

CONTENTS

VOLUME IX

Desert Ecosystems: An Introduction **1**
 Silvio Carlos Rodrigues, *Instituto de Geografia, Universidade Federal de Uberlândia, Uberlândia, MG, Brazil*

1. Introduction
2. Section Overview

Geomorphology and Biogeography of Tropical Deserts **12**
 Silvio Carlos Rodrigues, *Instituto de Geografia, Universidade Federal de Uberlândia, Uberlândia, MG, Brazil*
 Gelze Serrat de Souza Campos Rodrigues, *Instituto de Geografia, Universidade Federal de Uberlândia, Uberlândia, MG, Brazil*

1. Introduction
2. Tropical Deserts
 - 2.1. Geographical Distribution
 - 2.2. Controlling Factors
 - 2.3. Distinguishing Characteristics
 - 2.3.1. Temperature
 - 2.3.2. Precipitation
3. Processes, Landforms and Tropical Deserts Tipology
 - 3.1. Eolian Processes
 - 3.2. Sandy Deserts
 - 3.2.1. Dunes
 - 3.2.2. Ergs
 - 3.3. Pavement Features
 - 3.3.1. Regs
 - 3.3.2. Wadis and Chotts
 - 3.3.3. Pediments, Playas and Alluvial Fans.
 - 3.3.4. Mountains Features
4. Biogeography of Tropical Deserts
 - 4.1. Biological Adaptation to Aridity
 - 4.1.1. Desert Vegetation.
 - 4.1.2. Desert Fauna.

Desertification in the Tropics **33**
 Dirce Maria Antunes Suertegaray and Roberto Verdum
Geography Department, Geosciences Institute - UFRGS, Porto Alegre – Brazil.

1. The Desertification Process and Its Area of Occurrence
2. The Origin (1940) and the Renewal (1970) of the Concept of Desertification
 - 2.1. Desertification: awareness and debate
3. Diversity in the Comprehension of the Desertification Process
4. Policies and Experiences of Control: Practices, Success and Failure
5. Sandization as a Process of Special Attention

Desert Ecosystems in India **51**
 T.S.Chouhan, *Department of Geography, University of Rajasthan, Jaipur, India*
 U.K.Sharma, *Ministry of Rural Development (NLM), Government of India.*

1. Introduction

2. Physiography of Indian Desert Regions
 - 2.1. Landscape
 - 2.1.1. Desert Peneplains
 - 2.1.2. Sand Dunes of Marusthali
 - 2.1.3. Sandy Plains
 - 2.1.4. Indus Plains
 - 2.1.5. Flood Plains
 - 2.1.6. Marshy Land
 - 2.1.7. Salt Playas
 - 2.2. Geomorphic Evolution
 - 2.2.1. Playas or Ranns
 - 2.2.2. Genesis of Carbonate Pan
 - 2.2.3. Origin of Sand Dunes
 - 2.3. Soils
 - 2.3.1. Soils of Desert Plains
 - 2.3.2. Soils of Sandy Plains
 - 2.3.3. Sand Dunes of Varied Categories
 - 2.3.4. Soils of Old Flood Plains
 - 2.3.5. Soils of Rock Lands
 - 2.3.6. Soils of Playas
 - 2.3.7. Soils of Rann and Coastal Plains
3. Wastelands in Desert Regions of India
 - 3.1. Rajasthan
 - 3.2. Gujarat
 - 3.3. Punjab
 - 3.4. Haryana
 - 3.5. Andhra Pradesh
 - 3.6. Karnataka
 - 3.7. Jammu & Kashmir
4. Climate
5. Agro-ecological Zones in Desert Region
6. Geology and hydrology of Desert Regions
 - 6.1. Geology
 - 6.2. Water Bearing Properties of Various Groups of Geological Successions
 - 6.3. Hydrology of Desert Regions
7. Land Use Pattern
8. Ecosystem in Indian Desert
 - 8.1. Natural Factors
 - 8.2. Human Interface
 - 8.2.1. Deforestation
 - 8.2.2. Land Degradation and Desertification
 - 8.2.3. Water Management Problems
 - 8.2.4. Use of Chemical Fertilizers and Chemical Pesticides
 - 8.2.5. Increasing Population Pressure on Land
 - 8.2.6. Deterioration in Ethnic Values
 - 8.2.7. Flora and Fauna
 - 8.3. Ecosystem of Desert Regions
9. Conclusions and Suggestions
 - 9.1. Management of Land Resources
 - 9.2. Management of Water Resources
 - 9.3. Human Resource Management
 - 9.4. Controlling Human Interface.
 - 9.5. Restoration of Ecology

1. Introduction
2. Living in the Desert Ecosystems
 - 2.1. Adaptation of Plants to Aridity
 - 2.2. Adaptations of Animals to Aridity
3. Responses of Desert Ecosystems to Global Climate Changes

Ecology of Tropical DEserts in Special Reference to Biogeography & Evolution of Desert Animals

112

T.S.Chouhan, *Department of Geography, University of Rajasthan, Jaipur, India*
U.K.Sharma, *Ministry of Rural Development (NLM), Government of India.*

