CONTENTS

Public Regulation in Food and Agriculture: Goals, Constraints, Policies, Instruments, and Trade **1**

Azzeddine M. Azzam, *Department of Agricultural Economics, University of Nebraska-Lincoln, Lincoln, Nebraska, USA*

1. Introduction
2. National Goals and Constraints
3. A Menu of Food and Agricultural Policies
4. Food and Agricultural Policy Objectives and Instruments
 - 4.1. Domestic Policies
 - 4.1.1. Natural Resources Policies
 - 4.1.2. Input Markets Policy
 - 4.1.3. Product Market Policy
 - 4.2. Trade Policy
 - 4.2.1. Tariffs
 - 4.2.2. Quotas
 - 4.2.3. Export Subsidies
 - 4.2.4. Voluntary Export Restraints (VERs)
 - 4.2.5. Non-Tariff Barriers
5. Agricultural and Food Policies When Trade Matters
6. The Uruguay Round Agreement on Agriculture
 - 6.1. The "Tripod"
 - 6.1.1. Market Access
 - 6.1.2. Domestic Support
 - 6.1.3. Export Subsidies
 - 6.2. Non-Tariff Border Measures
 - 6.3. "Non-Trade" Concerns
 - 6.4. Consideration for Developing Countries
7. Concluding Thoughts

Public Regulation of Food and Agricultural Markets **22**

Luther Tweeten, *Department of Agriculture, Environmental, and Development Economics, The Ohio State University, USA*

1. Introduction
2. Successes and Failures in Global Food and Agriculture
3. Characteristics and Problems of Agriculture
4. Evolution of Government in Agriculture
5. Principles of Regulation
6. The Standard Model as a Regulatory Framework
7. Regulations and Externalities
8. Mechanisms to Address Externalities

Farm Price and Income Support Mechanisms **50**

Luther Tweeten, *Anderson Professor of Agricultural Marketing, Policy, and Trade, The Ohio State University, Columbus, USA*

1. Introduction
2. Evolution of Farm Price and Income Support Mechanisms
3. Support Mechanisms
4. Conclusions

Institutions, Organizations, and Policies Affecting Agriculture: Preserving Farmland 73

Luther Tweeten, *Anderson Professor of Agricultural Marketing, Policy, and Trade, The Ohio State University, Columbus, USA*

1. Introduction
2. Soil Conservation
3. Farmland Preservation
4. Concluding Comments

Institutions, Organizations, and Policies Affecting Agriculture: Protecting Family Farms, Species, and Food and Water Safety 91

Luther Tweeten, *Anderson Professor of Agricultural Marketing, Policy, and Trade, The Ohio State University, Columbus, USA*

1. Introduction
2. Regulating Genetically Enhanced Organisms (GEOs)
3. Regulating Chemicals
4. Regulating Pathogens
5. Protecting Endangered Species
6. Saving Family Farms
7. Conclusions

Inspection, Quarantine and Quality Control 110

Frisvold, George B. , *Department of Agricultural and Resource Economics, University of Arizona, Tucson, AZ, USA*

Hillman, Jimmie S. , *University of Arizona, USA*

1. Introduction
2. The Nature of the Problem
 - 2.1. Plant to Plant Transmission
 - 2.2. Animal to Animal Transmission
 - 2.3. Animal to Human Transmission and Food Safety
 - 2.4. Imperfect Information and Labeling
3. Policy Responses
 - 3.1. Prevention: Quarantine and Vaccination
 - 3.2. Control: Quarantine and Stamping-Out Policies
 - 3.3. HACCP Systems and Food Safety
 - 3.4. Growing Role of Risk Analysis
 - 3.5. International Institutions
4. Future Challenges
 - 4.1. BSE and vCJD
 - 4.2. Future Challenges for International Cooperation on Inspection and Disease Control
 - 4.3. Special Challenges of Biotechnology and Genetically Modified Organisms

Veterinary Public Health: An Historical Perspective 124

Johnson, R.W.M., *Consulting Economist, Wellington, New Zealand*

1. The Food Safety/Public Health Paradigm
2. Economics of Veterinary Public Health
3. Origins of disease
 - 3.1. Domestication and Distribution of Animals
 - 3.2. Early Strategies for Disease Prevention
 - 3.3. Animals as Food Sources
 - 3.4. Control of Live Animals
4. The development of hygiene inspection

