

CONTENTS

VOLUME XV

The Role of Microbial Resources Centers and UNESCO in the Development of Biotechnology 1

Horst W. Doelle and Faustino Sineriz

1. Preliminary History
2. UNESCO and GIAM
3. MIRCEN
 - 3.1. Culture Collection MIRCENS
 - 3.2. Biological Nitrogen Fixation [BNF] MIRCENS
 - 3.3. Biotech MIRCENS
 - 3.4. Aquaculture and Marine Biotech MIRCENS
 - 3.5. Bioinformatic MIRCENS
 - 3.6. UNESCO-MIRCEN Fellowship Programme
 - 3.6.1. UNESCO Mircen Fellowships
 - 3.6.2. Special Project Unesco/Africa Fellowships
 - 3.6.3. Biotechnology - Women, Science and Technology Fellowships
 - 3.6.4. UNESCO/Ipacal Fellowships
 - 3.6.5. Nitrogen Fixation Fellowships
 - 3.6.6. Mircen Molecular Microbiology Fellowships
 - 3.6.7. UNESCO/ASM Fellowships
 - 3.6.8. UNESCO/IUMS/SGM Fellowships
 - 3.7. UNESCO/MIRCEN Professorship Scheme
 - 3.8. UNESCO-ASM Visiting Resource Person Program--The American Society For Microbiology-UNESCO Joint Program: Visiting UNESCO-ASM Resource Person Program
 - 3.9. NAS/ASM/MIRCEN Program
 - 3.10. UNESCO Support for Launch of the ASM Global Outreach Programme
 - 3.11. World Journal of Microbiology and Biotechnology
 - 3.12. Digital Education and Research In Biotechnology
4. Population Growth and Food Production
5. Biotechnology Education and Training Centers [BETCEN]
 - 5.1. Marine Biotechnology Betcen at Ocean University Of Qingdao, Qingdao, People's Republic of China
 - 5.2. Plant Biotechnology Betcen At Agricultural Biotechnology Centre, Godollo, Hungary
 - 5.3. Plant Biotechnology Betcen At Bethlehem University, Bethlehem, Palestine Territory Via Israel
 - 5.4. Plant Biotechnology Betcen At Centro De Investigacion Y De Estudios Avanzados Del L.P.N., Irapuato - Leon, Mexico
 - 5.5. Plant Biotechnology Betcen At Vegetable And Ornamental Plant Institute, Agricultural Research Centre, Private Bag X293000 Pretoria, South Africa
6. Conclusion

Biotechnological Activities of the Mircens History, Training and Research until 2002 28

Horst Doelle and Faustino Sineriz

1. Introduction
2. Biological Nitrogen Fixation [BNF] MIRCENS
 - 2.1. Rhizobium MIRCEN Porto Alegre in Brazil
 - 2.1.1. Introduction
 - 2.1.2. Activities of MIRCEN Porto Alegre
 - 2.2. Rhizobium MIRCEN Nairobi in Kenya
 - 2.2.1. Introduction
 - 2.2.2. Legume Niches in Farming Systems
 - 2.2.3. Is the Technology Available?

- 2.2.4. Possibilities for Strengthening the Impact of Agrobiotechnologies to the Small-hold Farmers
- 2.3. Rhizobium MIRCEN Dagar in Senegal
 - 2.3.1. History
 - 2.3.2. Achievements
- 2.4. Rhizobium MIRCEN Beltsville in USA
 - 2.4.1. Introduction
 - 2.4.2. Staff and Training
 - 2.4.3. Culture Collection Activities
- 2.5. NIFTAL MIRCEN Pala in Hawaii, USA
- 3. Culture Collection MIRCENs
 - 3.1. Culture Collection and Patents MIRCEN Brussels in Belgium
 - 3.1.1. International Cooperation Activities of the Belgian Coordinated Collections of Microorganisms (BCCM) Consortium
 - 3.1.2. BCCM International Cooperation Policy and Activities
 - 3.2. Culture Collection and Patents MIRCEN Braunschweig in Germany
 - 3.2.1. Basic Description of the Infrastructure
 - 3.2.2. Quality of the Infrastructure
 - 3.2.3. Education & Training
 - 3.3. Culture Collection and Patent MIRCEN Budapest in Hungary
 - 3.4. Enteric Diseases MIRCEN Calcutta in India
 - 3.4.1. Activities
 - 3.4.2. Future Plans
 - 3.5. Culture Collection MIRCEN London in UK
 - 3.5.1. Basic Description of the Infrastructure
 - 3.5.2. Overview
 - 3.5.3. Molecular Identification Services Unit
 - 3.5.4. Service Activities
 - 3.5.5. Outputs
 - 3.5.6. Research and Development
 - 3.5.7. Teaching and Training
 - 3.6. Mycology MIRCEN Egham in UK
 - 3.6.1. Activities
 - 3.6.2. Some recent achievements
 - 3.7. Culture Collection and Patent MIRCEN ATCC Manssansas in USA
- 4. Biotechnology MIRCENs
 - 4.1. S.M. de Tucuman in Argentina
 - 4.1.1. Background
 - 4.1.2. Training courses
 - 4.1.3. Some of the MIRCEN activities in recent years
 - 4.2. Biotechnology MIRCEN Brisbane and Pacific Region
 - 4.2.1. Australian Collection of Microorganisms
 - 4.2.2. Research
 - 4.2.3. Pacific Regional Network
 - 4.2.4. Future Plans
 - 4.3. Biotechnology MIRCEN Waterloo in Canada
 - 4.3.1. Biochemical Engineering, Industrial Biotechnology, Environmental Management
 - 4.4. Microbial Technology MIRCEN Beijing in China
 - 4.4.1. Beijing MIRCEN Activities during 1996-2001, with support from UNESCO, UNEP, and ASM
 - 4.5. Biotechnology MIRCEN Cairo in Egypt
 - 4.5.1. Background
 - 4.5.2. Objectives
 - 4.5.3. Activities
 - 4.5.4. Future View
 - 4.6. Biotechnology MIRCEN Guatemala City in Guatemala
 - 4.6.1. Introduction
 - 4.6.2. Activities in the year 2000