1. Introduction
2. Animal Species
 - 2.1. Mollusks
 - 2.2. Arthropods
 - 2.3. Reptiles
 - 2.4. Birds
 - 2.5. Mammals
3. Co-Existence of Animals
 - 3.1. Simile in Plants and Animals
 - 3.1.1. Stress Evading Strategies
 - 3.1.2. Structural and Eco-physiological Stress Controlling Strategies
 - 3.1.3. Strategies to Prevent Death by Over-heating
 - 3.1.4. Strategies Optimizing Water Uptake
 - 3.1.5. Strategies to Control Reproduction in Relation to Environmental Conditions
 - 3.2. Animal- Animal Interactions
 - 3.3. Animal of Tropical Desert Regions
 - 3.3.1. Animal Species of American Tropical Deserts
 - 3.3.2. Animals of North Africa Tropical Deserts
 - 3.3.3. Animals of South African Tropical Deserts
 - 3.3.4. Animals of Tropical Desert Regions of Asia.
4. Biogeography Of Tropical Desert Regions
 - 4.1. Heat and Temperature
 - 4.2. Wind Impact
 - 4.3. Precipitation and Water Balance
 - 4.4. Water Balance in Animals
 - 4.5. Nutrition
5. Morphological Adaptations
 - 5.1. Arthropod Cuticle
 - 5.2. Vertebrate Integument and Pelage
 - 5.3. Animal Color
 - 5.4. Water Storage
 - 5.5. Shape and Size of Species
6. Behavioural Adaptations
 - 6.1. Tolerance to Dehydration
 - 6.2. Cold Tolerance
 - 6.3. Adaptive Heterothermy
 - 6.4. Behavioral Thermo-regulation
 - 6.5. Specialized Respiration and Transpiration
 - 6.6. Imbibitions of Fog, Dew and Water Vapor
7. Reproduction In Desert Environment
 - 7.1. Physiological Issues
 - 7.2. Ecological and Evolutionary Considerations
 - 7.3. Diversity
 - 7.4. Sustainability
8. Human Interface
 - 8.1. Adaptation of Man in Desert Environment

- 8.2. Consequences of Human Interface
- 8.3. Crux of Problems
- 9. Conclusions
 - 9.1. Revival of Ecosystem
 - 9.2. Productivity of Land
 - 9.3. Water Management
 - 9.4. Sustenance of Surviving Animals

Archaeo-Historical Environment and Significance of Ancient Agriculture in Tropical Deserts 165
Farooq Ahmad, *Department of Geography, University of the Punjab, Lahore, Pakistan.*

- 1. Introduction
 - 1.1. African and Eurasian civilizations
 - 1.2. Sumer 3500-2334 BC
 - 1.3. Indus Valley and the Indian subcontinent 3200-1700 BC
 - 1.4. Ancient Egypt 3200-343 BC
 - 1.5. Elamite 2700-539 BC
 - 1.6. Persia 550 BC-330 BC
 - 1.7. China 2200 BC-present
 - 1.8. Greece 2000-1450 BC
 - 1.9. Korea 900 BC-present
 - 1.10. The fall of civilizations
- 2. Significance of agriculture
 - 2.1. Ways of cultivation
- 3. The beginning of agriculture
 - 3.1. Early agriculture

Ecology of Tropical Deserts With Special Reference to Arid Plant Physiology 184
T.S.Chouhan, *Department of Geography, University of Rajasthan, Jaipur, India*
U.K.Sharma, *Ministry of Rural Development (NLM), Government of India.*

- 1. Introduction
- 2. Tropical Desert Ecosystem
 - 2.1. Etymology
 - 2.2. Climate
 - 2.2.1. Wind Impact
 - 2.2.2. Precipitation and Water Balance
 - 2.2.3. Water Balance in Plants
 - 2.2.4. Nutrition
- 3. Physiography of Tropical Deserts
 - 3.1. Landscapes and Landforms
 - 3.2. Hydrological Cycle
 - 3.3. Desert Features
 - 3.4. Vegetation
 - 3.5. Plant Morphology
 - 3.6. Water Storage
- 4. Physiology of Arid Plants
 - 4.1. Germination and Seedling Behavior of Desert Plants
 - 4.2. Water Uptake and Transpiration in Plants
 - 4.3. Photosynthesis and Respiration of Plants
 - 4.4. Translocation of Assimilates
 - 4.5. Root Development Activities
 - 4.6. Tolerance to Dehydration
- 5. Problems of Tropical Desert Regions
- 6. Conclusions and Suggestions
 - 6.1. Rain Water Harvesting

- 6.2. Use of Surface Water
- 6.3. Water Use in Canal Regions
- 6.4. Reforestation of Degraded Regions
- 6.5. Conservation of Pasturelands
- 6.6. Treatment of Degraded and Marginal Cultivated Lands
- 6.7. Utilization of Waste and Barren Lands in Plantation
- 6.8. Disaster and Risk Management in Desert Regions
- 6.9. Mode of Treatment
 - 6.9.1. Peoples' Participation
 - 6.9.2. Sharing of Benefits
 - 6.9.3. Restoration of Traditional Practices of Vegetation
 - 6.9.4. Association of Voluntary Organizations
 - 6.9.5. Scientific and Research Application
 - 6.9.6. Restoration of Ecosystems