- 4.1. Contamination of Foods of Animal Origin
- 4.2. Methods to Guarantee Hygiene in Foods of Animal Origin
- 4.3. Food Establishments
- 4.4. Animal Wastes
- 4.5. The Aims of Inspection in Slaughter of Animals
5. Country experiences
 - 5.1. Great Britain
 - 5.2. United States
 - 5.2.1. Poultry
 - 5.3. Australia and New Zealand
6. Process and procedure
 - 6.1. The Move to Food Safety
7. International co-ordination
8. International trade
 - 8.1. Assessing the New Rules

International Policies to Control Plant and Animal Diseases

147

Narrod, Clare , *Economist, Office of Risk Assessment and Cost-Benefit Analysis, U.S. Department of Agriculture, Washington, DC, USA*

Malcolm, Scott , *Assistant Professor of Operations Research Food and Resource Economics, University of Delaware, Newark, DE, USA*

1. Introduction
2. Impact of Diseases and Mechanisms for their Control
 - 2.1. Livestock
 - 2.1.1. Cost of Disease
 - 2.1.2. International Efforts to Standardize Control
 - 2.1.3. Domestic Animal Disease Control Measures
 - 2.1.4. Post-entry livestock disease and human health control measures
 - 2.2. Plants
 - 2.2.1. Cost of Disease
 - 2.2.2. International Efforts to Standardize Control
 - 2.2.3. Domestic Plant Disease Control Measures
 - 2.2.4. Post-Entry Plant Disease and Pest Control Measures
3. Empirical Evidence of Trade Implications of Disease
 - 3.1. Livestock Trade
 - 3.2. Produce Trade Implications
4. The Use of Risk Analysis in the Process of Altering Trade
 - 4.1. Risk Assessments
 - 4.2. Accompanying Economic Analysis
 - 4.3. Risk Management Decisions
 - 4.4. The Impact of Past Risk Assessment Decisions in US Agricultural Trade
 - 4.5. Dispute Settlement
5. Non-tariff Barriers: Some U.S. Examples
 - 5.1. Rejection of Livestock Products into the United States
 - 5.2. Restrictions on Produce
6. Discussion

International Food Inspection

179

Caswell, Julie A. , *Department of Resource Economics, University of Massachusetts at Amherst, Amherst, MA USA*

1. Overview of Food Inspection in an Era of Freer International Trade
2. Food Inspection Systems
 - 2.1. Inspection Systems and Enforcement Mechanisms by Importing Countries
 - 2.2. Inspection Systems and Enforcement Mechanisms by Exporting Countries

- 2.3. Technical Issues in Operating Inspection Systems
- 3. Common Principles for Operating Food Inspection Systems for Imports and Exports
 - 3.1. How Common Principles Are Developed
 - 3.2. Use of the Risk Analysis Framework
 - 3.3. Norms Set Out in Trade Agreements: The SPS Agreement Under WTO
 - 3.4. Defining and Implementing Equivalency
 - 3.5. The Role of the Precautionary Principle in System Design
 - 3.6. Use of Benefit-Cost Analysis in Regulatory Decision Making
 - 3.7. How Common Are Common Principles?
- 4. Current Challenges in Operating International Inspection Systems
 - 4.1. Consistency in the Stringency of Inspection
 - 4.2. Compliance Burdens
 - 4.3. Transparency
 - 4.4. Unpredictability
 - 4.5. Gaps in Enforcement and Moving Targets
- 5. Future Challenges
 - 5.1. Identifying Priorities for Inspection Efforts
 - 5.2. Building Consensus on Best Practices
 - 5.3. Assigning Responsibility for Quality Assurance and Its Benefits and Costs