- 4.6.3. Activities for the year 2001
- 4.7. Bioconversion Technology MIRCEN Hong Kong in China
 - 4.7.1. Introduction
 - 4.7.2. Training
 - 4.7.3. Research
- 4.8. Biotechnology MIRCEN Teheran in Iran
 - 4.8.1. Biotechnology Research Centre
 - 4.8.2. The Persian Type Culture Collection and Tehran MIRCEN
 - 4.8.3. Major Scientific Achievements of the Centre
- 4.9. Fermentation Technology MIRCEN Osaka in Japan
 - 4.9.1. Introduction
 - 4.9.2. MIRCEN Osaka (Fermentation)
 - 4.9.3. Research Collaboration through JSPS Core University Programme
 - 4.9.4. Training young scientists in Asia through the International Post-graduate University course in Microbiology
 - 4.9.5. Education in the Graduate School, Osaka University
- 4.10. Industrial Biotchnology MIRCEN Bloemfontein in South Africa
 - 4.10.1. Objectives
- 4.11. Fermentation, Food and Waste Recycling MIRCEN Bangkok in Thailand
 - 4.11.1. Culture Collection
 - 4.11.2. Training
 - 4.11.3. Research
 - 4.11.4. Thailand's Potential Contribution To Future Cooperation
- 4.12. Microbial Biotechnology MIRCEN St Augustine in Trinidad and Tobago
 - 4.12.1. Current Areas Of Research
 - 4.12.2. Future Plans
- 4.13. Biotechnology MIRCEN Sittingborne in UK
 - 4.13.1. Introduction
 - 4.13.2. Conclusions
 - 4.13.3. Other MIRCEN Activities
 - 4.13.4. The Future
- 5. Aquaculture and Marine Biotechnology MIRCENS
 - 5.1. Aquaculture MIRCEN Mumbai in India
 - 5.1.1. Training Program
 - 5.1.2. Other Activities
 - 5.2. Aquaculture MIRCEN Sede Boqer in Israel
 - 5.2.1. Training
 - 5.2.2. Courses
 - 5.3. Marine Biotechnology MIRCEN Baltimore in USA
 - 5.4. The Microbial Gene Prospecting MIRCEN (San Jos, Costa Rica)
 - 5.4.1. Introduction
 - 5.4.2. Activities
 - 5.4.3. Microbial Biodiversity
 - 5.4.4. Microbial Ecology
 - 5.4.5. Gene Prospecting
 - 5.5. Marine Biotechnology MIRCEN Mangalore in India
 - 5.5.1. History
 - 5.5.2. Achievements of Mangalore MIRCEN
- 6. Bioinformatics MIRCENS
 - 6.1. BITES MIRCEN Ljubljana in Slovenia
 - 6.1.1. International Centre for Chemical Studies ICCS
 - 6.1.2. UNESCO-MIRCEN-BITES Program
 - 6.2. Bioinformatics MIRCEN Stockholm in Sweden
 - 6.3. WFCC MIRCEN Shizuoka in Japan
 - 6.3.1. Introduction
 - 6.3.2. On-line registration and updating
 - 6.3.3. e-Workbench
 - 6.3.4. Future Prospects

