M. Belosevic, *Department of Biological Sciences, University of Alberta, Canada*

1. Introduction
2. The Apicomplexa
  - 2.1. Eimeria
    - 2.1.1. Epidemiology
    - 2.1.2. Biology and Life Cycle
    - 2.1.3. Host Defense and Pathology
    - 2.1.4. Diagnosis and Treatment
  - 2.2. Theileria
    - 2.2.1. Epidemiology
    - 2.2.2. Biology and Life Cycle
    - 2.2.3. Host Defense and Pathology
    - 2.2.4. Diagnosis and Treatment
  - 2.3. Cryptosporidium
    - 2.3.1. Epidemiology
    - 2.3.2. Biology and Life Cycle
    - 2.3.3. Host Defense and Pathology
    - 2.3.4. Diagnosis and Treatment
3. The Flagellates
  - 3.1. *Giardia*
    - 3.1.1. Epidemiology
    - 3.1.2. Biology and Life Cycle
    - 3.1.3. Host Defense and Pathology
    - 3.1.4. Diagnosis and Treatment
  - 3.2. African Trypanosomes
    - 3.2.1. Epidemiology
    - 3.2.2. Biology and Life Cycle
    - 3.2.3. Host Defense and Pathology
    - 3.2.4. Diagnosis and Treatment

**Veterinary Ectoparasitology** 276

Douglas D. Colwell, *Agriculture and Agri-Food Canada, Lethbridge Research Centre, Canada*  
 Domenico Otranto, *Department of Veterinary Public Health and Animal Sciences, Faculty of Veterinary Medicine, University of Bari, Italy*

1. Introduction
2. Impact of ectoparasites
3. Insects
  - 3.1. Flies (Diptera)
    - 3.1.1. Myiasis
    - 3.1.2. Blood-feeding flies
    - 3.1.3. Non-biting Flies
  - 3.2. Fleas
  - 3.3. Lice
4. Arachnids
  - 4.1. Ticks
  - 4.2. Mites
5. Conclusions

**Index** 307**About EOLSS** 311