Land Management and Property Rights

193

J. D. Foltz, Assistant Professor, University of Connecticut, Storrs, Connecticut, USA

- 1. Introduction
- 2. Chapter Summaries
 - 2.1. Land Ownership and Property Rights
 - 2.2. Patents and Other Intellectual Property Rights
 - 2.3. Valuation and Ownership of International Germplasm
- 3. Types of Property Rights
 - 3.1. Individualized Property Rights
 - 3.2. State Ownership
 - 3.3. Multiple Owner Property Rights
 - 3.4. Tragedy of the Commons
- 4. The Incentives of Property Rights
 - 4.1. Investment Incentives
 - 4.2. An Investment Model
 - 4.2.1. The Benefits of Property Rights Security
 - 4.2.2. Collateral
 - 4.2.3. Gains from Trade
 - 4.3. Caveats to Investment Increases
- 5. Costs of Property rights
 - 5.1. Direct Costs
 - 5.2. Property Rights and Freedom to Operate
 - 5.3. Property Rights Enforcement
- 6. Land Reform
 - 6.1. Why Land Reform?
 - 6.1.1. Why Transfer Land and Not Some Other Asset?
 - 6.1.2. Land Reform and Agricultural Productivity
 - 6.2. Market Assisted Land Reform:
 - 6.3. Key Design Issues in Land Reform
 - 6.3.1. Demand for Land
 - 6.3.2. Supply of Land
 - 6.3.3. Property Rights
 - 6.3.4. Productive Potential
 - 6.3.5. Beneficiary Organization and Training
 - 6.3.6. Identifying the Target Population
 - 6.3.7. Institutional Arrangements

7. Conclusion

Agricultural Practices as Barriers to Sustainability

220

Kulshreshtha, S. N. .*Department of Agricultural Economics, University of Saskatchewan, Saskatoon, SK, Canada, S7N 5A8*

1. Introduction
 - 1.1. Background and History of Sustainable Agriculture
 - 1.2. Objectives of the Paper
2. What is Sustainable Agriculture?
 - 2.1. Notion of Sustainability
 - 2.2. Terminology Related to Sustainable Agriculture
 - 2.3. Definition of Sustainable Agriculture
 - 2.4. Desirable Characteristics / Indicators of Sustainable Agriculture
3. Symptoms of Unsustainable Agriculture
4. Major Threats / Challenges to Agricultural Sustainability
5. Barriers to Adopting Sustainable Agriculture
 - 5.1. Lack of definition of Sustainable Agriculture
 - 5.2. Lack of Answer to Fundamental Questions
 - 5.3. Lack of Knowledge
 - 5.4. Common Misconceptions about Sustainable Agriculture
 - 5.5. Resistance to Change
 - 5.6. Misguided Research Focus
 - 5.7. Training and Extension
 - 5.8. External Influences Inhibiting Adoption of Sustainable Practices
 - 5.8.1. Competitive Environment Facing Agriculture
 - 5.8.2. Lack of Property Rights
 - 5.8.3. Poor Enforceability of Property Rights
 - 5.8.4. Population Growth and Policy Focus on Food Self-sufficiency
 - 5.8.5. Growing Masses of Poverty
 - 5.8.6. Foreign Aid and Other External Pressure
 - 5.9. Policy Measures
 - 5.9.1. Agricultural Policies
 - 5.9.2. Non-Agricultural Policies
6. Attaining Sustainable Agriculture in the Future
 - 6.1. Emphasis on Systems rather than on Smaller Components
 - 6.2. Investment in Research and Development
 - 6.3. Enhancement of New and Appropriate Technologies
 - 6.4. Agroecological Approach
 - 6.5. Market Access and Product Differentiation
 - 6.6. Policy Reform
 - 6.7. Development of New Pricing System
 - 6.8. Strengthening of Education and Training Infrastructure
 - 6.9. Improving Social Acceptability

Land Ownership and Property Rights

247

Montaner Larson, Janelle B. . *The Pennsylvania State University, PO Box 7009, Tulpehocken Road, Reading, PA 19610-6009, USA.*

1. Introduction: Definition and Importance of Land Tenure
2. Historical Discussion of Land Tenure
3. Land Tenancy Policies of the Late Twentieth Century
4. Advantages of Property Rights in Land
 - 4.1. Access to Credit
 - 4.2. Investment in Conservation and Improvements
 - 4.3. Functioning Land Markets

5. Rural Land Markets and the Access of Poor People to Land
6. Various Land Titling Projects
7. Concluding Remarks

Valuation and Ownership of Genetic Resources in Agriculture

260

Foltz, J. D. *Assistant Professor, University of Wisconsin-Madison, Madison, Wisconsin, USA*