Biological Nitrogen Fixation**104**James Kahindi, *United States International University, Nairobi, Kenya*Nancy Karanja, *Regional Coordinator Sub Saharan Africa, Urban Harvest-CGIAR System-wide Initiative on Urban and Peri-urban Agriculture, Nairobi, Kenya*Mamadou Gueye, *ISRA-MICEN/Laboratoire Commun de Microbiologie (LCM) IRD-ISRA-UCAD, Dakar, Senegal*

1. Introduction
2. Nodulation: From the Infection Process to the Functioning of the Nitrogenase
 - 2.1. Nodule Formation
 - 2.2. Functioning of the Nitrogenase
 - 2.3. Assimilation of Fixed Nitrogen
3. Measurement: Different Methods to Monitor the Nitrogen Fixation
 - 3.1. Why Measure Nitrogen Fixation?
 - 3.2. Methods for Estimating N₂ Fixation
 - 3.2.1. The Acetylene Reduction Technique
 - 3.2.2. The Nitrogen-Difference Technique
 - 3.2.3. The Xylem Solute Technique
 - 3.2.4. The ¹⁵N Isotope Techniques
 - 3.2.4.1. The Isotope Dilution (ID)
 - 3.2.4.2. The A Value
 - 3.2.4.3. The Natural Abundance
4. Improvement: Description of Different Approaches Allowing Maximization of Nitrogen-Fixation
 - 4.1. Selection of Superior Plant Genotypes
 - 4.2. Selection of Elite Rhizobial Strains
 - 4.3. Rhizobial Inoculant Production and Quality Control

History and Achievements of the Culture Collection and Patent Mircen Braunschweig [Germany]**119**Dagmar Fritze, *DSMZ - Deutsche Sammlung von Mikroorganismen und Zellkulturen German Collection of Microorganisms and Cell Cultures, Germany*

1. Introduction
2. The Early Days of DSM
3. Further Development
4. History of DSM with Regard to its Patent Depository
5. MIRCEN activities of DSM in these early years
6. Present Organisation and Status of DSMZ
7. The OECD initiative on Biological Resource Centres (BRC-Initiative)
8. Future Development

The Ex Situ Conservation of Microorganisms: Aiming at a Certified Quality Management**137**David Smith, *CABI Europe-UK, Bakeham, Lane, Egham, Surrey TW20 9TY, UK*Matthew J. Ryan, *CABI Europe-UK, Bakeham, Lane, Egham, Surrey TW20 9TY, UK*Erko Stackebrandt, *DSMZ-German Collection of Microorganisms and Cell Cultures GmbH, 38124, Braunschweig, Germany*

1. Introduction
2. Towards a Global Network
 - 2.1. The World Federation for Culture Collections (WFCC)
 - 2.2. Organization for Economic Cooperation and Development BRC Initiative
 - 2.3. Microbiological Resource Centres (MIRCEN)
3. Size of the Task
4. Quality Management
5. Information Technology
 - 5.1. Data Quality Management

- 5.2. Typical Information Generated on Microorganisms
- 5.3. Information Provision and Exchange
- 6. Preservation
 - 6.1. Background
 - 6.2. Silica Gel Storage
 - 6.3. Freeze-drying (Lyophilization)
 - 6.4. L-drying
 - 6.5. Maintenance of Bacteria in Gelatin
 - 6.6. Cryopreservation
- 7. Quality Control based on Molecular Characterization
- 8. Capacity Building
- 9. Conclusion

Mircen-Bites Ljubljana: Cooperation for Research, Education and Development **168**
 Bojana Boh, ICCS - International Centre for Chemical Studies, MIRCEN-BITES Ljubljana, Slovenia

- 1. International Centre for Chemical Studies – ICCS
- 2. Biotechnological Information Exchange System – BITES
- 3. Examples of Projects
 - 3.1. Applications of water-retaining polymers for agricultural use
 - 3.2. Non-Toxic Pesticide with Physical Action, Based On Modified Starch
 - 3.3. Matricaria Chamomilla Project
 - 3.4. Microencapsulation of animal repellents for agriculture
 - 3.5. Ganoderma Medicinal Mushrooms
- 4. ICCS Publications

Microbiological Resources Centre (mircen) at the Chinese University of Hong Kong, Shatin, Hong Kong (1991-2003) **189**
 Shu-Ting Chang, *Centre for International Services to Mushroom Biotechnology, Department of Biology, The Chinese University of Hong Kong, Hong Kong SAR, China*
 John A. Buswell, *Institute of Edible Fungi, Shanghai Academy of Agricultural Sciences, Shanghai 201106, China*

- 1. Introduction
- 2. Research
- 3. Training
- 4. International Services
- 5. Publications/Conference Presentations