1. Introduction
2. Conservation of Genetic Diversity in Agriculture
 - 2.1. *In-situ* Conservation
 - 2.2. *Ex-situ* conservation
 - 2.3. Optimal Mix of *in-situ* and *ex-situ* Conservation
3. Ownership Issues
 - 3.1. Rules, Conventions, and Regulations
 - 3.1.1. Plant Variety Protection Acts
 - 3.1.2. UPOV
 - 3.1.3. Utility Patents of Plants
 - 3.1.4. International Trade Issues
 - 3.2. Farmer's Rights
 - 3.3. Case Study: Trends in Plant Variety Patents in the US
4. Genetic Valuation: Theory
 - 4.1. Different types of values
 - 4.2. Models of Valuation
 - 4.2.1. Social Welfare Values
 - 4.2.2. Different Market Scenarios
 - 4.2.2.1. Case 1: Perfect Competition
 - 4.2.2.2. Case 2: Imperfect Output Markets
 - 4.2.2.3. Case 3: Imperfect Input Markets
5. Genetic Research models
 - 5.1. Search Under Risk Aversion
 - 5.2. Models of Whether to Search
 - 5.3. Searching Genetic Collections
6. Empirical Valuation
 - 6.1. Valuing cost savings
 - 6.2. Self-selection Problems in Valuation Estimates
 - 6.3. Valuing traits
 - 6.3.1. Hedonic pricing
 - 6.3.2. Contingent Valuation Methods
 - 6.4. Valuing Diversity in Agriculture
 - 6.4.1. Genetic Uniformity
 - 6.4.2. On-Farm Value of Genetic Diversity
 - 6.5. Empirical Valuation of Seed Collections
7. Key Future Issues for Agricultural Genetic Resources
 - 7.1. Public versus Private Ownership
 - 7.2. Genetic Use Restriction Technology
 - 7.3. Biotechnology and Genetic Diversity

Patents and Other Intellectual Property Rights

287

Moschini, GianCarlo, *Professor of Economics and Pioneer Hi-Bred International Chair in Science and Technology Policy, Iowa State University, U.S.A.*

1. Introduction
2. A Brief Taxonomy and History
3. IPRs for Agricultural and Life Sciences
4. Why Intellectual Property Rights?
5. Some Economics of IPRs

- 5.1. Benefits and Costs of IPRs
- 5.2. The Scope of Patent Protection
- 5.3. Patent Races
- 5.4. Cumulative Innovations
- 5.5. Complementary Innovations
6. Alternatives to Patents
7. Some Open Policy Issues
 - 7.1. Administrative and Transaction Costs
 - 7.2. Patenting by Public Institutions
8. Conclusion

Food Security and Government Intervention

304

Samarendu Mohanty, *Assistant Professor, Department of Agricultural and Applied Economics, Texas Tech University, Lubbock, Texas, USA*

E. Wesley F. Peterson, *Department of Agricultural and Applied Economics, University of Nebraska-Lincoln, USA*

1. Introduction
2. Forms of Government Intervention
 - 2.1. Price Policies
 - 2.2. Import and Export Policies
3. Agricultural Intervention and Food Security
4. Food Security and Macro Policy
5. Conclusion

Exchange Rate Impacts on the Composition of Agricultural Trade

318

Frank Fuller, *University of Arkansas, Agriculture Building, Fayetteville, Arkansas, USA*

Dermot Hayes, *Iowa State University, Heady Hall, Ames, Iowa, USA.*

1. Introduction
2. Comparative Static Results
3. The Simulation Model
 - 3.1. Elasticities and Functional Forms
 - 3.2. Data Sources
4. Simulation Results
5. Summary and Conclusions

Price, Imports, Exports, and Taxation Policies

337

Fama Fabiosa, Jacinto, *Food and Agricultural Policy Research Institute (FAPRI), Center for Agricultural and Rural Development (CARD), Iowa State University (ISU), Ames, Iowa, U.S.A.*

1. Introduction
2. Price Policies
 - 2.1. The Common Agricultural Policy of the European Union
 - 2.2. Japan's Price Band
 - 2.3. United States Loan Deficiency Payments
 - 2.4. Other Price Support Schemes
3. Import Policies
 - 3.1. Tariff Rate Quota Administration
 - 3.2. State Trading Enterprises
4. Export Policies
5. Tax Policies
6. Sanitary and Phytosanitary Agreement

Food Security in Developing Countries: A Case Study for India **351**

Samarendu Mohanty, *Assistant Professor, Department of Agricultural and Applied Economics, Texas Tech University, Lubbock, Texas, USA*

E. Wesley F. Peterson, *Professor, Department of Agricultural and Applied Economics, University of Nebraska-Lincoln, USA*

1. Introduction
2. Factors Affecting Future of Indian Food Demand and Supply
3. Simulation Results
 - 3.1. Macro Assumptions
 - 3.2. Other Assumptions
 - 3.3. Demand and Supply Outlook for Grains
4. Conclusion

Index **363**

About EOLSS **371**
